About this Manual
Thank you for purchasing this KODAK PIXPRO 360° VR Camera. Please read this manual carefully and keep it in a safe place for future reference.

JK Imaging reserves all rights of this document. No part of this published manual may be reproduced, transmitted, transcribed, stored in a retrieval system or translated into any language or computer language, in any form, by any means, without the prior written permission of JK Imaging.

All trademarks mentioned in this manual are used for identification purposes only and are properties of their respective owners.

This manual provides you with instructions on how to use your new KODAK PIXPRO 360° VR CAMERA. Every effort has been made to ensure that the contents of this manual are accurate; however JK Imaging reserves the right to make changes without notice.

Throughout this manual, "
indicates useful information, "page number" indicates an introduction to contents on the specified page.
For Customers in the U.S.A.

Federal Communication Commission Interference Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and has been found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. There is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:
- Reorient or relocate the receiving antenna
- Increase the area of separation between the equipment and receiver
- Connect the equipment into an outlet on a different circuit from that to which the receiver is connected
- Consult an experienced radio/TV technician for advice or help

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter should not be co-located or operated in conjunction with any other antenna or transmitter.

Radiation Exposure Statement:
This product complies with the FCC portable RF exposure limit set forth for an uncontrolled environment and is safe for the intended operation as described in this manual. Further reduction of RF exposure can be achieved if the product is kept as far away as possible from the user’s body or by setting the device to lower power output if such functionality is available.

Canadian Industry Statement:
This device complies with ISED's licence-exempt RSS's. Operation is subject to the following two conditions: (1) This device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

Radiation Exposure Statement:
This product complies with the Canadian portable RF exposure limit set forth for an uncontrolled environment and is safe for intended operation as described in this manual. Further reduction of RF exposure can be achieved if the product is kept as far away as possible from the user’s body or by setting the device to lower power output if such functionality is available.
For Customers in Europe

This symbol [crossed-out wheel bin WEEE Annex IV] indicates the separate collection of electrical waste and electronic equipment in European countries.

Please do not throw the equipment into domestic refuse. Please use the return and collection systems available in your country for proper and safe disposal of this product.

The “CE” mark indicates that this product complies with European requirements for safety, health, environment and customer protection. “CE” marked cameras are intended for sales in Europe.

Europe – EU Declaration of Conformity

This device complies with the essential requirements of the RED Directive 2014/53/EU. The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the RED Directive 2014/53/EU:

  Safety of Information Technology Equipment
- EN 62311:2008
  Assessment of electronic and electrical equipment related to human exposure restrictions for electromagnetic fields (0 Hz-300 GHz)
- EN 300 330-1 V2.1.1:2017
  Electromagnetic compatibility and Radio Spectrum Matters (ERM); Short Range Devices (SRD); Radio equipment in the frequency range of 9 KHz to 25 MHz and inductive loop systems in the frequency range 9 KHz to 30 MHz
- EN 300 328 V2.1.1 (2016-11)
  Wideband transmission systems; Data transmission equipment operating in the 2.4 GHz ISM band and using wide band modulation techniques
- EN 301 489-1 V1.9.2:2011
  Electromagnetic compatibility and Radio Spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements
- EN 301 489-3 V1.6.1:2013
  Electromagnetic compatibility and Radio Spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 3: Specific conditions for Short-Range Devices (SRD) operating on frequencies between 9 KHz and 246 GHz
- EN 301 489-17 V2.2.1:2012
  Electromagnetic compatibility and Radio Spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment; Part 17: Specific conditions for Broadband Data Transmission Systems

Sintai Optical (Shenzhen) Co., Ltd., declares that this [KODAK PIXPRO 4KVR360 and BLUETOOTH Remote] is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Manufacturer: Sintai Optical (Shenzhen) Co., Ltd.
Address: Qiwei Ind Sec, 1st, 2nd,& 3rd Bldg, Lisonglang Village, Gongming Town, Bao’an District, Shenzhen, Guangdong, China

Packaging: Please follow local regulations for recycling of product packaging.

