Declaration of Conformity
Responsible Party: JK Imaging Ltd.
Address: JK Imaging Ltd., 17239 So. Main Street, Gardena, CA 90248 USA
Company Website: kodakpixpro.com

INDUSTRY CANADA
This device complies with Canadian RSS-210.
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Radiation Exposure Statement:
This product complies with the Canadian portable RF exposure limit set forth for an uncontrolled environment and is safe for intended operation as described in this manual. Additional RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.
For Customers in Europe

This symbol [crossed-out wheel bin WEEE Annex IV] indicates separate collection of electrical waste and electronic equipment in the European countries. Please do not throw the equipment into domestic refuse. Please use the return and collection systems available in your country for proper, safe disposal of this product.

“CE” mark indicates that this product complies with the European requirements for safety, health, environment and customer protection. “CE” marked cameras are intended for sales in Europe.

Europe – EU Declaration of Conformity
This device complies with the essential requirements of the R&TTE Directive 2014/53/EU. The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the R&TTE Directive 2014/53/EU:
Safety of Information Technology Equipment
- EN 50566: 2013
Product standard to demonstrate compliance of radio frequency fields from handheld and body-mounted wireless communication devices used by the general public (30 MHz — 6 GHz)
- EN 62209-2: 2010
Human exposure to radio frequency fields from handheld and body-mounted wireless communication devices — Human models, instrumentation, and procedures
Part 2: Procedure to determine the specific absorption rate (SAR) for wireless communication devices used in close proximity to the human body (frequency range of 30 MHz to 6 GHz)
Hereby, Sintai Optical (Shenzhen) Co., Ltd, declares that this PIXPRO AZ652 is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

Manufacturer: Sintai Optical (Shenzhen) Co., Ltd
Address: Qiwei Ind Sec, 1st, 2nd,& 3RD Bldg, Lisonglang Village, Gongming Town, Bao’an District, Shenzhen, Guangdong, China

Batteries: Please dispose of used batteries at designated collection centers.
Packaging: Please follow local regulations for the recycling of packaging.

For Customers in the U.S.A.
Federal Communication Commission Interference Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

**Radiation Exposure Statement:**

This product complies with the FCC portable RF exposure limit set forth for an uncontrolled environment and is safe for intended operation as described in this manual. Additional RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.
About this Manual

Thank you for purchasing this KODAK PIXPRO Digital Camera. Please read this manual carefully and keep it in a safe place for future reference.

- JK Imaging Ltd. reserves all rights of this document. No part of this published manual may be reproduced, transmitted, transcribed, stored in a retrieval system or translated into any language or computer language, in any form, by any means, without the prior written permission of JK Imaging Ltd.

- All trademarks mentioned in this manual are used for identification purposes only and are properties of their respective owners and holders.

- This manual provides you with instructions on how to use your new KODAK PIXPRO Digital Camera. Every effort has been made to ensure that the contents of this manual are accurate; however JK Imaging reserves the right to make changes without notice.

- Throughout this manual, the following symbols are used to help you locate information quickly and easily:

  - Indicates useful information.

- The following symbols may be used throughout this manual to facilitate your understanding of how to operate the camera:

  - [Item properties] : The optional properties in the camera interface are indicated by the [ ] symbol.
SAFETY NOTES

Safety Notes for this Camera

- Do not drop the camera or allow it to hit solid objects.
- Do not attempt to disassemble or repair the camera.
- Do not use or store the camera in dusty places or on a beach to help prevent dust or sand from entering the camera, causing possible damage.
- Do not use or store the camera in a hot environment or in direct sunlight.
- Do not use or store the camera near powerful magnetic fields, such as a magnet or transformer.
- Avoid touching the lens of the camera.
- Do not expose the camera to direct sunlight for a long period of time.
- To prevent the camera from being damaged by moisture, do not use or store the camera in very humid environments, such as in rain or near bodies of water.
- If water accidentally comes in contact with the camera, turn the camera off immediately, remove the battery and the memory card and dry it completely within 24 hours.
- When you take the camera from a cold environment to a warmer environment, condensation may occur. Please wait for a reasonable period of time before you turn the camera on.
- Before you remove the battery and memory card, the camera should be turned off.
- When you clean the body of the camera, do not use abrasive, alcohol-based or organic cleansers or solvents.
- Use a professional lens cleaning cloth and appropriate cleaner to wipe and clean the lens.
- Download your photos and remove the memory card when you are going to store the camera for long periods of time.
- If this camera is not in use for a long period of time, please keep it in a dry and clean storage location.
- Our company will not pay compensation for any failure of playback including: pictures or videos damaged or unrecoverable by improper operation.
Safety Notes for Battery

Please use a battery that is the same type as the one included.

Please use the attached charger to charge the battery.

If battery fluid leaks inside the camera, contact our customer service department immediately. If battery fluid leaks onto your skin, rinse your skin immediately with clean water and seek immediate medical attention.

Disposal of used batteries should be carried out in accordance with your local (national or regional) regulations.

To prevent the battery from being damaged, do not drop the battery or allow it to hit solid objects or to be scratched by foreign objects.

Do not let the battery come in contact with metal objects (including coins) to avoid short circuiting, discharging, excessive heat or possible leakage.

Do not attempt to disassemble the battery.

Do not expose the battery to water. Always keep the battery contacts dry.

Do not heat the battery or throw it into a fire to avoid a possible explosion.

Do not store the battery in a hot environment or in direct sunlight.

If the battery overheats during charging or use, stop charging or use immediately. Turn off the product, remove the battery carefully, and wait until it cools down.

When the camera is stored for a long period of time, remove the battery and keep it in a safe, dry place that is not accessible to infants and children.

In colder environments, the performance of the battery could be noticeably reduced.

When you install the battery, align the battery markings according to the positive and negative markings inside the camera battery compartment. Never force the battery into the battery compartment.
**Safety Notes for Memory Card**

- We highly suggest buying only well-known, name brand memory cards to ensure peak performance and reliability.
- Format the memory card using the camera before you use it or insert a new one.
- Do not drop the memory card or allow it to hit solid objects to avoid damaging it.
- Do not attempt to disassemble or repair the memory card.
- Do not expose the memory card to water. Always keep it dry.
- Do not remove the memory card when the camera is turned on. Otherwise, the memory card and photo/video files could be permanently damaged.
- Do not directly edit the data on the memory card. Copy the data to your computer before you edit files.
- When the camera is stored for long periods of time, be sure to download your photos and remove the memory card. Store the memory card in a dry environment.

- Do not modify the name of the files or folders of the memory card using your computer. Modifying the file names may cause the files to not be recognized on the camera or a possible permanent error may occur.
- A photo taken with the camera will be stored in the folder that is automatically generated on the memory card. Do not store photos that are not taken using this camera in these folders as the pictures cannot be recognized during playback.
- When you insert the memory card, make sure the notch of the card matches the markings on the top of the camera card slot.
Other Safety Notes

- Do not disconnect the power or turn the camera off during the update process. Doing so may cause incorrect data to be written and the camera may not power on later.

- Do not hang the neck strap of the camera around the neck of a child.

- When using your camera on an airplane, observe the relevant rules specified by the airline and FAA regulations.

- Due to the limitations of manufacturing technology, the LCD may have a few dead or bright pixels. These pixels do no effect the quality or performance of the camera, photos or video.

- Do not expose the camera’s LCD to water. In a humid environment, only wipe it with a soft, dry, cleaning cloth.

- If the LCD is damaged and the liquid crystal comes into contact with your skin, wipe your skin with a dry cloth immediately and rinse it with clean water. If liquid crystal comes into contact with your eyes, wash them with clean water at least for 15 minutes and seek immediate medical attention. If you accidentally swallow liquid crystal, rinse your mouth immediately and seek medical attention.

GETTING READY

Accessories Included

Your camera box should contain the camera model you purchased along with the following accessories. If anything is missing or appears to be damaged, please contact your retailer first or our customer service center (Based on sales in different countries or regions, the shape of the AC adapter will vary. Please subject to the actual product will prevail.)

