Before you start

Declaration of Conformity
Responsible Party: JK Imaging Ltd.
Address: JK Imaging Ltd., 17239 So. Main Street, Gardena, CA 90248 USA
JK Imaging Europe, 71 Clarendon Road, Watford, WD17 1DS, UK
Company Website: kodakpixpro.com

For Customers in the U.S.A.
Tested to Comply with FCC Standards FOR HOME OR OFFICE USE
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired camera operation.

For Customers in Europe

"CE" mark indicates that this product complies with the European requirements for safety, health, environment and customer protection. "CE" marked cameras are intended for sales in Europe.

This symbol [crossed-out wheel bin WEEE Annex IV] indicates separate collection of electrical waste and electronic equipment in the European countries. Please do not throw the equipment into domestic refuse. Please use the return and collection systems available in your country for proper, safe disposal of this product.

Batteries: Please dispose of used batteries at designated collection centers.

Packaging: Please follow local regulations for the recycling of packaging.
About this Manual

Thank you for purchasing this KODAK PIXPRO Digital Camera. Please read this manual carefully and keep it in a safe place for future reference.

JK Imaging reserves all rights of this document. No part of this published manual may be reproduced, transmitted, transcribed, stored in a retrieval system or translated into any language or computer language, in any form, by any means, without the prior written permission of JK Imaging.

All trademarks mentioned in this manual are used for identification purposes only and are properties of their respective owners and holders.

This manual provides you with instructions on how to use your new KODAK PIXPRO Digital Camera. Every effort has been made to ensure that the contents of this manual are accurate; however JK Imaging reserves the right to make changes without notice.

Throughout this manual, the following symbols are used to help you locate information quickly and easily:

- Indicates useful information.

The following symbols may be used throughout this manual to facilitate your understanding of how to operate the camera:

[Item properties]: The optional properties in the camera interface are indicated by the [ ] symbol.
Safety Notes for this Camera

- Do not drop the camera or allow it to hit solid objects.
- Do not attempt to disassemble or repair the camera.
- Do not use or store the camera in dusty places or on a beach to help prevent dust or sand from entering the camera, causing possible damage.
- Do not use or store the camera in a hot environment or in direct sunlight.
- Do not use or store the camera near powerful magnetic fields, for example near a magnet or transformer.
- Avoid touching the lens of the camera.
- Do not expose the camera to direct sunlight for a long period of time.
- To prevent the camera from being damaged by moisture, do not use or store the camera in very humid environments, such as in rain or near bodies of water.
- If water accidentally comes in contact with the camera, turn the camera off immediately, remove the battery and the memory card and dry it completely within 24 hours.

- When you take the camera from a cold environment to a warmer environment, condensation may occur. Please wait for a reasonable period of time before you turn the camera on.
- Before you remove the battery and memory card, the camera should be turned off.
- When you clean the body of the camera, do not use abrasive, alcohol-based or organic cleansers or solvents.
- Use a professional lens cleaning cloth and appropriate cleaner to wipe and clean the lens.
- Download your photos and remove the memory card when you are going to store the camera for long periods of time.
- If this camera is not in use for a long period of time, please keep it in a dry and clean storage location.
- Our company will not pay compensation for any failure of playback including: pictures or videos damaged or unrecoverable by improper operation.
Safety Notes for Battery

- Please use a battery that is the same type as the one included.
- Please use the attached charger to charge the battery.
- If battery fluid leaks inside the camera, contact our customer service department immediately. If battery fluid leaks onto your skin, rinse your skin with clean water and seek immediate medical attention.
- Disposal of used batteries should be carried out in accordance with your local (national or regional) regulations.
- To prevent the battery from being damaged, do not drop the battery or allow it to hit solid objects or to be scratched by foreign objects.
- Do not let the battery come in contact with metal objects (including coins) to avoid short circuiting, discharging, excessive heat or possible leakage.
- Do not attempt to disassemble the battery.
- Do not expose the battery to water. Always keep the battery contacts dry.
- Do not heat the battery or throw it into a fire to avoid a possible explosion.
- Do not store the battery in a hot environment or in direct sunlight.
- If the battery overheats during charging or use, stop charging or use immediately. Turn off the product, remove the battery carefully and wait until it cools down.
- When the camera is stored for a long period of time, remove the battery and keep it in a safe, dry place that is not accessible to infants and children.
- In colder environments, the performance of the battery could be noticeably reduced.
- When you install the battery, align the battery markings according to the positive and negative markings inside the camera battery compartment. Never force the battery into the battery compartment.
Safety Notes for Memory Cards

- We highly suggest buying only well-known, name brand memory cards to ensure peak performance and reliability.
- Format the memory card using the camera before you use it or insert a new one.
- Do not drop the memory card or allow it to hit solid objects to avoid damaging it.
- Do not attempt to disassemble or repair the memory card.
- Do not expose the memory card to water. Always keep it dry.
- Do not remove the memory card when the camera is turned on. Otherwise, the memory card and photo/video files could be permanently damaged.
- Do not directly edit the data on the memory card. Copy the data to your computer before you edit the files.
- When the camera is stored for long periods of time, be sure to download your photos and remove the memory card. Store the memory card in a dry environment.
- Do not modify the name of the files or folders of the memory card using your computer. Modifying the file names may cause the files to not be recognized on the camera or a possible permanent error may occur.
- A photo taken with the camera will be stored in the folder that is automatically generated on the memory card. Do not store photos that are not taken using this camera in these folders as the pictures cannot be recognized during playback.
- When you insert the memory card, make sure the notch of the card matches the markings on the top of the camera card slot.
Other Safety Notes

- Do not disconnect the power or turn the camera off during the update process. Doing so may cause incorrect data to be written and the camera may not power on later.

- Do not hang the neck strap of the camera around the neck of a child.

- When using your camera on an airplane, observe the relevant rules specified by the airline and FAA regulations.

- Due to the limitations of manufacturing technology, the LCD may have a few dead or bright pixels. These pixels do no effect the quality or performance of the camera, photos or video.