Batteries: Please dispose of used batteries at designated collection and recycling centers.
**SAR Statement**

A minimum separation distance of zero cm must be maintained between the user’s body and the device, including the antenna during body-worn operation to comply with the RF exposure requirements in Europe.

To comply with the RF Exposure requirements or limitations in Europe, third-party belt-clips, holsters or similar accessories used with this device should not contain any metallic components. The use of accessories that do not satisfy these requirements may not comply with RF exposure requirements or limitations and should be avoided.
Safety Notes

**Product Notes:**
- Do not disassemble or attempt to repair this product by yourself.
- Do not handle this product improperly. This product may be damaged or permanently broken if dropped, punctured or crushed.
- Avoid directly touching the lens elements. Please use a professional soft lens cleaning cloth together with a gentle lens cleaning agent to wipe and clean the camera lenses for optimal performance.
- Do not use corrosive, alcoholic or organic solvent containing agents to clean this product.
- Do not use or store this product in high temperature environments.
- Do not expose the lenses to strong light sources (e.g. direct sunlight, etc.) for extended periods of time.
- Do not use or store the product in a strong magnetic field environment.
- If the product is quickly transferred from a low temperature to a higher temperature environment, water condensation may occur inside the product due to physical changes. In this case, it is recommended to wait until the product returns to normal room temperature before you turn it on again to operate.
- If a photo or video cannot be played back due to improper operation by the user, the Company shall assume no liability or responsibility for compensation.
- Keep the product in a dry and clean environment when you are going to store the product for long periods of time.
- Due to the characteristics of the electronic elements inside the camera, the temperature of the camera will increase (heat will be emitted) in the process of use. Even though the temperature could be relatively high and heat is emitted from the surface of the camera, the camera is capable of shooting continuously and operating properly. When the camera detects that the temperature of the camera body is within certain limitations it will power off automatically.
- In case of powering off due to increased temperature limitations, the camera can be powered on again for use after its temperature cools and returns to normal.

**Battery Notes:**
- Please use the included Li-ion battery or replacement battery that is the same type as the one included.
- If the battery overheats during charging or using, stop charging or using immediately. Turn the camera off, carefully remove the battery and wait until it cools down completely.
- Please keep the battery contacts clean and dry.
- Install the battery according to the positive and negative marks on the camera's battery compartment. Never force it into the battery compartment.
- If battery fluid leaks into the product, please contact our customer service center immediately. If battery fluid leaks onto your skin, rinse the area immediately with clean water and seek immediate medical attention.
- To prevent the battery from being damaged, do not drop the battery, hit it with heavy objects or scratch it with sharp objects.
- Do not let the battery come in contact with metal objects (including coins) in order to avoid short-circuiting, discharging, excessive heating or possible leakage.
- Do not heat the battery or throw it into a fire to avoid serious injury or a possible explosion.
- Remove the battery if the camera will be stored for a long period of time.
- Do not store the battery in high temperature environments.
- Using the battery in cold environments will result in much lower camera performance.
- Do not attempt to disassemble the battery by yourself.
- Please dispose of the battery properly and according to your local laws and regulations (national or regional).
**Memory Card Notes:**

- The memory card referred to in this user manual is a microSD card, microSDHC card or microSDXC card, class 10 or higher.
- Please keep the memory card clean and dry.
- When inserting a memory card, make sure the notch direction of the card matches the notch direction of the memory card mark near the camera's card slot. Never force the memory card into the card slot.
- Before using any brand new memory card, please format the memory card first.
- A photo or video taken with the product will be stored in a folder that is automatically generated on the memory card. Do not store photos or videos that were not taken using the product in these folders, in case the files cannot be recognized during normal playback.
- Directly editing the data on the memory card is not recommended. Always copy the data to your computer first before editing.
- Turn the product off before removing the memory card, otherwise the memory card or files could be damaged permanently and files/folders could be permanently lost.
- When the camera is stored for a long period of time, please backup the data on the memory card and remove the memory card from the camera.