- Rechargeable Li-ion Battery
- AC Adapter
- Micro USB Cable
- Neck Strap
- Lens Cap With Strap
- Quick Start Guide
- Warranty Card
- Service Card
- CD-ROM
Installing Lens Cap and Neck Strap

1. Attach the lens cap to the lens.
2. Hook the neck strap to the lens cap.
3. Adjust the strap to fit.
4. Secure the strap to prevent it from falling off.
5. Check the fit and adjust as necessary.
1. Micro HDMI Port
2. Micro USB Port
3. Zoom Lever
4. Shutter Button
5. Strap Eyelet
6. Exposure Compensation Button
7. Continuous Shot Button
8. Power Button
9. AF Assist Beam/Self-Timer Lamp
10. Flash Lamp
11. Lens
12. Microphone
13. Electronic View Finder (EVF)
14. EVF / LCD Switch Button
15. Indicator Lamp
16. Mode Dial
17. Fast Video Recording Button
18. Menu Button
19. Jog Dial
  [ ▲ AF ] AF Button/Up Button
  [ ▼ Delete Button/Self-Timer
    Button/Down Button
  [ ▼ Macro Button/Left Button
  [ ► Flash Button/Right Button
20. Display Button
21. Playback Button
22. SET Button
23. “i” Button

Rolling the jog dial can be for fast selection instead of pressing the up/down/left/right button.
24. Vari-angle LCD
25. Diopter Adjustment Knob
26. Speaker
27. Lens Function Ring Lever
28. Lens Function Ring

29. Battery Cover
30. Tripod Socket
Installing Battery and Memory Card

1. Open the battery cover door.

2. Insert the battery into the battery compartment according to the negative and positive directions as illustrated in the picture. Push the battery down until it locks in place.

Battery Lock Knob
A standard SD memory card is not included in the camera packaging and needs to be purchased separately. This camera takes a standard (SD/SDHC) memory card. We recommend using a name brand memory card that is Class 4 or higher and has a capacity of 4GB to 32GB. The camera is not compatible with Micro SD, Ultra, Ultra Plus, Extreme, XC, or adapters for any of these other memory cards.

To remove your memory card, open the battery cover door, gently press the memory card to eject it and remove it carefully.
Before you charge the battery, you should turn the camera off and insert the battery.

1. Connect the camera to the power charger using the supplied Micro USB cable.

2. Insert the plug of the power charger into the power outlet to charge the battery.

After the battery is stored for long periods of time, use the supplied power charger to charge the battery prior to use.

Charging indicator:
Steady orange: Charging
Steady green: Charging complete

To maximize battery life, charge the battery for at least 4 hours the first time.

Please charge the battery indoors between 0°C and 40°C (32°F and 104°F).
The LCD is housed in the camera’s body. You may follow the directions shown below to move it as needed:

1. Open the LCD panel along the direction shown by arrow ①.
2. Rotate up to 180° along the direction shown by arrow ②.
3. Rotate up to 90° along the direction shown by arrow ③.
4. Close the LCD along the direction shown by arrow ④.

Please don’t rotate the LCD with excessive force to prevent damages.

Please close the LCD along the direction shown by arrow ④ after use to protect it from scratches.
Turning Camera On and Off

Press the Power button to turn the camera on. To turn the camera off, press the Power button again.

When the power is off, press and hold the playback button to power on and enter Playback mode.
Set your Language, Date/Time after the First Power-On

1. When you turn the camera on for the first time, the language selection screen appears.
2. Press the [▲AF]/[▼++]=button to select your desired language.
3. After you press the button to confirm your language selection, the Date/Time settings screen will appear.
4. Press the [◀▲]/[▶▼] button to select the Date/Time to be adjusted: Time is displayed in YYYY.MM.DD/ HH:MM.
5. Press the [▲AF]/[▼++]=button to adjust the value for the desired Date/Time.
6. Press the button to confirm the time settings and the shooting screen will appear.
Resetting your Language

After you set your language for the first time, follow the instructions below to reset your language.

1. Press the button, press the [ ▲ AF ] /[ ▼ AF ] button to select and press the button to enter the menu.
2. Press the /[ ] button to select .
3. Press the [ ▲ AF ]/[ ▼ AF ] button to select [Language] and press the button to enter the menu.
4. Press the [ ▲ AF ]/[ ▼ AF ] button to select your desired language and press the button to confirm.
5. Press the button and the shooting screen will appear.
Resetting Date/Time

After you set your Date/Time for the first time, follow the instructions below to reset date and time.

1. Press the 開/切 button, press the [▲ AF ]/[▼ ▲] button to select 開/切, and press the SET button to enter the menu.
2. Press the [◄ ▲]/[► ◄] button to select 開/切.
3. Press the [▲ AF ]/[▼ ▲] button to select [Date & Time] and press the SET button to enter the menu.
4. Press the [◄ ▲]/[► ◄] button to select the Date/Time to be adjusted: Time is displayed in YYYY.MM.DD/ HH:MM.
5. Press the [▲ AF ]/[▼ ▲] button to press the value for your selected entry. After you finish your settings, press the SET button to confirm.
6. Press the 開/切 button and the shooting screen will appear.

How to Take Pictures

1. Hold the camera with both hands, being careful to not block the flash and lens with fingers.

2. Point the lens toward the object you want to take a picture of, and then frame it with the LCD.

3. Use the Zoom button to select Tele or Wide positions to zoom in or out on your subject.

4. Press the shutter button halfway to focus on the subject. When the focus frame turns green, press the shutter button down completely to take the picture.
Using the Mode Dial

This camera provides a convenient Mode dial that allows you to manually switch between different modes with ease. The available modes are listed below:

<table>
<thead>
<tr>
<th>Mode Name</th>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

1. Turn the mode dial to select the **PSAM** mode you want.
2. Press the button to configure settings.
3. Press the [ ]/[ ] button to select an adjustment setting.
4. Press the [ ]/[ ] button to adjust the parameters.
5. Press the button to confirm the settings and enter the shooting screen.

Please note that even if an option is not able to be adjusted in a particular mode, its value will still be displayed on the shooting screen.
Face Beautifier

1. Turn the Mode dial to select Face Beautifier Mode (_heads 

2. Press the button and press the [ ▲ AF ]/[ ▼ T ] button to select_heads 

3. Press the [◄ H ]/[ ▶ T ] button or turn the jog dial to select an option and press the button to confirm and enter the shooting screen.

- Heads Effect 1: Skin Soften
- Heads Effect 2: Skin Soften + Eye Brightening
- Heads Effect 3: Skin Soften + Eye Brightening + Eye Enlargement
**Wi-Fi Mode**

Enable image transmission and remote control by connecting smart device with Wi-Fi.

Before utilizing Wi-Fi Mode, please review the following:

- Your smart device operating system version needs to be iOS 8 or higher, or ANDROID 4.2 or higher. If not, please upgrade your smart device before using the APP.
- Please do not use in places that have a high intensity magnetic field, electrostatic and electric wave interference (for example near a microwave oven), which may cause failure in receiving signals.
- To maintain a connection, please keep the camera within 10 meters (32.8 feet) without signal shielding interference.
- Please do not use Wi-Fi connection functionality on a plane.
- The camera and the smart device can only be connected one to one.

**Downloading the APP package:**

Download a dedicated installation package from the application store (APP name: PIXPRO Remote Viewer) and then install it.

- **ANDROID devices** : Search and download the APP “PIXPRO Remote Viewer” in Google play, and install it following the instructions on the interface.

- **iOS devices** : Search and download the APP “PIXPRO Remote Viewer” in APP store, and install it following the instructions on the interface.
1. Rotate the mode dial to Wi-Fi and then enter the Wi-Fi selection interface.

2. Press the [ ] button to select and set options.

**AP Mode**

This camera may connect with your smart device through Wi-Fi.

**Settings of Camera:**

1. Select Wi-Fi and press the button to enter the setting interface.

2. Press the [ ] button to select options to be adjusted, and press the button to enter the option setting interface.

- **[Settings]**: Customize the Wi-Fi settings for the camera system.