- Do not expose the camera’s LCD to water. In a humid environment, only wipe it with a soft, dry, cleaning cloth.

- If the LCD screen is damaged, pay particular attention to the liquid crystal in the screen. If any of the following situations arise, immediately take the steps listed below:
  1. If liquid crystal comes in contact with your skin, please wipe with a dry cloth, wash thoroughly with soap, and rinse with plenty of clean water.
  2. If liquid crystal gets into your eye, flush the eye immediately with plenty of clean water for at least 15 minutes and then seek medical assistance.
  3. If liquid crystal is swallowed, immediately rinse your mouth thoroughly with clean water and induce vomiting. Seek medical assistance.

Installing Battery and Memory Card

1. Open the battery cover door according to diagram (①,②) below:

2. Insert the battery into the battery slot in the correct direction as shown in the following diagram.
3. Insert the memory card into the memory card slot as shown in the diagram below:

4. Close the battery cover door according to instructions ① and ② below:

A standard SD memory card is not included in the camera packaging and needs to be purchased separately. This camera takes a standard (SD/SDHC) memory card. We recommend using a name brand memory card that is Class 4 or higher and has a capacity of 4GB to 32GB. The camera is not compatible with Micro SD, Ultra, Ultra Plus, Extreme, XC, or adapters for any of these other memory cards.

To remove your memory card, open the battery cover door, gently press the memory card to eject it and remove carefully.
Before you charge your battery, you should turn the camera off and insert the battery.

1. Connect the camera to the power charger using the supplied USB cable
2. Insert the plug of the power charger into the wall outlet to charge the battery.

The charger is for indoor use only.

After the battery is stored for long periods of time, use the supplied power charger to fully charge the battery prior to use.
3. When the camera is turned off, you can also connect the camera to your computer using a Micro USB cable to charge the battery.

Charging indicator:
Orange: Charging
The indicator lamp will go out once charging is finished.
To maximize battery life, charge the battery for at least 4 hours the first time.

Please charge the battery indoors between 0°C and 40°C (32°F and 104°F).
Turning Camera On and Off

Press the Power button to turn the camera on. To turn the camera off, press the Power button again.

Power Switch

How to Take Pictures

1. Hold the camera securely with both hands, being careful not to block the flash and lens with fingers.
2. Point the lens toward the object you want to take a picture of.
3. Use the zoom lever to select Tele or Wide position to zoom in or out on your subject.
4. Press the shutter button down half-way to allow the camera to focus on your subject.
5. When the frame around your subject turns green and the LCD is focused to your liking, push the shutter button down completely to take the picture.

When the power is off, press and hold the play button to power on and enter Playback mode.
Set your Language, Date/Time after the First Power-On

1. When you turn the camera on for the first time, the language selection screen will appear.
2. Press the arrow buttons to select your desired language.
3. After you press the [ ] button to confirm your language selection, the Date/Time settings screen will appear.
4. Press the left/right arrow buttons to select the Date/Time to be adjusted: Time is displayed in YYYY.MM.DD/HH:MM.
5. Press the up/down arrow buttons to adjust the value for the desired Date/Time.
6. Press the [ ] button to confirm the time settings and the snapshot screen will appear.

Resetting your Language

After you set your language for the first time, follow the instructions below to reset your desired language.

1. Turn the power switch to turn on the camera.
2. Press the [ ] button and press the up/down arrow buttons to select . Press the [ ] button to enter the menu.
3. Press the up/down arrow buttons to select , and press the [ ] button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Language] and press the [ ] button or right arrow button to enter the menu.
5. Press the arrow buttons to select your desired language and press the [ ] button to confirm.
6. Press the [ ] button and the snapshot screen will appear.
Resetting Date/Time

After you set your Date/Time for the first time, follow the instructions below to reset date and time.

1. Turn the power switch to turn on the camera.
2. Press the button and press the up/down arrow buttons to select . Press the button to enter the menu.
3. Press the up/down arrow buttons to select , and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Date & Time] and press the button or right arrow button to enter the menu.
5. Press the left/right arrow buttons to select the Date/Time to be adjusted: Time is displayed in YYYY.MM.DD/ HH:MM.
6. Press the up/down arrow buttons to press the value for your selected entry. After you finish your settings, press the button to confirm.
7. Press the button and the following snapshot screen will appear.
Display Setting

Press the DISP button to display the settings: Classic, Full, Off.

Classic: Displays the camera parameters on screen

Full: Camera parameters with Grid and Histogram

Off: Does not display any additional icons on screen

15. AF Mode

For optimal video shooting, it is recommended that an SD/SDHC memory card be used. If you shoot video using only the camera's internal memory, the end results may have image jitter, noise and vastly shorter recording times.

Optical Zoom and Digital Zoom can be adjusted (168X in total). Digital Zoom can be adjusted to 4X.

<td>Record videos. Press down the shutter button to start recording.</td>
</tr>
<tr>
<td>Custom Settings</td>
<td>CS</td>
<td>The user can store the frequently used shooting modes and parameters and switch to this mode for quick adjustment.</td>
</tr>
</tbody>
</table>
Auto Mode is the most common and easiest mode to take photos. While operating in this mode, the camera automatically optimizes numerous camera settings to adjust optimum settings for your photos and videos for the best possible results.

Follow these steps:
1. Turn the power switch to turn on the camera.
2. Turn the Mode Dial to 📷.
3. Compose your picture in the LCD screen and press the Shutter button halfway down to focus on the subject.
4. The LCD screen will show a green focus frame when the subject is in focus.
5. Press the shutter button all the way down to take your photo.
**Program AE  **

When **P** (Program AE) mode is selected, you can adjust the EV value and ISO value.

1. Turn the Mode Dial to **P** and press the button to configure settings.

2. Press the left/right arrow buttons to select a setting to adjust.

3. Press the up/down arrow buttons to adjust the setting.

4. Press the button to engage the settings and enter the shooting screen.

**Shutter Priority  **

When **S** (Shutter Priority) is selected, you can adjust the shutter speed, ISO value and EV value. The camera automatically sets the aperture value based on the shutter speed value and ISO value to get the most appropriate exposure value.