**Other Notes:**

- Do not disconnect the power or turn the product off during the firmware updating process. Doing so may cause incorrect data to be written and the product may not power on later.
- When using your product on an airplane, observe the relevant rules specified by the airline and Federal regulations.
- Due to the limitations of manufacturing technology, the camera's LCD may have a few dead or bright pixels. This is completely normal and these pixels do not affect the quality of the photos or videos taken with this camera.
- If the LCD screen is damaged, please pay close attention to the liquid crystal phosphor inside the screen. If any of the following situations arise, kindly take the recommended actions immediately as indicated below:
  1. If liquid crystal comes in contact with your skin, please wipe your skin with a clean, dry cloth, thoroughly wash with soap and rinse with plenty of clean water.
  2. If liquid crystal gets into your eye, flush your eye immediately with plenty of clean water for at least 15 minutes. Please seek immediate medical assistance.
  3. If liquid crystal is accidentally swallowed, rinse your mouth immediately with clean water and try to induce vomiting. Please seek immediate medical assistance.

**Waterproof Notes:**

- This product is splash proof for the purpose of daily activities. Before use, please make sure to fully lock the battery cover to ensure a complete seal.
- Any scratches, cracks or small foreign objects (such as sand or hair) attached to the rubber ring inside of the battery cover will affect the efficiency of the splash proof function. Before use, please check whether the waterproof rubber ring is damaged or contaminated with a foreign object before closing the battery cover door. When there is a foreign object on the waterproof rubber ring and its adjacent surfaces, please use a clean, lint-free, dry cloth to clean it. If there are any scratches or cracks, contact our service center immediately for maintenance and/or obtain a replacement waterproof rubber ring.
- Do not directly open the battery cover door when the product is accidentally exposed to water. Please turn off the camera's power and thoroughly wipe it with a clean, dry, lint-free cloth before opening the battery cover door in order to remove the battery and the memory card.
- When opening the battery cover door, if there are water droplets on the surfaces located between the interior of the camera and the camera body, please make sure to fully wipe and dry them off.
- After using the product in the presence of sand, mud or other foreign matter, please carefully rinse it with clean water (fully close the battery cover door tightly before rinsing). After rinsing, wipe the camera with a clean, dry, lint-free cloth.

Getting Ready

Standard Parts and Accessories Included:
Your product packaging should contain the camera you purchased along with the following standard parts and accessories. If anything is missing or appears to be damaged, please contact our customer service center. (The AC Adapter style will vary according to the power requirements from different countries or regions. Pictures below are for reference only):

- Rechargeable Li-ion Battery
- Battery Charger
- AC Adapter
- Micro USB Cable
- Small 3-Leg Stand-B
- Lens Covers (B-Small / C-Large)
- Protective Covers (B-Small / C-Large)
- Carrying Case
- Remote Control Mount-B
- BLUETOOTH Mini Remote Control-D
- Cleaning Cloth
- Quick Start Guide
- Warranty Card
- Service Card
- Online Company Store Card
- Team 360 Sticker

Mounting / Removing Lens Covers:

Removing lens covers:
Turn the clear, protective lens cover counter clockwise following the illustrations below until it separates from the ORBIT360 4K/4KVR360.

Attaching lens covers:
Turn the lens covers clockwise and firmly tighten the lens covers as illustrated below.

- The lens covers protect the camera's glass lenses from being permanently damaged and are dustproof, shockproof and splash proof. Using the lens covers when taking a photo/shooting a video will not affect the photo image/video quality. Keeping the clear, prootective lens covers on the ORBIT360 4K/4KVR360 is essential to being able to use the internal stitch feature of the camera. If you do not use the clear lens covers, you will not be able to stitch photo/videos and render files for sharing.

- Before mounting the clear lens covers, make sure the permanent glass lens surfaces are clean and dry. Always use a clean, lint-free, dry cloth to clean the camera's lenses before shooting or recording so any foreign particles it will not affect the photo or video quality.