- **[Station]**: Use the Station Mode to connect to a “Personal Hotspot” created by your mobile device.

- **[AP Mode]**: In AP mode, the camera will act as an access point enabling another Wi-Fi device to connect to it.

- Refresh: Create a new WPA2 PSK password.
- Back: Back to previous page.

Rotate the mode dial to disconnect.
Settings of Smart Device:
1. Enable the Wi-Fi of smart device and then search surrounding wireless devices.
2. Select the name of camera SSID to be connected and then input the eight-digit number password after WPA2-PSK on the camera.
3. Click the icon of the APP to enable the APP.

Set up completion:
Once the APP is connected to the camera, functional operations can be enabled on the smart device.

Station
Enable image transmission and remote control by connecting the camera with a Wi-Fi access point created by your smart device.
1. Enable the Wi-Fi access point of smart device.
2. Select the camera on camera and then press the SET button to confirm connection with smart device.
3. Press the [▲AF]/[▼ †] button to select the name of smart device to be connected and then press the SET button to confirm. Then, the camera enters the password input interface.
Press the [ ◀️▶️ ]/[ ▶️ ‾ ] button to select:

- **Scan**: Search again surrounding wireless devices.
- **▶️** : Select the name of device to be connected.
- **Back**: Back to Wi-Fi mode select screen.

4. Press the [ ▲ AF ]/[ ▼ ▶️ ‾ ]/ [ ◀️▶️ ]/ [ ▶️ ‾ ] button or turn the ‼ jog dial to select and then press the set button to confirm your selection. You will enter the completion of WPA2- PSK after the password is saved.

- Europe
  - [QR Code Link]
Scene Mode **SCN**

You can select an appropriate mode from the 14 scene modes according to the type of environment you are shooting in. The camera then automatically configures the most appropriate settings for the best possible photos.

1. Rotate the Mode dial to **SCN**, then the LCD will display as below:

2. Press the [◄] /[►] button to select a scene, and press the **SET** button to confirm.
3. If any need of changing the scene, please press the **SET** button and then the **SET** button and finally the [◄]/[►] button to reselect the scene.
<table>

<td>Most suitable for capturing people with focus on their faces.</td>
</tr>
<tr>
<td><strong>Night Portrait</strong></td>
<td>When you take portraits at night or in low light conditions, automatically adjusts the exposure for people and night scenes.</td>
</tr>
</tbody>
</table>
Panorama Mode

This feature allows you to capture a panoramic view that will have significantly more content than a single photograph. Follow the arrow while keeping the camera steady to seamlessly shoot an ultra-wide scene of up to 360 degrees.

Follow the steps below:

1. Select the Panorama Mode ( ) and then press the button to confirm.

2. Press the [ ▲ AF ]/[ ▼ AF ]/[ ◄ AF ]/ [ ► AF ] button to select a shooting direction. (Should you not select a direction, the default shooting direction is “right”.) 2 seconds later, the camera will be ready to take pictures. You can also press the SET button or press the shutter button halfway down to be ready to take pictures.

3. Compose your shot on the LCD and half press the shutter button to focus on the subject. After focusing, fully press the shutter button down to take the first picture. At this time, the process dialog of panorama mode stitching appears on the screen.

4. Pan the camera according to the set direction. When the range of motion does not exceed the range that the camera can detect, the progress bar behind the arrow partially turns red. When it completely turns red, panorama mode shooting is finished.

Panoramic image can be played back by the method of flash playing. Please see the animation panoramic playback on page 75.

In Panorama Mode, the Flash, Self-Timer, Macro Modes and Exposure Compensation are not available. Focus adjustment is also not available at this time.
During panorama mode shooting, press the \text{\textit{SET}} button to interrupt shooting and save the current pictures taken. Press the [ ▼ † ‡ ] button to cancel shooting and not to save the previously taken pictures.

During panorama mode shooting, when the moving direction of the camera is wrong or the angle deviates from the internal settings, the LCD shows a warning message [Improper alignment. Please try again.] and the current pictures taken are saved.

**Multi Exposure**

Suitable for shooting moving objects (as many as 6) in the same background.

Keep camera steady before shooting. Press and hold the shutter button to take 6 photos continuously when it will stop automatically. To stop shooting, release the shutter button in the midway.

Objects shall be moved only from left to the right in order to be recorded. Objects moving from other directions would not be recorded.

Shooting effect will be influenced if object is moving too fast or too close.

**Cat/Dog**

1. It defaults to enabling the auto shoot after entering the Cat/Dog mode. When a face of cat or dog is detected, the camera will take photos automatically. Meanwhile, you also may press down the shutter button to shoot.
2. Press the [ ▼ † ‡ ] button to enter Auto Shoot menu. If this function is disabled, you may only take photos manually.

At most, 10 cat /dog faces can be detected at one time.
Functions that can be adjusted in each scene are as below:

<table>
<thead>
<tr>
<th>Scene</th>

</tr>
</tbody>
</table>

*¹ Means the flash as an option of Night Landscape mode in Auto Scene is non-adjustable.
*² Means Self-Timer smile is not included in the Self-Timer.

For continuous shot, there are only [Continuous Shot] and [Time-Lapse] for selection.
Custom Settings (CS)

The user can store frequently used shooting modes; and parameters and switch to this mode for a quick adjustment. Settings under CS mode (unset state or state after reset):

1. Turn the Mode dial to select the CS mode, and enter the setup screen, as shown in the figure below:

   ![Select one capture mode to define CS.](image)

   - Auto Mode
     - SET: Confirm
     - Exit

2. As shown in the figure above, press the [ ⪼ ]/[ ⪼ ] button to select a capture mode that you want to define as CS, and press the SET button to enter the shooting screen.

3. As shown in the figure, press the button, and choose whether to continue the CS mode setting or rotate the Mode dial to skip.

For setting under other modes (use this method to select a different custom setting):

1. Select any mode to be stored.
2. Set your desired parameters in the current mode.
3. Press the button, press the [ ▲ AF ]/[ ▼ ] button to select [ ], and press the SET button to enter the menu.
4. Press the [ ⪼ ]/[ ⪼ ] button to select [ ].
5. Press the [▼ ▲ ] button select [Custom Settings] and press the SET button to enter the menu.

![Menu Screen]

6. Select [Yes] to save or [No] to cancel.

7. Turn the mode dial to switch to the custom settings (CS).

8. The photo settings you stored the last time are used.

- When the CS mode is used for the first time, there is no preset parameter stored in the CS mode.

- If you want to remove the parameter setting of [Custom Settings], please see the reset function on page 107 to operate.
3. When the screen display is not clear, rotate the dioptric adjustment knob to adjust the screen sharpness.

4. Press the button again or restart the camera to switch back to the LCD display.

The bending of light that takes place in a lens is referred to as refraction. The strength of refraction is measured in diopters.

Diopter adjustment is aimed to help nearsighted (-300 or less) or farsighted (+100) individuals see clearly through the viewfinder (EVF).

Follow the steps below:

1. Turn the camera on and press the button to switch to the EVF display. At this time, the LCD will become black.

2. View the scenes and objects through the EVF.
Your camera is equipped with two types of zoom functions: Optical Zoom and Digital Zoom. Toggle the Zoom Lever of the camera to zoom in or out on the subject while taking pictures.

When the Optical Zoom reaches the threshold as Digital Zoom, release and turn the Zoom lever to T to switch between the Optical Zoom and Digital Zoom.

AF Area

In different photo shooting modes, you can select different focus methods. (Adjustable in P S A M mode)

1. Press the [ ▲ AF ] button to display the settings screen.

2. Press the [ ◄ / ◄ Af ] /[ ► / ◄ ] button to select the following 4 modes:
   - Center-AF
     The focus frame appears on the center of the LCD to focus on the subject.
   - Multi-AF
     The camera automatically focuses the subject in a wide area to find the focus point.
   - Spot Focus
     Choose the single-point focus position within the scope of focus.
   - Object Tracking:
     Smart tracking of the object in motion under the focusing shooting.