1. Turn the Mode Dial to **S** and press the button to configure settings.

2. Press the left/right arrow buttons to select a setting to adjust.

3. Press the up/down arrow buttons to adjust the setting.

4. Press the button to confirm the settings and enter the shooting screen.
Aperture Priority  A

When selecting A (Aperture Priority) Mode, you can adjust the aperture size / EV value and ISO value. Selecting a large aperture opening will emphasize the point of focus and show a blurry background and foreground. A small aperture opening will keep both the background and main object in clear focus.

1. Turn the Mode Dial to A and press the button to configure settings.

2. Press the left/right arrow buttons to select a setting to adjust.

3. Press the up/down arrow buttons to adjust the setting.

4. Press the button to confirm the settings and enter the shooting screen.

Manual Mode  M

When selecting Manual (M) Mode, you can set the aperture / shutter speed manually and ISO value.

1. Turn the Mode Dial to M and press the button to configure settings.

2. Press the left/right arrow buttons to select a setting to adjust.

3. Press the up/down arrow buttons to adjust the setting.

4. Press the button to confirm the settings and enter the shooting screen.
In Portrait Mode, the camera is set to automatically adjust camera exposure for realistic portrayal of skin tones.

1. Turn the Mode Dial to select Face Beautifier Mode ( النفسية).
2. Press the button and press the up/down buttons to select 甜甜圈.
3. Press the left/right arrow buttons to select Face Beautifier Effects and press the button to confirm and return to photo shooting mode.

Face Beautifier  النفسية

Beautifier Mode has 3 effects:

• Effect 1: Skin Soften
• Effect 2: Skin Soften + Eye Brightening
• Effect 3: Skin Soften + Eye Brightening + Eye Enlargement
With Panorama Mode, you can take a series of pictures which will be automatically stitched into a ultra-wide panoramic (up to 180°) picture by the camera.

Follow the steps below:

1. Turn the Mode dial to Panorama Mode (HDR).
2. Press the arrow buttons to select a desired shooting direction. Should you not select a direction, the default shooting direction is “right.” 2 seconds later, the camera will be ready to take pictures. You can also press the SET button or press the shutter button halfway down to be ready to take pictures.
3. Compose the first view of the panoramic picture on the LCD and press the Shutter button to capture the image.
4. When you finish shooting the first photo, two target icons will display on the LCD at left and right sides. Move the camera to the right until the round target icon is directly positioned over the square box. The box will turn green when they overlap and the camera will automatically take the next picture. Repeat the same steps for additional shots. Up to 4 frames can be stitched together.
5. If continuous pictures are less than 4 shots, press the SET button and the camera will automatically stitch the pictures together. Press the playback button to enter Playback mode to see the end effect.
6. If you take 4 pictures, the camera will automatically stitch the pictures together. Press the playback button to enter Playback mode to see the finished effect.
Flash Mode, Self-Timer, Macro Mode, and Exposure Compensation are all disabled in Panorama Mode.

In the process of shooting in Panorama Mode, when the LCD shows "Improper alignment. Please try again," it means that in the process of the camera moving, the angle is off the green line and stitching cannot be completed. You will have to try again, keeping the LCD image aligned with the green line.

In order to guarantee the best shooting effect in Panorama Mode, please keep moving horizontally and keep unnecessary shaking to a minimum.

In Panorama Mode, up to 4 photos can be captured when the image size is set at 2MP.

You can select your desired scene from the 12 Scene modes according to the type of environment you are shooting in. The camera then automatically configures the most appropriate settings for the best possible photos.

Turn the Mode Dial to the Scene Mode to enter the Scene Mode menu. What the LCD screen displays is shown in the screen shot below:

Press the arrow buttons to select a scene, and press the SET button to confirm.
<table>
<thead>
<tr>
<th>Scene</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

Custom Settings  **CS**

The user can store frequently used shooting modes and parameters, and switch to this mode for a quick adjustment. Changing these settings will override any previous settings in CS mode.

**Settings under CS mode:**

1. Turn the Mode dial to select the **CS** mode and enter the setup screen as shown in the figure below:

   ![Select one capture mode to define CS.](image)

2. As shown in the figure above, press the left/right arrow buttons to select the capture mode that you want to define as **CS** and press the **SET** button to enter the shooting screen.

3. As shown in the figure above, press the **button and choose whether to continue the **CS** mode setting or rotate the Mode dial to skip.

   ![Go to setting CS mode](image)
   ![Or Rotating the mode dial to skip.](image)

**Settings under non-CS mode:**

1. Select any mode or scene mode to be stored.
2. Set your desired parameters in the current mode.
3. Press the **button, press the up/down arrow buttons to select , and press the **SET** button to enter the menu.
4. Press the up/down arrow buttons to select , and press the **SET** button or right arrow button to enter the menu.
5. Press the down arrow button select [Custom Settings] and press the SET button or the right arrow button to enter the menu.

6. Select [Yes] to save or [No] to cancel.

7. Turn the Mode dial to switch to the custom settings (CS).

8. The photo settings you stored the last time are used.

- When the **CS** mode is used for the first time, there is no preset parameter stored in the **CS** mode.

- Under the non **CS** mode, if you need to retain or modify the set parameters (except the parameters in [ ]) in restart or all modes. Please enter the [Custom Settings] menu and select [Yes] after setup. Otherwise, the parameter settings are not retained in the case of switching on/off or mode switching.

- If you want to remove the parameter setting of [Custom Settings], please see the reset function on page 83 to operate.
Using the Zoom Function

Your camera is equipped with two types of zoom functions: Optical Zoom and Digital Zoom. Toggle the Zoom Lever of the camera to zoom in or out on the subject while taking pictures.