- When the ORBIT360 4K/4KVR360 is exposed to extreme temperature differences, condensation may form inside the camera's lens covers. If this happens, remove the lens covers, clean with a soft, dry, lint-free cloth and reinstall the lens covers.

- If the ORBIT360 4K/4KVR360 will not be used for a long period of time or during transportation, always put the black rubber protective covers on (as shown in the image below):
Installing the Battery:

1. Open the Battery Cover Door
   Slide the battery cover lock to the left ①, then slide the open switch of the battery cover door downward ②.

2. Insert the Battery
   Insert the Li-ion battery into the battery compartment in the direction of the arrow ③ (note the location of the + and - symbols).

3. Close the Battery Cover Door
   Close the battery cover door until you hear a “click” to indicate the door is fully and tightly closed ④. Slide the battery cover lock to the right ⑤.
Installing a Memory Card:

Open the battery cover door, then insert the memory card into the card slot as shown in the illustration below (note the direction of the memory card opening). Push the bottom end of the memory card with your fingertip into the slot completely and close the battery cover door.

![Memory Card Illustration]

- A memory card (microSD / microSDHC / microSDXC) is essential to recording and saving 360° photos and videos and is not included in the product packaging. The memory card needs to be purchased separately. Please use a memory card which is Class 10 or higher and has a capacity of 8GB to 256GB. When recording with any new memory card Class 10 or higher, it is recommended you format the memory card before using.
- To remove the memory card, open the battery cover door, gently press the memory card to eject it and remove it carefully.
- The camera will automatically turn off if the memory card is inserted or removed when the product is turned on.

Mounting / Removing Battery Cover Door:

Removing Battery Cover Door:
Pull the battery cover door hinge out carefully (as shown in the diagram below) until the battery cover door is separated from the camera body.

Mounting Battery Cover Door:
Snap the battery cover door back on to the camera body at the hinge section as shown in the diagram below.

With the battery cover removed, user may readily access the USB/HDMI/AV interfaces at their discretion.

- File size may increase or decrease depending on the subject, shooting conditions, etc. Disc capacity varies with manufacturer and formatting method. The exposure time may be used for reference.
- The camera is not waterproof or weatherproof if the battery cover door is removed.
Charging the Battery:

Please use the supplied battery charger and AC adapter to charge the Li-ion battery in an ambient temperature ranging from 50˚F to 95˚F or 10˚C to 35˚C.

Charging the Battery with Induded Battery Charger:
1. Place the battery into the battery charger according to the direction illustrated below. Use the Micro USB cable to connect the battery charger to the AC adapter then plug the AC adapter into an electrical outlet.

![Battery Charger Diagram]

2. The indicator light will turn red when charging. The indicator light will turn green when charging is complete.

When charging the battery for the first time or after a long period of storage, please make sure that the charging time is a minimum of four hours.

Charging the Camera with an AC Adapter or an External Power Supply (vehicle power supply, portable power supply, etc.):
1. Place the battery into the camera.
2. While in the "off" mode, use the Micro USB cable to connect the camera to the AC adapter first, then plug the AC adapter into an electrical outlet. Alternatively, use the Micro USB cable to connect the camera to an external power supply (vehicle power supply, portable power supply, etc.).

![Camera Connection Diagram]

3. The indicator light will turn orange while it is charging. The indicator light will go out once charging is completed and the battery is fully charged.

The camera cannot be recharged when its power is on.
Charging the Camera via a Computer:
1. Place the battery into the camera.
2. Use the Micro USB cable to connect the camera (in the "off" position) to your computer.
3. The indicator light will remain orange while it is charging. The indicator light will go out once charging is completed and the battery is fully charged.

The camera cannot be recharged when its power is on.