3. Press the [ SET ] button to confirm the settings and enter the shooting screen.

After enabling spot focus, turn the jog dial to adjust the position of focus point in the screen.

Object Tracking cannot be enabled until the camera is focused. For tracking the focus, you need to keep the shutter semi-pressed.
Macro Mode

The Macro Setting is ideal for shooting small objects or close-up photos. This mode allows you to focus on subjects very close to the camera.

1. Press the [ ] button to enter the Macro Menu.

2. Press the [ ]/[ ] button to select the following 2 modes:
   - Macro On
     Select this option to focus on the object closer to the lens (At the W side, the shooting distance should be more than 1 cm).
   - Macro Off
     Select this option to disable Macro.

3. Press the [ ] button to confirm the settings and enter the shooting screen.
Self-Timer Mode

Using this function to take pictures at pre-set intervals. The camera can be set to shoot after 2 seconds, 10 seconds after pressing the shutter or when a smile is detected.

1. Press the [ ▼  ♂ ♂ ] button to enter the Self-Timer menu.

2. Press the [  ◀️ ♂ ]/[  ▶️ ♂ ] button to select the following 4 modes:
   - Self-Timer 2 sec
     A single picture is shot 2 seconds after the Shutter button is pressed.
   - Self-Timer 10 sec
     A single picture is shot 10 seconds after the shutter button is pressed.
   - Self-Timer Smile
     Press the shutter button and a picture will be taken immediately after a smile is detected.
   - Self-Timer Off
     Disables the Self-Timer.

3. Press the SET button to confirm the settings and enter the shooting screen.

When enabling the Self-Timer, pressing the shutter or the [ ▼  ♂ ♂ ] button can disable the Self-Timer and return to the shooting screen while keeping the Self-Timer setting.
Flash Mode

The flash provides supplemental light for the scene. The flash is usually used when shooting against the light to highlight the object; it is also suitable for metering and shooting in darker scenes to improve the exposure.

1. Press the [Flash Auto] button to enter the flash settings menu.

2. Press the [Force Off] button to select the following 6 modes:

- **Force Off**
  Flash is turned off.

When enabling the Smile Detection, pressing the shutter or the SET button can disable the Self-Timer and return to the shooting screen while keeping the Self-Timer smile setting.

Self-Timer settings will remain after completion of shooting with the Self-Timer. They can be canceled by switching modes or by turning the camera off and then on again.
• Fill Flash
  The flash goes off when a picture is taken, supplementing the existing light in a scene and helping to eliminate shadows.

• Flash Auto
  Camera flash goes off automatically based on existing light conditions.

• Red-Eye Reduction
  The camera emits a brief pre-flash before the picture is taken to reduce red-eye effects.

• Slow Sync.
  This allows you to take pictures of people at night that clearly show both your subjects and the night time backdrop. The use of a tripod is recommended when shooting with this setting.

• Slow Sync.+Red-Eye Reduction
  Use this mode for slow synchrony shots with red-eye reduction.

3. Press the button to confirm the settings and enter the shooting screen.

After pressing the shutter button half way to achieve focus lock, the flash will automatically pop up if needed.
The white balance function allows adjustment of the color temperature for different light sources. (Adjustable in PSAM Mode)

Follow the steps below to set white balance of the camera:

1. Press the SET button to enter white balance menu.

2. Press the [⿳⿳]/[⿰⿰] button to select the following 9 modes:
   - AWB
   - Daylight
   - Cloudy
   - Fluorescent
   - Fluorescent H
   - Incandescent
   - Manual WB
     Set WB according to the current light source, press the SET button to set.
   - Color Temp. (1900K~10000K)
     Press the SET button to enter and turn the jog dial to adjust the color temperature value.
   - WB Bracketing
     Press the shutter button once to take three photos with different WB settings.

3. Press the SET button to confirm the settings and enter the shooting screen.
**WB Bracketing:**

Press the set button to enter options and then press the [▲AF]/[▼ώ]/[←]/[→] button to adjust the shift and turn the jog dial to adjust the BKT value (0, 1 and 2).

Rotate clockwise to adjust X axis (B-A). BKT value

Rotate counterclockwise to adjust Y axis (G-M). BKT value

Press the set button to confirm your settings.

---

WB bracketing is for setting the bracketing range. Shift to both sides for 3 spaces at most. If at the page border, shift only to the other side and 2 photos can be taken. If no shift, only one photo can be taken.
Continuous Shot Mode

Functions that can be enabled under each mode may be different.

Mode:  
For setting the single, continuous shot, Time-Lapse, HDR, WDR or AE bracketing functions.

Please follow the following steps to set:

1. Press the \[ \] button to enter the continuous shot menu.

2. Press the [ ◄◄ ]/[ ►► ] button to select the following 8 modes:
   - Single  
     Capture a single shot only.
   - Continuous Shot  
     For taking more than one picture continuously.
   - Cont.Shot-Fast (2M)  
     For continuous shot with 2M pixels.
   - Cont.Shot-High Speed (VGA)  
     For continuous shot with VGA pixel.
   - Time-Lapse  
     Take pictures based on the preset interval (30sec/ 1min/ 5min/ 10min). Press the \[ SET\] button to select the interval time.
   - HDR (-1EV, 0EV, +1EV)  
     This setting is to control the high dynamic image range in taking still pictures, with vivid effect in highlight and that the effect in dark parts can identify the outline and depth of the object. (Use of tripod is recommended)
• HDR effect may be affected by handshaking, light, subject movement or shooting environment.
• The flash is not available in HDR mode.
• It may take longer to save a photo in HDR.

• WDR (Wide Dynamic Range) When the camera detects that there is a big contrast in brightness between scenes and such scenes are against the light, it will automatically adjust the brightness and saturation to capture an image that better represents the scene.

• WDR is not available in mode.
• For WDR in the SCN mode:
  : adjustable;
  : unadjustable and on by default;
Other modes: not available.

Please refer to page 136~137 for a detailed explanation of HDR and WDR effects.

• AE Bracketing (0.3EV, 0.7EV, 1.0EV, 1.3EV, 1.7EV, 2.0EV) The camera will automatically and continuously take three pictures separately with a brightness of original, darker and brighter as long as you press the shutter once. Press the button to select the range of exposure.

3. Press the button to confirm the settings and then enter shooting screen.

Mode: 

• Single
• WDR
Exposure Compensation Functions Setting

The EV Function Menu of the camera includes functions, such as EV (Exposure Value) Adjustment, ISO, Shutter Adjustment, Aperture Adjustment, etc. Using the appropriate Function Settings can improve your pictures.

Please follow the steps below to set:

1. Press the button to display the Settings screen.
   4 options in [Exposure Compensation Functions Setting]:
   • EV Adjustment
   • ISO Adjustment
   • Shutter Speed Adjustment
   • Aperture Adjustment

2. Press the button/[ button to select the Setting options.

3. Press the button/[ button to adjust the option values.

4. Press the button to complete the setting and enter shooting screen.

**EV Adjustment**

Set up Exposure Compensation to adjust the picture brightness. If there is very high contrast between the photographed object and the background, the brightness of the picture can be adjusted as necessary. (This can be adjusted in P S A Mode)

The adjustable range of exposure value is from EV -3.0 to EV +3.0.
ISO Adjustment
ISO allows you to set the sensitivity of the camera sensor. Please use a higher ISO value in darker places and a lower value in brighter conditions. (This can be adjusted in P S A M Mode)

Options of ISO value: Auto, 100, 200, 400, 800, 1600 and 3200.

Shutter Speed Adjustment
For shutter speed, the camera may automatically set the aperture value corresponding to the manually set shutter speed so as to obtain a most suitable exposure value. The movement of object may be shown by adjusting the shutter speed. High shutter value can help you more clearly capture fast moving objects, while low shutter value can better show the movement of objects. (This can be adjusted in S M Mode)
Aperture Adjustment
You can adjust the aperture size value. Selecting a large aperture opening will emphasize the point of focus and show a blurry background and foreground. A small aperture opening will keep both the background and main object in clear focus. (This can be adjusted in AM Mode)

Using Quick Recording
In Photo Shooting Mode, press the button to begin recording video.