When the Optical Zoom reaches the threshold as Digital Zoom, release and turn the Zoom lever to T to switch between the Optical Zoom and Digital Zoom.
Focus Setting

In different photo shooting modes, you can select different focus methods.

1. Press the up arrow button (AF) to display the settings screen.

2. Press the left/right to select the following 3 modes:
   - Single-AF: The focus frame appears on the center of the LCD screen to focus on the subject.
   - Multi-AF: The camera automatically focuses the subject in a wide area to find the focus point.
   - Object Tracking: Smart tracking of the object in motion under the focusing shooting.

3. Press the SET button to confirm the settings and exit the menu.

Once enabled, Object Tracking will only work when lens is focused on the object.
**Macro Mode**

The Macro Setting is ideal for shooting small objects or close-up photos. This mode allows you to focus on subjects very close to the camera.

1. Press the left arrow button (←) to enter the Macro Menu.

2. Press the left/right to select the following 2 modes:
   - **Macro Off**
     Select this option to disable Macro.
   - **Macro On**
     Select this option to make focusing on the object closer to the lens (At the W side, the shooting distance should be more than 1.6 cm).

3. Press the button to confirm the settings and exit the menu.
Self-Timer Setting

Using this function to take pictures at pre-set intervals. The camera can be set to shoot after 2 seconds, 10 seconds after pressing the shutter or when a smile is detected.

1. Press the down arrow button (.navigateTo) to enter the self-Timer menu.

2. Press the left/right to select the following 4 modes:
   - Self-Timer Off
     Disables the Self-Timer.
   - Self-Timer 2 sec
     A single picture is shot 2 seconds after the Shutter Button is pressed.
   - Self-Timer 10 sec
     A single picture is shot 10 seconds after the Shutter Button is pressed.
   - Self-Timer Smile
     Press the Shutter Button and a picture will be taken immediately after a smile is detected.

3. Press the button to confirm the settings and exit the menu.

When enabling the Self-Timer, pressing the shutter or the down arrow button can disable the Self-Timer and return to the shooting screen while keeping the Self-Timer setting.

When enabling the Smile Detection setting, pressing the shutter button or button can disable the Self-Timer without keeping the Self-Timer-Smile setting.
Flash Mode

The flash provides supplemental light for a scene. The flash is usually used when shooting against the light to highlight the object. It is also suitable for metering and shooting in darker scenes to improve the exposure.

1. Press the Flash Button to pop up the flash.

2. Press the right arrow button ( ) to enter the Flash Settings Menu.

3. Press the left/right to select the following 6 modes:
   - **Force Off**: Flash is turned off.
   - **Flash Auto**: Camera flash goes off automatically based on existing light conditions.
   - **Force Flash**: The flash will engage with each shot even if there is enough available light to take the photo without flash.
   - **Slow Sync.**: This allows you to take pictures of people at night that clearly show both your subjects and the night time backdrop. The use of a tripod is recommended when shooting with this setting.
   - **Slow Sync. + Red-Eye**: Use this mode for slow synchro shots with red-eye reduction.
   - **Red-Eye Reduction**: The camera emits a brief pre-flash before the picture is taken to reduce red-eye effects.

4. Press the button to confirm the settings and exit.
White Balance Setting

The white balance function allows adjustment of the color temperature for different light sources (This can be adjusted in P S A M Mode).

Follow the steps below to set white balance of the camera:

1. Press \[\text{SET}\] button to enter White Balance Menu.

2. Press the left/right to select the following 8 modes:
   - \[\text{AWB}\] AWB
   - \[\text{Daylight}\]
   - \[\text{Cloudy}\]

3. Press the \[\text{SET}\] button to confirm the settings and exit the menu.
Continuous Shot

Follow the steps below to configure the Continuous Shot Settings:

1. Press the 📷 to enter the Continuous Shot Menu.

2. Press the left/right to select the following 4 modes:
   - 📷 Single
   - 📷 Continuous Shot
   - 📷 3 Shots
   - 📷 Time-Lapse
     Take pictures based on the preset interval (30sec/ 1min/ 5min/ 10min).

3. Press the SET button to confirm the settings and exit the menu.

4. Press the Shutter button to start continuous shooting.

The flash is disabled in this mode in order to achieve quick succession of shots.
EV Setting

The EV Function Menu of the camera includes functions, such as EV (Exposure Value) Adjustment, ISO, Shutter Adjustment, Aperture Adjustment, etc. Using the appropriate Function Settings can improve your pictures.

To select the best setting follow these steps:

1. Press the button to display the Settings screen.
2. Press the left/right arrow buttons to select the Setting options.
3. Press the up/down buttons to adjust the option values.
4. Press the button to complete the setting and enter shooting mode.

Exposure Compensation

Set up Exposure Compensation to adjust the picture brightness. If there is very high contrast between the photographed object and the background, the brightness of the picture can be adjusted as necessary. (This can be adjusted in Mode)

The adjustable range of exposure value is from EV -2.0 to EV +2.0.
ISO
The ISO function allows you to set the sensitivity of the camera's light sensor based on the brightness of the scene. To improve the camera's sensor performance in darker environments, a higher ISO value is required. A lower ISO value is needed when shooting in brighter conditions.
Pictures taken at higher ISO settings will generally have more noise than those taken at lower ISO settings. (This can be adjusted in PSAM + Mode)

The camera's ISO settings include: Auto, 80 100, 200, 400, 800, 1600 and 3200.

Shutter Adjustment
For shutter speed, the camera may automatically set the aperture value corresponding to the manually set shutter speed to obtain the most suitable exposure value. The movement of an object may be shown by adjusting the shutter speed. A higher shutter value can help you more clearly capture fast moving objects, while a lower shutter value can better show the movement of objects. (This can be adjusted in SM Mode)
Aperture Adjustment
You can adjust the aperture size value. Selecting a large aperture opening will emphasize the point of focus and show a blurry background and foreground. A small aperture opening will keep both the background and main object in clear focus. (This can be adjusted in **AM** Mode)

Using Quick Recording
In Photo Shooting Mode, press the Recording Shortcut Button to begin recording video.