Using the Internal Microphone:

Please only use a 2.5mm audio cable for the internal microphone. Optional PIXPRO 2.5mm Audio Cables are available for purchase @ kodakpixpro.com (cable sold seperately).
Main Camera Interface

- Main Camera Interface Introduction:

1. **Camera Mode**
   - Movie Mode
   - Loop Recording Mode
   - Burst Mode
   - Snap Shot Photo Mode
   - Time-Lapse Photo Mode
   - Time-Lapse Video Mode
   - High-Speed Movie Mode

2. **Memory Card**

3. **Movie Size:**
   - VR: 3840 x 2160 / 1920 x 1080 / 1280 x 720
   - DOME: 2980 x 1672 / 1920 x 1080
   - FRONT: 4K-P30 / FHD-P60 / FHD-Middle / FHD-Below / HD-P60 / HD-SPEED
   - 197° 4K Ultra Wide
   - 4K [16:9] Full Frame

4. **Battery Status**

5. **Display Mode:**
   - VR: 360° Spherical
   - DOME: 235° Round (Dome) Mode
   - FRONT: 0° Front Mode

6. **Remaining Recording Time:**
   - (H:M:S) HH:MM / MM:SS / none

7. **Motion Detection (On)**

8. **Number of Remaining Shots**
   - (+99999" will be displayed when the SD card exceeds the maximum available display number) / none

9. **Existing Document in the Memory Card**
   - (+9999" will be displayed when the SD card exceeds the maximum available display number)

10. **Photo Size:**
    - VR: 16M / 14M / 13M
    - DOME: 13M
    - FRONT: 9M / 8M / 7M

11. **Time Recording the Movie:**
    - (H:M:S) 00:00:01
**Power On / Off**

- **Power On:**
  When the power is off, press the (i) button for one second or more to turn the camera on.

- **Power Off:**
  When the power is on, press the (i) button for one second or more to turn off the product.

  If the product cannot be powered off normally, you can remove the battery from the camera to force it to power off.

**Start-up for Date and Time**

1. Press the (i) button to turn the camera on. When starting for the first time, the display will show the date and time screen setting, "Year/Month/Day/Hour/Minute/Second".
2. The field to be adjusted will be highlighted with a black background color. Press the (up) or (down) buttons to adjust the value, press the (button to enter and confirm.
3. After adjusting the "Minute : Second" value, press the (button to enter the main camera menu interface.
Camera Mode Introduction

In the main camera interface, press and hold the (up) button to enter the mode selection interface. Press the (up) or (down) button to select any one mode; press the button to enter and confirm the mode of the current interface.

7 modes are available: Movie Mode, Snap Shot Photo Mode, Time-Lapse Photo Mode, Loop Recording Mode, Time-Lapse Video Mode, High-Speed Movie Mode, and Burst Mode.

**Movie Mode**
Enable video recording. This mode is suitable for recording in most conditions.
Operation Method:
Press the button to start recording. Press the button again to stop recording.

**Snap Shot Photo Mode**
Enable photo shooting. This mode is suitable for shooting photos in most conditions.
Operation method:
Press the button to take a photo.
- **Time-Lapse Photo Mode**
  Time-Lapse Photo means shooting at a certain time interval and saving the shot photos in the same folder. If the number of files exceeds the maximum number of folder (9999), create a new folder.
  
  **Operation method:**
  Press the button to start shooting photos. Press the button again to stop shooting photos.

- **Loop Recording Mode**
  Loop recording refers to recording independent video segments in the unit of 2 minutes. The recording will be automatically stopped if the single recording time exceeds 24 hours.
  
  **Operation method:**
  Press the button to start recording. Press the button again to stop recording.

The video recording time varies in accordance with different capacities of memory card and movie size. Each time loop recording is executed, a new folder is generated.

- **Time-Lapse Video Mode**
  Time-lapse movie enables the recording of an interval of time, and splices the frames together to present a condensed video, which usually requires a long period to complete.
  
  **Operation method:**
  Press the button to start recording. Press the button again to stop recording.

① indicates that the current countdown seconds

Neither sound recording nor electronic image stabilization (EIS) function are supported.
**High-Speed Movie Mode**

This camera shoots ultra-high speed movies and plays back with normal 30fps speed.

Operation method:
Press the button to start recording. Press the button again to stop recording.

Audio cannot be recorded in this mode.

**Burst Mode**

Enables ten successive photos to be captured continuously before automatically pausing.