15 pictures at most can be taken by pressing the shutter when recording. The sizes of images taken are as below when playing them back:

FHD -> 2M 2M
HD -> 1M 1M
DVD -> VGA VGA

Once you are finished, press the button again to stop recording. The camera will save the video and return to the shooting screen.
“i” Button Function Menu

Functions that can be enabled are different under each mode.

Mode: **PSAM**

The image color setting allows you to select different effects.

1. Press the **i** button to select the Image color setting menu.

2. Press the [ ◄⇄ ]/[ ►]]) button to select the image color setting options.
   - Normal
   - Vivid
   - Black and White
   - Sepia
   - Partial Color-Red
   - Partial Color-Yellow
   - Partial Color-Blue
   - Partial Color-Green
   - Dreamy
   - Vignetting
   - EKTACHROME Film
   - KODACHROME Film
   - KODACOLOR Film
   - Salon
   - Punk
   - Negative
   - Reflection
   - Sketch
   - Fish Eye
   - 4 Grids - Stylish(2M)

Fish Eye effect is not available when shot size is 20M.
Using the Lens Function Ring

There is a lens function ring lever in one side of the lens. Moving it up and down can switch among ZOOM/AF, SMART and MF mode.

**Zoom/AF Mode**

Rotate the lens function ring for optical zoom.

1. Switch the lens function ring lever to position `ZOOM /AF`.

2. Rotate the lens function ring to optically zoom the object.

- Rotating the lens function ring in Zoom/AF mode is only for optical zoom.
Function Ring (Smart) Mode

Rotate the lens function ring to set parameters of aperture, shutter, ISO, EV, etc.

1. Switch the lens function ring lever to position SMART.

2. Rotate the lens function ring or turn the jog dial to select options needed.

3. Press the SET button to complete the setting and enter shooting screen.

The selection of functions of Function Ring (Smart) in the menu is needed before using Function Ring (Smart) mode. The default setting is Normal. (See P91 for details)

**MF(Manual Focus) Mode**

Rotate the lens function ring for manual focus.

1. Switch the lens function ring lever to position **MF**.

![](image1.png)

2. If the lens function ring is operated or the jog dial is turned the focus enlargement frame will appear on the LCD. After clear focus is achieved through manual adjustment, press the SET button to close the focus enlargement frame. The camera will return to the normal shooting screen. Semi-pressing the shutter button will have no effect; you need to fully press the shutter button to take a normal photo.

![](image2.png)

- Manual focus works only under the **P S A M** mode.
- The MF assist needs to be enabled in the menu before it will function. (See P85 for details)
Viewing Photos and Videos

For viewing taken photos and videos on the LCD:
1. After pressing the \( \text{button} \), the last photo or video clip taken will be displayed on the LCD.
2. Press the \( \text{button} \) to scroll through the photos or video clips stored in the built-in memory or on the Memory Card.
3. To play a selected video clip, press the \( \text{ SET } \) button to enter the movie playback mode.

An operation guide appears on the screen when playing back a video. Press the appropriate buttons to enable the corresponding functions.

When in Playback Mode, rotate the Zoom Lever counter to the position to display thumbnail images of the photos and videos on the screen.

1. Slide the Zoom lever to switch between 3 x 3 and 4 x 4 thumbnails.

2. Press the [ ▲ AF ]/[ ▼ AF ]/[ ◀ ◀ ]/ [▶ ▶ ] button to select a picture or video clip to view and press the button to restore it to the original size.

3. As shown in the picture, press the button to select index mode.

4 options in [ Index Mode ]:
- Single Index
- Date Folder
- Cont. Group
- Slide Show

When the icon appears, it means this is a video file.

When the icon appears, it means this is a continuous group file.
Using Zoom Playback (for still pictures only)

When playing back photos, you can also use the Zoom Lever to zoom in on the photos 2 to 8 times their original magnification.

1. Press the button to switch to Playback Mode.
2. Press the [ / ] button to select a picture to be zoomed in on.
3. Rotate the Zoom lever to position to zoom in.
4. Roll the jog dial clockwise to zoom in and counterclockwise to zoom out.
5. The bottom right corner of the LCD will display the number of times the image is magnified and area of the photo shown.

6. Press the [ / ] button to navigate and select a portion of the photo to be zoomed in on.
7. Press the button to return the image to its original scale.

Movie images cannot be magnified.
Continuous Shot Group Playback

High speed (VGA) and fast (2M) Continuous Shot images can be played back as a group.
1. Press the button to enter Playback Screen.
2. Press the [▲▼]/[▶▼] button to select Continuous Group.
3. Press the button to start playback.

<table>

Cont. Group | Playing | Pause
Animation Panorama Play

Panoramic Animation Playing is to play full size image in accordance with the shooting direction. After playing, it will automatically return to the static screen of panoramic image.

1. Press the button to enter Playback Screen.
2. Press the [◀ ▶] button to select animated panoramic photos.
3. Press the button to play in selected shooting direction.

In the process of panoramic animation playback, press the [ ▲ AF ] button to stop playing and return to the playback screen.

Picture will not be rotated during panorama play or pause.
Slideshow

This setting allows you to view all the stored images as a slideshow.

1. Press the button to enter playback screen.
2. Rotate the Zoom lever counter to the position to display thumbnails 3 x 3 and then press the button to select the index mode.

3. Press the button to select Slideshow Playing and then press the button to enter slide option.
4. Press the button to select play effect and then press the button to confirm.

- Exit
- Type 1: Slow-in and slow-out
- Type 2: Separate in middle and move off to the left and right
- Type 3: Separate into blocks and spin in
Deleting Photos and Videos

In Playback Mode, press the [▼ ‹ ◯] button to delete your photos and videos. To delete photos or videos:

1. Press the ◀ button to switch to playback mode.
2. Press the ◐[ ◄ ◆ ]/[ ► ◄ ] button to select the photos or videos to be deleted.
3. Press the [▼ ‹ ◯] button and the deletion screen is displayed.

4. Press the [▲ AF]/[▼ ‹ ◯] button to select [Delete One] or [Exit] and press the SET button to confirm.

Erased photos/video clips cannot be recovered.

Please refer to page 98 for instructions on deleting more than one image at a time.
Shooting Menu

Mode:  

1. In Shooting Mode, press the button to enter the Shooting Menu.
   12 options in [ Shooting Menu ]:
   • Continuous Shot Mode (refer to P62)
   • Expo Metering
   • AF (Auto Focus) Area (refer to P55)
   • WB (White Balance) Mode (refer to P60)
   • Macro Mode (refer to P56)
   • Color (refer to P67)
   • Flash mode (refer to P58)
   • OIS (Optical Image Stabilization)
   • Self-Timer Mode (refer to P57)
   • Beautifier (Adjustable only in Mode)
   • Select Scene (Adjustable only in Mode)
   • Menu

2. Press the [ ]/[] button to select the shooting menu to be set.

3. Press the []/[] button or turn the jog dial to select options of the shooting menu to be set and then press the button to confirm.

Refer to the following pages for more details about each setting.

Functions that can be enabled are different under each mode.
**Expo Metering**

Use this setting to select the “target” size of the camera’s field of view to be metered.

- **Spot**
  For metering the block displayed in the center of the screen.

- **Center**
  For metering the object in the center of the screen.

- **AiAE (Artificial Intelligence AE)**
  Evaluates the light intensity at multiple points in the frame and automatically determines the best value for the light meter.

**OIS (Optical Image Stabilization)**

This mode can help reduce photo blur caused by unintentional shaking, or low light.

- **OIS: Off**
- **OIS: On**

Use this image stabilization mode in dark environments.

Shooting in a windy or unstable environment (such as a moving vehicle) may cause blurry images.

You may not need OIS when using a tripod.
**Beautifier**
Select the effect for Face Beautifier Mode.