Once you are finished, press the Recording Shortcut Button or the shutter button to stop and store the video. The camera will automatically return to the current Shooting Mode set.
"i" Button Function Menu

Mode: **PSAM**

The Image Color Setting allows you to select different color effects.

1. Press the **i** button to select the Image Color Setting Menu.
2. Press the left/right arrow buttons to select the Image Color Setting options.

There are 7 Image Color options in Photo Shooting Mode **PSAM**:

- Normal
- Vivid

There are 4 Image Color options in Movie Mode ****:

- Normal
- Vivid
- Sepia
- Black and White
Viewing Photos and Videos

To view photos and videos on LCD screen:
1. After pressing the button, the last photo or video clip taken will be displayed on the LCD screen.
2. Use the Left/Right navigation buttons to scroll through the photos or video clips stored in the internal memory or on the SD Memory Card.
3. To play a selected video clip, press the button to enter the Movie Playback Mode. An operation guide appears on the screen when playing back a video. Press the appropriate buttons to enable the corresponding functions.

Thumbnail View

When in Playback Mode, rotate the Zoom Lever counter clockwise to the $\text{W}$ position to display thumbnail images of the photos and videos on the screen. (the picture is displayed in horizontal position)

1. Slide the Zoom Lever to switch between 3 x 3 and 4 x 4 thumbnails.
2. When a 3 x 3 or 4 x 4 thumbnail is displayed, press the arrow buttons to select a picture or video clip to view.

3. Press the arrow buttons to select a picture or video clip to view and press the \( \text{SET} \) button to restore it to the original size.

If the \( \text{Movie} \) indicator appears on the LCD, then a movie file is currently being displayed.
Using Zoom Playback (for still pictures only)

When playing back photos, you can also use the Zoom Slider to zoom in on the photos 2 to 8 times their original magnification.

1. Press the [ ] button to switch to Playback Mode.
2. Press the left/right arrow buttons to select the picture on which to use the zoom feature.
3. Rotate the Zoom Lever clockwise to [ ] to zoom in.
4. The bottom right corner of the screen will display the number of times the image is magnified and area of the photo shown.

5. Press the arrow buttons to navigate and select a portion of the photo to be zoomed in on.
6. Press the [SET] button to return the image to its original scale.

Movie images cannot be magnified.
Deleting Photos and Videos

In Playback Mode, press the down arrow button ( ) to delete your photos and videos.

To delete photos or videos:
1. Press the button to switch to Playback Mode.
2. Press the left/right arrow buttons to select the photos and videos to be deleted.
3. Press the down arrow button ( ) and the deletion screen is displayed.

4. Press the up/down arrow buttons to select [Delete One] or [Exit] and press the button to confirm.

- Erased photos/video clips cannot be recovered.
- Please refer to page 76 for instructions on deleting more than one image at a time.
You can use this setting to view all of the stored pictures as a slideshow.

1. Press the button to enter playback screen.
2. Press the button to enter the slide option (except for video file).
3. Press the left/right buttons to select slideshow playing or [Cancel] to return to the playback screen.

4. Press the button to confirm the setting.

- Pictures scroll automatically during a slide show.
- Slide playing function supports movie playing.
Mode: \[ \text{PSAM} \] \[ \text{SCN} \]

1. In Photo Shooting Mode, press the button to enter the Photo Shooting Menu.

2. Press the up/down arrow buttons to select the Photo Shooting Menu to be set.

3. Press the left/right arrow buttons to select the Photo Shooting Menu to be set and press the button to confirm.

Refer to the following pages 55 to 58 for more details about each setting.

**Expo Metering (Exposure Metering)**

Use this setting to select the "target" size of the camera's field of view to be metered.

There are 3 options:

- AiAE (Artificial Intelligence AE): Automatically selects the central and peripheral metering, to calculate the reasonable value of metering by weighting.
- Spot: Metering targets a small area in the center of the camera's field of view.
- Center: Metering targets a slightly larger area in the center of the camera's field of view.
**Image Size**

The Size setting refers to the image resolution in pixels. A higher image resolution allows you to print that image in larger sizes without degrading the image photo quality.

The bigger the number of recorded pixels is, the better the image quality becomes. As the number of recorded pixels lessen, you will be able to record more images on a memory card.

**OIS (Optical Image Stabilization)**

This mode can help reduce photo blur caused by unintentional shaking or low light.

Use the Image Stabilization Mode in darker environments.

Shooting in a windy or unstable environment (such as a moving vehicle) may cause blurry images.
Continuous AF (Auto-Focus)
Use Continuous AF setting to be able to continuously focus automatically when taking pictures.

There are 2 options:
- Off
- On

HDR (High Dynamic Range)
Use this setting to control wide dynamic image range when taking static pictures. Photos with extreme contrast of bright and dark areas will still maintain distinguishable detail and depth. (Use of tripod is recommended)

There are 2 options:
- Off
- On

In the scenario with high light contrast (too dark or too light), this function can be used to shoot satisfactory photos.
Face Beautifier
Select the effect for Face Beautifier Mode.

Face Beautifier Mode has 3 effects:

• Effect 1: Skin Soften

• Effect 2: Skin Soften + Eye Brightening

• Effect 3: Skin Soften + Eye Brightening + Eye Enlargement

Scene
Select a scene mode under SCN Mode.

Press SET To Select Scene
• Shooting Menu in the Shooting Mode (O: Available  X: Unavailable)

Photo Shooting Setting Menu

Mode: 📸 P S A M ✡ SCN

1. Press the 📸 button in Photo Shooting Mode and press the up/down buttons to select 📸.

5. Press the up/down arrow buttons to select an option and press the SET button to confirm.

Quality
The Quality Setting can be used to adjust the image compression ratio.