Operation method:
Press the button; the camera will pause after 10 photos have been taken.
Menu Introduction:

1. In the main camera interface, press and hold the (up) button to enter the interface menu. There are 2 options: All Shooting Mode Settings and General Settings. Press the (up) or (down) button to select the desired setting and press the button to enter the corresponding sub-menu interface.

2. Toggle between the (up) or (down) buttons to select the desired setting; press the button to confirm and to enter the selected menu interface (highlighted with a black background color).

3. Press the (up) or (down) buttons to select the desired item; press the button to select and confirm and to go back to the sub-menu interface.

4. Select , press the button to return to the menu interface.

5. Select , press the button to return to the main menu interface.

Sub-Menu Interface settings
Below is an illustration of the recording setting menu for an example. The operating settings of all optional shooting modes have the same menu entry flow and menu access as shown below:
Display Mode
Set image storage format
There are 3 options:

1. **VR** 360° Spherical / VR Mode

We recommend keeping objects a distance of 5 ft away from the stitch line for optimum stitching and output results.

When shooting using the in-camera stitch mode, you cannot manually adjust the file's stitch position after recording. For optimized stitching shoot with the protective lens covers on.

To have the ability to manually control your stitch line post capture, switch to the dual global mode and manually adjust and edit your stitch line using the free “PIXPRO 360 VR Suite” software for increased flexibility when editing ORBIT360 4K / 4KVR360 360° photos or video.

When shooting in a controlled and safe environment using the dual global mode setting, you have the added flexibility of removing the protective lens covers to reduce unwanted glare and added clarity.

When clear plastic lens covers are removed you cannot use the camera's In-Camera stitch mode and upload 360° photos and videos from the PIXPRO Remote Viewer APP.

When removing the clear, plastic, protective lens covers, the preferred and recommended method for shooting is 24 fps dual global mode and stitching in the complimentary PIXPRO 360 VR Suite software provided, to optimize flexibility of manually adjusting the stitch line for added control.
2. **DOME** 235° Round (Dome) Mode

3. **FRONT** 197° 4K Ultra Wide Full Frame Mode [16:9]

4K [16:9] Full Frame Mode
Movie Size

Video Resolution Settings:
VR 360° Spherical / VR Mode (2:1)
- 3840×1920 (24fps)
- 3840×1920 (15fps)
- 1920×960 (30fps)
- 1280×640 (120fps)
235° Round (Dome) Mode (1:1)
- 2880×2880 (24fps)
- 1920×1920 (30fps)

197° 4K Ultra Wide Mode
- 4K-P30 3840×2160 (30fps)
- FHD-P31 1920×1080 (60fps)
- FHD-P32 1920×1080 (60fps)
- HD-P60 1280×720 (60fps)
- HD-PI20 1280×720 (120fps)

The selectable video resolution options vary for different video shooting modes and are subject to actual user selections that will determine final playback and the saved video file resolution.

When the display mode is set to VR, the only options available will have the [2:1] aspect ratio and will be displayed; when the display mode is set to 235°, only the [16:9] options will be displayed; when the display mode is set to 197°, only the [1:1] aspect ratio options will be displayed.

When selecting 4K-P30 during recording, if the lenses face toward a harsh or brighter light, a glow effect may occur.

The maximum recording times are:

When the camera is set in VR Mode, the EIS setting is not available.
**Time-Lapse Photo:**
Set interval photo time.
There are 6 options:
- 1 sec
- 2 sec
- 5 sec
- 10 sec
- 30 sec
- 60 sec

**Time-Lapse Video:**
Set interval recording time.
There are 6 options:
- 1 sec
- 2 sec
- 5 sec
- 10 sec
- 30 sec
- 60 sec

**Motion Detection:**
Motion detection means if the camera detects moving objects entering into view, it will automatically start recording. During the recording process, if there is no moving object detected for 10 continuous seconds, the recording will pause automatically.
There are 2 options:
- Enable
- Off

Operation method:
1. Select and return to the main menu interface.
2. The display will show the icon. Press the button to activate. When the product detects moving objects, it will automatically start recording.
3. The product will stop recording when there is no change in the image or lack of movement after 10 seconds. When the image changes or the camera senses movement again, the camera will start recording again automatically and a new video file will be generated after each pause and restart.