- 🌸 Effect 1: Skin Soften
- 🌸 Effect 2: Skin Soften + Eye Brightening
- 🌸 Effect 3: Skin Soften + Eye Brightening + Eye Enlargement

**Select Scene**
Select a scene mode under SCN Mode.
Shoot Setting1

Mode:  

1. Press the button, press the [▲AF]/[▼Ω] button to select .
2. Press the SET button to enter the menu.
3. Press the [◄]/[►] button to select .
6 options in [Shoot Settings 1]:
   • Image Size
   • Movie Size
   • Quality
   • MF Assist
   • AF Assist Beam
   • Digital Zoom

Functions that can be enabled are different under each mode.

4. Press the [▲AF]/[▼Ω] button to select the item to be set and press the SET button to enter the menu.
5. Press the [▲AF]/[▼Ω] button to select an option and press the SET button to confirm.
Image Size
The Size setting refers to the image resolution in pixels. A higher image resolution allows you to print that image in larger sizes without degrading the photo image quality.

- 20M: High quality printing
- 18M-3:2: full size printing
- 15M-16:9: 16:9 display
- 10M: poster printing
- 5M: A3 printing
- 3M: A4 printing
- 2M-16:9: 4”x 6” printing
- VGA: E-Mail

The larger the number of recorded pixels, the larger the file size and the fewer files that can be saved on your memory card.
**Movie Size**

Set the image resolution used during video recording.

![Movie Size Menu]

Total time of video recorded for each setting:

<table>
<thead>
<tr>
<th>No.</th>
<th>Image Pixels</th>
<th>Frames (fps)</th>
<th>Recommendation</th>
<th>Recording Time (approximate) (4GB)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>1920 x 1080 *</td>
<td>30</td>
<td>Class 6</td>
<td>30 Minutes</td>
</tr>
<tr>
<td>2</td>
<td>1280 x 720 *</td>
<td>60</td>
<td>Class 6</td>
<td>33 Minutes</td>
</tr>
<tr>
<td>3</td>
<td>1280 x 720 *</td>
<td>30</td>
<td>Class 4</td>
<td>59 Minutes</td>
</tr>
<tr>
<td>4</td>
<td>640 x 480</td>
<td>30</td>
<td>Class 4</td>
<td>105 Minutes</td>
</tr>
<tr>
<td>5</td>
<td>640 x 360</td>
<td>120</td>
<td>Class 6</td>
<td>54 Minutes</td>
</tr>
</tbody>
</table>
* The longest recording time is 29 minutes at one time.

When recording in higher pixel resolutions for extended periods of time, this can cause the camera to generate heat. This is not a camera malfunction.

When the video format is set as 640 x 360 (120fps), shooting time is 30 seconds, playback time is 2 minutes.

Sound recording is disabled when 640 x 360 120fps is chosen.

### Quality

The Quality setting can be used to adjust the image compression ratio.

- **RAW+JPG** (Available in **P S A M** mode)
  Creates two images: one in RAW and the other in JPG best.

- **RAW** (Available in **P S A M** mode)
  The image file will contain more data that can be used for the purpose of editing on a computer.

- **JPG Fine**
- **JPG Best**
If RAW or RAW+JPG is selected, the settings of Colour Effect, Continuous Shot, Cont.Shot-Fast (2M), Cont.Shot-High Speed (VGA), HDR and AE Bracketing cannot be adjusted.

The RAW file format provides lossless compression of the image data, which is not processed by the camera. The RAW file may be opened and modified using the image processing software, PhotoStudio Darkroom, that is located on the CD-ROM included with this camera. PhotoStudio Darkroom supports Windows 7/8/10 and Mac OS X (V10.8~V10.11).

**MF (Manual Focus) Assist**
Enables an enlarged focus window during the use of manual focus to provide the user better visibility for focus control. (Adjustable in **P S A M** mode)

- Off
- On
**AF Assist Beam**
In a darker environment, the AF assist beam setting can be turned on for better focus.

- Off
- On

**Digital Zoom**
This setting is for adjusting digital zoom. If this function is disabled, only optical zoom can be used.

- Off
- On
1. Press the button, press the [AF] button to select  
2. Press the button to enter the menu. 
3. Press the [ ] button to select . 
   6 options in [Shoot Settings 2]:
   • Date Imprint 
   • Quick Review 
   • Continuous AF 
   • Face Detection 
   • Custom Settings 
   • Function Ring (Smart) 

4. Press the [AF]/[ ] button to select the item to be set and press the button to enter the menu. 
5. Press the [AF]/[ ] button to select an option and press the button to confirm. 

Functions that can be enabled are different under each mode.
Date Imprint

Include a Date/Time stamp on the photo image.

Quick Review

This option enables a quick review of images immediately after capture. Each picture will be displayed on the LCD screen per the selections below.

- Off
- 1 sec
- 2 sec
- 3 sec
**Continuous AF**

Use the Continuous AF setting to be able to continuously focus automatically when taking pictures.

- Off
- On

**Face Detection**

Detects and focuses on faces to make all faces as clear as possible in Photo Mode.

1. Hold the camera steadily and then focus on the object to detect its face. A focus frame will appear at the face on the screen when a face is detected.
2. Press the shutter button half-way down to focus. The LCD will show a green focus frame when the subject is in focus.

3. Press the shutter button all the way down to take pictures.

The closed eyes detection is usually on. If the camera detects in the course of quick review there is a face with eyes closed, a prompt of closed eyes will appear.

**Custom Settings**

Custom settings stores the current movie shooting mode and its parameters. The stored mode and parameters are automatically used in Custom Settings mode.

- No
- Yes
Function Ring (Smart)

The options listed below can be set as Function Ring (Smart) Custom. Once set, the chosen function can be quickly adjusted with the lens function ring during shooting.

- Normal
- Aperture Priority
- Shutter Priority
- EV
- ISO
- Continuous Shot
- Color
- White Balance
- Image Size
- Expo Metering
- Flash
- AF Area
Playback Menu

Mode: 

1. Press the button to display the playback screen and press the button to enter the menu.

7 options in [Playback Menu]:

- Menu
- Display Mode
- Rotate
- Color
- HDR
- Touch-Up
- Resize

2. Press the [ ]/[ ] button to select the playback desired and press the button to enter.

3. Press the [ ]/[ ] button to select an option and press the button to confirm.

Refer to the following pages for more details about each setting.

Menu

7 options in [Menu]

- Shoot Settings 1
  (See P81 for details)
- Shoot Settings 2
  (See P87 for details)
- Playback Settings
  (See P97 for details)
- General Settings
  (See P101 for details)
- File Settings
  (See P104 for details)
- Connection Settings
  (See P108 for details)
- Wi-Fi Settings
  (See P41 for details)
**Display Mode**

- Normal Mode: Display all images.
- Date Mode: Arranged by date.
- Slide Show

The Date Folder is displayed in date order based on photo shooting date/time.

If there is no continuous shot image file in memory, continuous photo mode cannot be enabled.

**Rotate**

You can use this setting to change the orientation of the picture.

- Exit
- : Turn Left
- : Turn Right

Videos and panoramic pictures cannot be rotated.

The rotated picture file will replace the original photo.
Color

This setting allows you to change the picture color effect. The file is saved as a new photo and stored in memory together with the original photo.

- Exit
- Vivid
- Black and White
- Sepia
- Partial Color-Red
- Partial Color-Yellow
- Partial Color-Blue
- Partial Color-Green
- Dreamy

- Vignetting
- Salon
- Punk (4M)
- Negative (8M)
- Reflection
- Fish Eye
- 4 Grids - Stylish (2M)

In playing back single photos, press the button to enter the color effect setting menu.

Fish Eye effect is not available when shot size is 20M.
**HDR**

With the HDR function, pictures that are overexposed may be corrected to optimize the highlights and lowlights captured to more accurately represent the actual scene.

After using the HDR function, the image will be saved as a new file and the original file is still stored in the memory.

Select **HDR** with HDR:

![Image with HDR symbol]

**HDR** : HDR

inox : Exit

![Cat image]
**Touch-Up**

The playback beauty feature allows for beautification using three individual effects.