There are three options for picture quality:

• Best (20M Average File Size: 5.0MB)
• Fine (20M Average File Size: 3.0MB)
• Normal (20M Average File Size: 2.6MB)
**AF Assist Beam (Auto-Focus Assist Beam)**
In a darker environment, the AF assist beam setting can be turned on for better focus.

**Digital Zoom**
Turn the Digital Zoom on or off.

**Date Imprint**
Include a Date/Time stamp on the photo image.

- Off
- Date
- Date / Time
Quick Review
This option allows quick review of the photos immediately after they are taken. Each photo is displayed on the LCD screen for the selected time.

There are 4 options:
- Off
- 1 sec
- 2 sec
- 3 sec

Custom Settings
Custom Settings stores the current photo shooting mode and its parameters. The stored mode and parameters are directly invoked in Custom Settings mode.

There are 2 options:
- No
- Yes
Face Detection
Detects and focuses on faces to make all faces as clear as possible in Photo Mode.

There are 2 options:

- Off
- On
Movie Menu

Mode:  

1. Turn the Mode dial, select the  mode and press the  button to enter the Movie Menu.

2. Press the up/down arrow buttons to select the Movie Menu to be set.

3. Press the left/right arrow buttons to select the Movie Menu to be set and press the  button to confirm.

Expo Metering (Exposure Metering)

Use this setting to select the "target" size of the camera's field of view to be metered.

There are 3 options:

- AiAE (Artificial Intelligence AE): Automatically selects the central and peripheral metering, to calculate the reasonable value of metering by weighting.
- Spot: Metering targets a small area in the center of the camera's field of view.
- Center: Metering targets a slightly larger area in the center of the camera's field of view.
Video Quality

Set the image resolution used during video recording.

![Image Resolution Options]

The speed requirements for reading and writing high resolution image pixel images to a memory card are as follows:

<table>
<thead>
<tr>
<th>No.</th>
<th>Image Pixels</th>
<th>Frames</th>
<th>Recommendation</th>
<th>Approximate Recording Time (4GB)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>1280 x 720 *</td>
<td>30</td>
<td>Class 6</td>
<td>57 Minutes</td>
</tr>
<tr>
<td>2</td>
<td>1280 x 720</td>
<td>15</td>
<td>Class 4</td>
<td>63 Minutes</td>
</tr>
<tr>
<td>3</td>
<td>640 x 480</td>
<td>30</td>
<td>Class 4</td>
<td>72 Minutes</td>
</tr>
</tbody>
</table>

* The longest recording time is 29 minutes at one time.

When recording in higher pixel resolutions for extended periods of time, this can cause the camera to generate heat. This is not a camera malfunction.

OIS (Optical Image Stabilization)

This mode can help reduce photo blur caused by unintentional shaking, low light or slow shutter speed.

![Image Stabilization Options]

Use the Image Stabilization Mode in darker environments.

Shooting in a windy or unstable environment (such as a moving vehicle) may cause blurry images.
Movie Setting Menu

Mode:  

1. Turn the Mode Dial and select  to enter the video recording screen.
2. Press the button and press the up/down arrow buttons to select . Press the button to enter the menu.

3. Press the up/down arrow buttons to select  and press the button or right arrow button to enter the menu.

4. Select the items to be set and press the button or the right arrow button to enter the menu.
5. Press the up/down arrow buttons to select an option and press the button to confirm.
Digital Zoom
Turn the Digital Zoom on or off.

Custom Settings
Custom settings stores the current movie shooting mode and its parameters. The stored mode and parameters are automatically used in Custom Settings Mode.
Playback Menu

Mode: 

1. Press the button to display the playback screen and press button to enter the menu.
2. Press the up/down arrow buttons to select the playback desired and press button to enter.
3. Press the left/right arrow buttons to select an option and press the button to confirm.

Photo

Video

Refer to the following pages 69 to 72 for more details about each setting.
Playback

1. Press the button, select the settings, and press the button to display the settings screen.
2. Press the left/right buttons to select from the following 2 functions:
   - Normal Mode: Display all images.
   - Date Mode: Arranged by date.
3. Press the button to confirm the setting.

The Date Folder is displayed in date order based on camera's Date/Time Settings.

HDR (High Dynamic Range)

With the HDR function, pictures that are overexposed may be corrected to optimize the highlights and lowlights captured to more accurately represent the actual scene.

1. In Playback Mode, press the left/right arrow buttons to select the photos to be edited.
2. Press the button, select the settings, and press the button to display the settings screen.
3. Press the left/right buttons to select whether HDR is used.
4. After using the HDR function, the image will be saved as a new file and the original file is still stored in the memory.

**Touch-Up**

1. In Playback Mode, press the left /right arrow buttons to select the photos to be edited.

2. Press the button, select the settings, and press the button to display the settings screen.

3. Press the left/right buttons to select Touch-up or [Cancel] to return to the playback Screen.

- : HDR
- : Cancel

- : Red-Eye Reduction
- : Skin Soften
- : Eye Brightening
- : Eye Enlargement
- : Cancel
4. Press the **SET** button to confirm the setting.

The Touch-Up referred to is the individual use of three effects. Beauty Mode allows you to select one, two or all three of the effects combined.

### Rotate

You can use this setting to change the orientation of the picture.

1. In Playback Mode, press the left /right arrow button to select the photos to be edited.

2. Press the **button, select the ** button, and press the ** button to display the settings screen.

3. Press the left/right buttons to select the rotation direction or [Cancel] to return to the playback Screen.

- **: Turn Right
- **: Turn Left
- **: Cancel
Resize

This setting allows you to resize a picture to a particular resolution and saves it as a new picture.

1. In Playback Mode, press the left/right arrow buttons to select the photos to be edited.

2. Press the button, select the settings and press the button to display the settings screen.

3. Press the left/right arrow buttons to select [1024 X 768] or [640 X 480] or select [Cancel] to return to the playback Screen.

4. Press the button to confirm the setting.

Videos and panoramic pictures cannot be rotated.

The rotated picture file will replace the original photo.
“i” Button Playback Function

This setting allows you to change the picture color effect. The file is saved as a new photo and stored in memory together with the original photo.