![Diagram](image)

1 indicates the total time of recording
2 indicates the total time from enabling the Motion Detection setting

4. Press the button to stop recording and detecting.

**Wind Reduction:**
Wind reduction refers to the camera's ability to reduce the amount of noise caused by wind or high speed recording environments.
There are 2 options:
- Enable
- Off
- **Color:**
  Set Image Color.
  There are 3 options:
  - Normal
  - Black and White
  - Vivid

- **White Balance:**
  White balance means the user can adjust the color temperature under different light sources to help ensure that the colors in photos and videos are reproduced as accurately as possible.
  There are 6 options:
  - Auto White Balance
  - Daylight
  - Cloudy
  - Fluorescent
  - Incandescent
  - Underwater

- **Exposure Compensation:**
  Adjust picture brightness. The adjustable range of the camera's exposure compensation value is from EV -3.0 to EV +3.0.

- **Photo Size:**
  Set photo resolution.
  There are 7 options:
  - 7360×3680(2:1)
  - 5520×2760(2:1)
  - 3680×3680(1:1)
  - 3526×2644(4:3)
  - 3840×2160(16:9)

File size may increase or decrease depending on the subject, shooting conditions, etc. Disc capacity varies with manufacturer and formatting method. The exposure time may be used for reference.
■ Audio / Sound
Set the audio / sound levels of the camera.
There are 4 options:
- Sound Off
- Sound 1
- Sound 2
- Sound 3

■ Automatic Power Off
When this function is enabled, if there is no action taken within a set time frame (except while recording or connected to Wi-Fi), the camera will automatically power off.
There are 2 options:
- 3 minutes
- Off

■ USB Connection Mode
The mode of connecting the camera via a Micro USB cable to a computer is available. If there is a need to view, save photos or videos, please select the "Mass Storage" mode from the menu settings. If there is a need for the camera to serve as a video chat (SKYPE) device, please select the "Webcam" option.
There are 2 options:
- Mass Storage
- Webcam

When the Webcam is being used, the power can only be supplied by the camera's internal Li-ion battery, so a fully charged battery is highly recommended.

■ Date / Time
Set the date and time in the camera.
1. The display shows the date and time setting screen, "Year, Month, Day, Hour : Minute : Second";
2. The field to be adjusted will be highlighted with a black background color. Press the (up) or (down) button to adjust the value, press the button to confirm value.
3. After adjusting the "Minute" value, press the button to enter the Sub-Menu Interface.
- **Format**

  Format will clear all data stored on the memory card and will fully erase all photos and videos stored on the card.

  There are 2 options:
  - **YES** Confirm
  - **NO** Cancel

  To select **YES**, press the button to start formatting the card and return to the sub-menu interface after completion.

- **Reset Settings**

  Reset settings will recover and reinstall all standard product settings to the factory defaults (except for date and time).

  There are 3 options:
  - **YES** Confirm
  - **NO** Cancel
  - **Reset Password**

  If select **YES**, press the button to start reset and return to the sub-menu interface after completion.

- **FW Version**

  The FW version will display the current firmware version installed on your camera. Press the button to return to the sub-menu interface.

  1. Download the latest firmware from the official website. (File name: Orbit360_v ***. Zip)
  2. Copy the firmware folder to the memory card. (Two files in the firmware folder)
  3. Insert the memory card into the camera. If there is a new version stored in a folder firmware on the memory card, the firmware can be updated by inserting the memory card and updating the firmware.

  There are 2 options:
  - **YES** Confirm
  - **NO** Cancel

  If select **YES**, press the button to start updating the new firmware and the camera will automatically power off after completing and installing the firmware update.

  If the low battery warning appears, fully charge the battery before reattempting to update the firmware.

- **Date Stamp**

  Include a date stamp on the photo image.