Select `eye` with touch-up:

- : Exit
- : Red-Eye Reduction
- : Skin Soften
- : Eye Brightening
- : Eye Enlargement

The Touch-Up referred to is the individual use of three effects. Beauty Mode allows you to select one, two, or all three of the effects combined.
**Resize**
This setting allows you to resize a picture to a particular resolution and saves it as a new picture.

- **Exit**: Exit
- **1024**: Resize to 1024x768
- **640**: Resize to 640x480

Only for adjusting pictures with high resolution to those with low resolution.

Sizes of photos taken in panorama mode or rotated cannot be adjusted.

**Playback Settings**

Mode: 📷 PSAM 📷 SCN CS 📹 📹

1. Press the 📷 button, press the [▲ AF] /[▼ ▲ ▼ ▼] button to select 📷.
2. Press the SET button to enter the menu.
3. Press the [◄ ▼ ▲ ▼] /[► ▼ ▼ ▼] button to select 📷.

5 options in [Playback Settings]:
- Protect
- Delete
- DPOF
- Trim
- Play Slide Show

4. Press the [▲ AF]/[▼ ▼ ▼ ▼] button to select the item to be set and press the SET button to enter the menu.

5. Press the [▲ AF]/[▼ ▼ ▼ ▼] button to select an option and press the SET button to confirm.

Refer to the following pages for more details about each setting.
**Protect**

To prevent any pictures or videos from being accidentally erased, use this setting to lock one or all of the files.

- **One**
  Lock the selected photo or video if they are unprotected; unlock the selected photo or video if they are protected.
- **Date Folder**
  Protect all photos in the Date Folder.
- **Cont. Group**
  Protect all photos in the Cont. Group.
- **All**
  Lock all photos or videos.
- **Reset**
  Cancel all locked photos or videos.

**Delete**

You can delete one or all photo/video files.

- **One**
  Delete one photo or video.
- **Date Folder**
  Delete all photos in the Date Folder.
- **Cont. Group**
  Delete all photos in the Cont. Group.
- **All**
  Delete all photos or videos.
The “🔒” indicator means a file is protected. File protection must be removed before a file can be deleted.

Deleting files will cause DPOF settings to be reset.

When one photo in the Cont. Group and Date Folders is protected, it will be kept but any other photos will be deleted.

Deleted files will be permanently deleted and will not be able to be recovered or restored.

DPOF (Digital Print Order Format)
The DPOF feature allows you to compile and select a group of pictures that you would like to print and will save your selection on the memory card so that you can use the memory card to print without having to individually specify the photos you want to print.

- One
- All
- Reset

The printer that supports DPOF is needed for photo printing.
**Trim**

The Trim setting allows you to crop photos and save them as new pictures.

1. Select [Yes] to confirm trim. Toggle the zoom lever or turn the jog dial to select the aspect ratio and press the \[ ▲ AF \]/[ ▼ ▭ ▭ ]/[ ◼ ◼ ◼ ]/[ ◼ ◼ ◼ ] buttons to adjust the part you want to trim.

2. Press the \[ \] button and the [Save change?] prompt appears. Select [ ] to change and save the picture. Select [ ] to cancel changes and return to the trim prompt screen.

- **A trimmed picture cannot be trimmed again.**

**Play Slide Show**

This setting allows you to view all the stored images as a slideshow.

- **All Files**
  To display and play back all images in memory card.

- **StillCaptures**
  To display and play back images of photo files in memory card.

- **Videos**
  To play back movies on memory card.

- **Cont. Group**
  To only play back images arranged by cont. group in memory card.

- The image cannot be clipped/trimmed again once it has been clipped to 640X480.

- Videos, RAW files cannot be trimmed.
General Settings

Connecting to a Computer

You can use a Micro USB cable to connect the camera and copy (transmit) photos to a computer, printer or other device.

Setting the USB Mode

The camera’s Micro USB port can be used to connect to either a computer or a printer. The following steps will allow you to ensure that the camera is correctly configured to connect with a PC.

1. Press the button, press the [▲ AF] /[▼ ▶ ◀ □] button to select ■ and press the SET button to enter the menu.
2. Press the [◄ ◎]/[► ◎] button to select 走去.
3. Press the [▲ AF]/[▼ ▶ ◀ □] button to select [USB] and press the SET button to enter the menu.
4. Press the [▲ AF]/[▼ ▶ ◀ □] button to select [PC] and press the SET button to confirm.
Transferring Files to your Computer

The computer will automatically detect the camera as a removable drive. Double-click the “My Computer” icon on the desktop to locate the removable drive and to copy folders and files in the drive to a directory on your PC as you would copy any typical folder or file.

Follow the steps below to connect the camera to a computer:

1. Make sure the computer is turned on.
2. Connect one end of the supplied Micro USB cable to the Micro USB port on your camera.
3. Connect the other end of the cable to an available USB port on your computer.
4. After the transmission is complete, disconnect the Micro USB cable according to your computer manufacturer’s instructions specifying how to safely remove USB devices.
PICTBRIDGE™ technology allows printing on the photos saved in the memory card by a printer.

To find out if a printer is PICTBRIDGE™ compatible, simply look for the PICTBRIDGE™ logo on the packaging or check the owner’s manual for specifications. With the PICTBRIDGE™ function on your camera, you can print the captured photos directly to a PICTBRIDGE™ compatible printer using the supplied Micro USB cable, without the need for a PC.

**Setting the USB Mode**

The camera’s Micro USB port can be set to connect with either a PC or a printer. The following steps will ensure that the camera is correctly configured to connect with a compatible printer.

1. Press the [posable] button, press the [▲ AF] /[▼ □ ◯] button to select [ ] and press the [posable] button to enter the menu.
2. Press the [◀ ▶] /[▶ ▶] button to select [ ].
3. Press the [▲ AF] /[▼ □ ◯] button to select [USB] and press the [posable] button to enter the menu.

After the camera is reset, it will switch to PC mode automatically from USB mode.

See “Using the PICTBRIDGE™ Menu” section on page 112.
Connecting to your Printer

1. Make sure the printer is turned on.
2. Connect one end of the supplied Micro USB cable to the Micro USB port on your camera.
3. Connect the other end of the cable to the USB port on the printer.

If the camera is not connected to a PICTBRIDGE™ compatible printer, the following error message will appear on the LCD.

![Connect failed]

The error message above will also appear if the USB mode is set incorrectly, in which case you should disconnect the Micro USB cable, check the USB mode settings, ensure that the printer is turned on, and then try connecting the USB cable again.
After setting the USB mode to printer, the PICTBRIDGE™ menu will appear.

<table>
<thead>
<tr>
<th>PictBridge</th>

</tr>
</tbody>
</table>

Press the [▲AF]/[▼ידFal] button to select a menu item and press the SET button to enter the item.

Refer to the following sections for more detailed information on each setting.

**Print (with Date)**

If you have set the date and time on your camera, the date and time will be recorded and saved with each photo you take.

1. In the PICTBRIDGE™ menu, select [Print (with Date)] and the screen as shown below appears.

2. Press the [◄헌]/[►$$] button to select a photo to be printed.
3. Press the [AF]/[button to select the number of copies for the currently displayed photo.
4. Press the button and the following screen will appear.

<table>
<thead>
<tr>
<th>PictBridge</th>
</tr>
</thead>
<tbody>
<tr>
<td>Print (With Date)</td>
</tr>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

5. Select [Yes] and press the button to confirm; select [Cancel] to cancel printing.

**Print (without Date)**

Use this setting to print the photos without dates on them.

1. In the PICTBRIDGE™ menu, select [Print (without Date)] and the screen as shown below appears.

2. Press the [button to select a photo to be printed.

3. Press the [AF]/[button to select the number of copies for the currently displayed photo.

4. Press the button and the following screen will appear.
Print Index

You can print all photos in the camera via this function.

1. In the PICTBRIDGE™ menu, select [Print Index] and the screen as shown below appears.

   2. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.

5. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.
Print DPOF Images

To use DPOF printing, you must select your photos for printing using the DPOF settings before hand. See “DPOF” section on page 99.