1. In Playback Mode, press the left /right arrow buttons to select the photos to be edited.

2. Press the button to select the Image Color Setting Menu.

3. Press the left/right buttons to select the corresponding menu or [Cancel] to return to the playback Screen.

4. Press the button to confirm the setting.

There are 8 options:
- Cancel
- Vivid
- Sepia
- Black and White
- Grainy
- Vignetting
- Salon
- Dreamy
Mode:  

1. Press the  button to show the playback screen, press the  button, and press the up/down buttons to select  .
2. Press the  button to enter the menu.
3. Press the up/down arrow buttons to select  , and press the  button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select the item to be set and press the  button or right arrow button to enter the menu.
5. Press the up/down arrow buttons to select an option and press the  button to confirm.

Refer to the following pages 75 to 77 for more details about each setting.
**Protect**

To prevent any pictures or videos from being accidentally erased, use this setting to lock one or all of the files.

There are 4 sub menus available:

- **One:** Lock the selected photo or video if they are unprotected; unlock the selected photo or video if they are protected.
- **Date Folder:** Protect all photos in the Date Folder.
- **All:** Lock all photos or videos.
- **Reset:** Cancel all locked photos or videos.

To lock or unlock the photo and video files:

1. Press the up/down arrow buttons to select [Protect] and press the set button or right arrow button to enter the sub-menu.

2. Press the up/down arrow buttons to select the sub-menu and press the set button or right arrow button to show the settings screen.

3. Press the up/down arrow buttons to select an option and press the set button to confirm.
Delete
You can delete one or all photo/video files.

To delete photo or video files:
1. Press the up/down arrow buttons to select [Delete] and press the SET button or right arrow button to enter the submenu.
2. Press the up/down arrow buttons to select the submenu and press the SET button or right arrow button to show the settings screen.

There are 3 sub menus available:
• One: Delete one photo or video.
• Date Folder: Delete all photos in the Date Folder.
• All: Delete all photos or videos.
3. Press the up/down arrow buttons to select an option and press the SET button to confirm.

The “GMT” indicator means a file is protected. File protection must be removed before a file can be deleted.

Deleting files will cause DPOF (Digital Print Order Format) settings to be reset.

When a single photo is protected in the date folder, the protected photo will be kept and other photos will be deleted.

Deleted files will be permanently deleted and will not be able to be recovered or restored.
DPOF (Digital Print Order Format)

The DPOF feature allows you to compile and select a group of pictures that you would like to print and will save your selection on the memory card so that you can use the SD memory card to print without having to individually specify the photos you want to print.

The printer that supports DPOF is needed for photo printing.

Trim

The Trim Setting allows you to crop photos and save them as new pictures.

1. Press the up/down arrow buttons to select [Trim] and press the SET button or right arrow button to enter the menu.

2. Select [Yes] to confirm trim. Select a section of the photo to be trimmed using the Zoom Lever and arrow buttons to trim a photo.

3. Press the SET button and the [Save change?] prompt appears. Select [✓] to change and save the picture. Select [✗] to cancel changes and return to the trim prompt screen.

The image cannot be clipped/trimmed again once it has been clipped to 640 X 480.
Setup Menu

Mode: 📸 P S A M 📻 SCN 📡 📡 📡

1. Press the 📸 button in any mode and press the up/down buttons to select 📻.
2. Press the SET button to enter the menu.
3. Press the up/down arrow buttons to select 📻 and press the SET button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select the item to be set and press the SET button or right arrow button to enter the menu.
5. Press the up/down arrow buttons to select an option and press the SET button to confirm.

Refer to the following pages 79 to 80 for more details about each setting.
Sound Settings

To change this setting:
1. Select [Sound Settings] in the basic settings menu. Press the \[\text{SET}\] button or right arrow button to enter the menu.
2. Press the left/right arrow buttons to select an option.
3. Press the \[\text{SET}\] button to confirm.

Power Saver

This setting allows you to save power and get the maximum possible running time for your camera's batteries. Follow the steps below to turn the LCD screen and camera off automatically after a consecutive period of inactivity.
1. Select [Power Saver] in the basic settings menu. Press the \[\text{SET}\] button or right arrow button to enter the menu.
2. Press the up/down arrow buttons to select an option.
3. Press the \[\text{SET}\] button to confirm.

<table>

</tbody>
</table>
Language
Refer to the “Resetting your language” section on page 20.

World Time
The Zone setting is a useful function for your overseas trips. This feature enables you to display the local time on the LCD screen while you are abroad.

2. Press the up/down to select the departure place (🏠) and destination (🌐) fields.
3. Press the left/right arrow buttons to select a city located in the same time zone as that of the field. Press the SET button to confirm settings.

Date/Time
Refer to the “Resetting Date/Time” section on page 21.

LCD Brightness
Use this setting to adjust the brightness of your LCD screen.

1. Select [LCD Brightness] in the basic settings menu. Press the SET button or right arrow button to enter the menu.
2. Press the up/down arrow buttons to select an option.
3. Press the SET button to confirm.
**Format Memory**

Please Note: formatting enables you to delete all contents on a memory card and camera’s built-in memory, including protected photo and movie files. To use this setting:

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.

2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.

3. Press the up/down arrow buttons to select [Format] and press the button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

5. If you select [Yes] the camera formats its memory.

If there is no memory card in the camera, the built-in memory will be formatted; if there is a memory card installed, only the memory card will be formatted.
Copy to Card

Use this setting to copy the files stored in the internal memory to an SD memory card.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Copy to Card] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

File Numbering

After you take a picture or video clip, the camera will save it with a sequential number. You can use this to reset the file numbering to 1.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [File Numbering] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

If there is no card available in the camera, this function will not be displayed.
**Reset**

Use this setting to restore the camera to its original default settings.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Reset] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

**Firmware (FW) Version**

Use this setting to view the current camera firmware version.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [FW Version] and press the button or right arrow button to enter the menu.
4. When there is a new firmware version in the SD card, select [Yes] to update.
**Items**

2. Press the up/down arrow buttons to select [PC] and press the "Set" button to confirm.

**DIAGRAM**

**Step 2**
Transferring Files to Your Computer

The computer will automatically detect the camera as a removable drive. Double-click the My Computer icon on the desktop to locate the removable drive and to copy folders and files in the drive to a directory on your PC as you would copy any typical folder or file.

Follow the steps below to connect the camera to a computer:

1. Make sure the computer is turned on.
2. Connect one end of the supplied Micro USB cable to the USB OUT port on your camera.
3. Connect the other end of the cable to an available USB port on your computer.
4. After the transmission is complete, disconnect the micro USB cable according to your computer manufacturer's instructions specifying how to safely remove USB devices.
Video System

You can use the AV cable (which should be purchased separately) to connect the camera and the television for setting up the video output. Connect one end of the AV cable to AV port of the camera and connect the other end to AV-OUT port of the television. To adjust the format of the video output system according to your requirements:

1. Press the \[ \text{ } \] button, press the up/down arrow buttons to select \[ \text{ } \] and press the \[ \text{ } \] button to enter the menu.

2. Press the up/down arrow buttons to select \[ \text{ } \] and press the \[ \text{ } \] button or right arrow button to enter the menu.

3. Press the up/down arrow buttons to select [TV-System] and press the \[ \text{ } \] button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select [NTSC] or [PAL] and press the \[ \text{ } \] button to confirm.

The video output system changes based on the selected language.

**NTSC:** English, Chinese (Traditional), Japanese, French, Korean, Russian, Vietnamese, Greek, Hungarian

**PAL:** German, Spanish, Italian, Chinese (Simplified), Portuguese, Swedish, Danish, Finnish, Indonesia, Norwegian, Dutch, Turkish, Polish, Thai, Croatian, Czech, Arabic, Hindi
Set Eye-Fi Card Connection Mode

This camera supports wireless connection for Eye-Fi cards. Enable the Eye-Fi connection by following the steps below:

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Eye-Fi] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [On] or [Off] and press the button to confirm.

If the Eye-Fi card is not available in the camera, this feature is not displayed.
Supported HDMI Connections

HDMI (High Definition Multimedia Interface), is a fully digital audio/video transmission interface, through which uncompressed audio and video signals are transmitted.

Direct transmission of digital video signals to your TV reduces conversion loss and improves image quality.

Connecting HDMI-Ready TV

1. Use a cable with a high resolution output terminal (which should be purchased separately) to connect the camera to the television which meets HDMI standards.

2. The camera will be automatically detected by the TV.

3. After connecting via HDMI, the camera enters Playback Mode.

Make sure the camera and the TV are both turned on before connecting.

Refer to your TV instruction manual for information on what resolution sizes it will support. The resolution and output formats that are not supported will be grayed out on the camera's LCD screen.
Connecting to a PICTBRIDGE™ Compatible Printer

PICTBRIDGE™ technology allows printing of photos saved on the memory card by a PICTBRIDGE™ compatible printer.

To find out if a printer is PICTBRIDGE™ compatible, simply look for the PICTBRIDGE™ logo on the packaging or check the owner’s manual for specifications. With the PICTBRIDGE™ function on your camera, you can print captured photos directly to a PICTBRIDGE™ compatible printer using the micro USB cable, without the need for a PC.

Setting the USB Mode

The camera’s USB port can be set to connect with either a PC or a Printer, the following steps will ensure that the camera is correctly configured to connect with a Printer.

1. Press the button and press the up/down arrow buttons to select . Press the button to enter the menu.

2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.

3. Press the up/down arrow buttons to select [USB] and press the button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select [Printer] and press the button to confirm.

After the camera is reset, it will switch to PC mode automatically from USB mode.

See “Using the PICTBRIDGE™ Menu” section on page 91.
Connecting to Your Printer

1. Make sure the printer is turned on.
2. Connect one end of the supplied Micro USB cable to the USB port on your camera.
3. Connect the other end of the cable to the USB port on the printer.

If the camera is not connected to a PICTBRIDGE™ compatible printer, the following error message will appear on the LCD screen.

The error message above will also appear if the USB mode is set incorrectly, in which case you should disconnect the Micro USB cable, check the USB mode settings, ensure that the Printer is turned on, and then try connecting the Micro USB cable again.
After setting the USB mode to Printer, the PICTBRIDGE™ Menu will appear.

Press the up/down arrow buttons to select a menu item and press the SET button or right arrow button to enter the item.

Refer to the following sections for more detailed information on each setting.

**Print (with Date)**

If you have set the date and time on your camera, the date and time will be recorded and saved with each photo you take.

1. In the PICTBRIDGE™ menu, select [Print (with Date)] and the screen as shown below appears.

2. Press the left/right arrow buttons to select a photo to be printed.
3. Press the up/down arrow buttons to select the number of copies for the currently displayed photo.

4. Press the SET button and the following screen will appear.

5. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.

**Print (without Date)**

Use this setting to print the photos without dates on them.

1. In the PICTBRIDGE™ menu, select [Print (without Date)] and the screen as shown below appears.

2. Press the left/right arrow buttons to select a photo to be printed.

3. Press the up/down arrow buttons to select the number of copies for the currently displayed photo.

4. Press the SET button and the following screen will appear.
5. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.

2. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.

Print Index
You can print all photos in the camera via this function.

1. In the PICTBRIDGE™ menu, select [Print Index] and the screen as shown below appears.
Print DPOF Images

To use DPOF printing, you must select your photos for printing using the DPOF settings beforehand. See “DPOF” section on page 77.

1. In the PICTBRIDGE™ menu, select [Print DPOF Images] and the screen as shown below appears.

2. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.

Exit

Select [Exit] to exit the PICTBRIDGE™ menu. At this time, the message [Remove USB cable!] will appear on the screen.

Disconnect the Micro USB cable from the camera and printer.