1. In the PICTBRIDGE™ menu, select [Print DPOF Images] and the screen as shown below appears.

2. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.

Exit

Select [Exit] to exit the PICTBRIDGE™ menu. At this time, the message [Remove USB Cable!] will appear on the screen.

Disconnect the Micro USB cable from the camera and printer.
Video System

You can use the AV cable (which should be purchased separately) to connect the camera and the television for setting up the video output. Connect one end of the AV cable to AV port of the camera, and connect the other end to AV-OUT port of the television. To adjust the format of the video output system according to your requirements:

1. Press the \( \text{Set} \) button, press the [▲AF]/[▼Enter] button to select [Menu] and press the \( \text{Set} \) button to enter the menu.
2. Press the [◀]/[▶] button to select [TV-System].
3. Press the [▲AF]/[▼Enter] button to select [TV-System] and press the \( \text{Set} \) button to enter the menu.
4. Press the [▲AF]/[▼Enter] button to select [NTSC] or [PAL] and press the \( \text{Set} \) button to confirm.

**NTSC:** English, Chinese (Traditional), Japanese, French, Korean, Russian, Vietnamese, Greek, Hungarian

**PAL:** German, Spanish, Italian, Chinese (Simplified), Portuguese, Swedish, Danish, Finnish, Indonesia, Norwegian, Dutch, Turkish, Polish, Thai, Croatian, Czech, Arabic, Hindi

The video output system changes based on the selected language.
Supported HDMI Connections

HDMI (High Definition Multimedia Interface), is a fully digital audio/video transmission interface, through which uncompressed audio and video signals are transmitted.

Connecting HDMI-Ready TV

1. Use the cable with high resolution output terminal (which should be purchased separately) to connect the camera to the television which meets HDMI standards.
2. The camera will be automatically detected by the TV.
3. After connecting via HDMI, the camera enters Playback Mode.

Make sure the camera and the TV are both turned on before connecting.
HDMI CEC Control

After connecting the camera with TV-System, you may view pictures taken with the camera on the TV screen and operate the camera with your TV remote control to view and edit all images.

After the camera is successfully connected with TV-System, other buttons of the camera except the Power button cannot work, with the LCD staying dark.

It is required that the TV-System supports HDMI CEC.

Please refer to TV manual for relative settings of TV-System.

9. Movie Length: 00:00:00

10. Cont. Group File

11. First Image Mark

12. 000/000: Current Sorting/Total Number of Images in Group

13. ✓: Confirm Effect

14. ✗: No Change

The following operations are available during HDMI CEC playback:

- 1:1 Single Playback
- Zoom-in Playback
- Rotate
- Index Playback
- Cont. Group Playback
- Slide Show Playback
- Video Play
- Panoramic File Play
- Image Edit

Pressing the four-color button on remote control can enable relative functions displayed on the TV-System screen.
1:1 Single Playback:
Press the left and right arrow buttons to switch among images.

Zoom-in Playback:
Under the 1:1 Single Playback Mode, press the red button to zoom in images; press the red and green buttons on remote control to zoom out images.

Rotate:
Under the 1:1 Single Playback Mode, press the blue button to rotate single picture.

Index Playback:
Under the 1:1 Playback Mode, press the green button to enter index playback; press the central button to enter image selection and then the arrow buttons to select files you want. Press the central button again to back to the 1:1 Single Playback.
Under the 5*3 index playback mode, press the green button to enter index selection and then the left and right arrow buttons to select 📁, 📄, 📄, and 📄. Press the central button again to confirm your selection.

Cont. Group Playback:
Under the 1:1 Single Playback Mode, press the central button to start playing images in Continuous Group.
If no images in the camera’s Cont. Group, a prompt of no pictures will appear if you select ⏯️ on the index playback interface.

Slide Show Playback:
Under the 1:1 Single Playback Mode, press the down arrow button to enter Slide Show Playback. While playing, you may press the left and right arrow buttons to directly switch between previous and next images and the central button to end playing.
Video Play:
Under the 1:1 Single Playback Mode, select a video and then press the central button to start playing. During playback, you may use the arrow buttons and the central button to perform operations such as fast forward/backward, pause, frame forward/backward, back to play, etc. according to prompts on the screen.

Panoramic File Play:
Under the 1:1 Single Playback Mode, select a panoramic file and then press the central button to begin playing.

Image Edit:
Multiple edit can be repeated under Image Edit Mode. Only one picture is saved finally.
Under the 1:1 Single Playback Mode, select a picture and then press the up arrow button to enter image edit and start detecting face. Press the up arrow button to do HDR editing.

Press the down arrow button to delete one picture.
Press the left and right arrow buttons to edit the color. 12 effects in total for selection.
The following Beautifier Touch-Up functions cannot be enabled until a face is detected. You may press relative color buttons to edit.

- 🌸 : Skin Soften
- 🌸 : Eye Enlargement
- 🌸 : Eye Brightening

*3 Deleting one file will not work until the camera enters image edit mode.
Set Eye-Fi SD Card Connection Mode

This camera supports wireless connection for Eye-Fi memory cards. Enable the Eye-Fi connection by following the steps below.

1. Press the \( \text{ 回 } \) button, press the \([ \text{ ▲ AF } ]/[ \text{ ▼ afür } ]\) button to select \([ \text{ 回 } ]\) and press the \( \text{ SET } \) button to enter the menu.
2. Press the \([ \text{ 回 } ]/[ \text{ 回 } \text{  있어서 } ]\) button to select \([ \text{ 回 } ]\).
3. Press the \([ \text{ ▲ AF } ]/[ \text{ ▼ afür } ]\) button to select \([ \text{ Eye-Fi } ]\) and press the \( \text{ SET } \) button to enter the menu.
4. Press the \([ \text{ ▲ AF } ]/[ \text{ ▼ afür } ]\) button to select \([ \text{ On } ]\) or \([ \text{ Off } ]\) and press the \( \text{ SET } \) button to confirm.

If the Eye-Fi card is not available in the camera, this feature is not displayed.
Design and specifications are subject to change without notice.

</table>
| Images will not print from the connected printer | ■ The camera is not connected to the printer correctly.  
■ The printer is not PICTBRIDGE™ compatible.  
■ The printer is out of paper or ink.  
■ The printer paper is jammed. | ■ Check the connection between the camera and printer.  
■ Use a PICTBRIDGE™ compatible printer.  
■ Load paper into the printer or replace the ink cartridge in the printer.  
■ Remove the jammed paper. |
| Saving data to memory card is slow         | ■ Using a memory card below Class 4 may result in slower recording times. | ■ Use a memory card with write Class 4 or higher to improve performance. |
| Cannot write to the memory card             | ■ The memory card has been locked.                                            | ■ Release the write lock of the memory card or replace with another card. |
| Too many movies to process                  | ■ The number of pictures or folders in the memory card exceed the specifications, so the playback of data folder can not be displayed. | ■ Delete unwanted files. |
When shooting with stacked filters attached, the corners of the photo may turn dark (vignetting effect) because the filter holder blocks light from reaching the camera image sensor; especially, at wide angle zoom control settings. Please take test shots and review the results when using stacked filters. (Filter size : Φ52mm)

Please enter the new password on smart device after changing Wi-Fi password. Some models of smart device will remember the Wi-Fi password previously entered, so please clear the old password on smart device manually before connection (For different models, this operation may be varied, please subject to your user manual).

**iOS devices**

**ANDROID devices**
HDR- High Dynamic Range

HDR captures three photos taken at different exposure levels and combines them into one photo. This optimizes all the details of the object or scene in the photo. Even the features in darker areas can be viewed clearly. (The following pictures are an example of HDR composition.)
**WDR - Wide Dynamic Range**

For high light, intense sunlight, or environments with artificial light, WDR allows PIXPRO’s smart algorithm to correct shadows surrounding a subject. This makes it easier to distinguish details in darker areas of the photo.

With WDR enabled video, clear images are provided when there are not only very bright areas, but also very dark areas in the camera’s field of view. (The following pictures are an example of WDR.)

![Without WDR](image1)

![With WDR](image2)