  There are 2 options:
  - **Date Stamp On**
  - **Date Stamp Off**

  **2M/15M/13M** will not allow a date stamp on the photo images.
**BLUETOOTH Remote Control-D**

**Remote Control View**

1. 🔍 BLUETOOTH Signal Test Button
2. Connect / Shooting Indicator
3. 🔴 Recording / Shooting Button / Mode Switching Movie<>Photo (press and hold)

**Specifications**

Model: RR-BK04  
Dimension: 30×20×13.7mm  
Weight: 27±2g (including battery)  
Dust Proof: IP6X  
Temperature: -10° to 40°C  
Humidity: 0-90%  
Battery: Button Cell CR2032

**Before Using:**

Pull the insulating strip completely out prior to operating the remote control.
**Installing the Battery:**
Use a screwdriver to remove the screw on the backside of the remote control by turning it counterclockwise (Fig. 1). Open the battery cover and insert the battery (Fig. 2), close the battery cover and rotate the screw in the opposite direction to tighten down.

![Image of remote control and battery cover](image1)

**Installation of the Remote Control Mount-B /Mini Remote Control/3-Leg Stand:**

1. Press the Mini Remote Control mount onto the 3-Leg Stand (Fig. 1). Close the tripod (Fig. 2).

2. To mount the Mini Remote Control and align it between the two location holes at the bottom of the mount (Fig. 3), align the remote control with the two locating points at the top of the mount (Fig. 4), and snap into place.

![Image of tripod and remote control](image2)

*If the tripod is loose, tighten it with the supplied Hex Wrench.*
Pairing the Camera Via BLUETOOTH Remote Control:

1. Pair the camera to the remote control
   This method is for one remote control to one camera:
   
   With the camera turned on, press the 📷 button for 2 seconds to enter the pairing mode.

   Press and hold the 📷 and 🎥 buttons simultaneously on the remote control until pairing is successful.
While attempting to pair, the remote control should be held close to the camera.

2. Press the red button on the remote control to start shooting or recording and press the red button again to stop recording.

Other parameters in the camera will remain the same as initially set.

3. To terminate remote control pairing, press the button.
Successful Pairing Between the Camera and the Remote Control:

1. BLUETOOTH signal test press the button. The camera will power off or on by pressing and holding the button for 1.5 seconds or more.
2. Using the mini remote control, all settings or parameters set in the camera's menus for shooting or recording will remain the same as initially set to switch from movie to photo mode or vice versa by (in standby mode) pressing and holding the button.

Upon successful pairing, both the remote control and camera will remember the BLUETOOTH information.

When camera is activated prior to remote control after pairing with remote control, press and hold the signal button on the remote control to reconnect. When successfully reconnected, the green LED signal light will flash in green.

If the camera has been powered off for more than 12 hours, it is impossible to power on the camera directly with remote control.

Movie or Photo Switching does not work.

Indicator Lamp Status Description:

1. If pairing is successful, the signal indicator light will turn green.
2. If pairing fails, the signal indicator lamp will turn red.
3. Switch to Movie mode by pressing and holding the button, the signal indicator light will start flashing green.
4. Switch to Photo mode by pressing and holding the button, the signal indicator light will start flashing green.
5. When recording or shooting with the Mini Remote Control, the shooting status indicator lamp will turn red.
6. When the remote control's battery level is less than 20%, the indicator light will turn orange.

Precautions:

1. If the Wi-Fi, NFC or HDMI connection or computer connection with the camera are enabled, the remote control function is not available.
2. The remote control operates at band 2.4GHz. Because microwave ovens, radios and amateur radios also use the same cyclic wave, it is possible to experience radio interference.
3. Before using the remote control, please make sure there are no other electronic devices or radio stations, etc. around. Please use the camera and remote control in an environment with better permeability and free from obstructions.
4. Radio interference and other circumstances may cause a malfunction of the remote control. Pay attention to the actual conditions of the camera when using the remote control.
**Download and Install BLUETOOTH Remote Control APP**

- **APP Download:**

  Download the APP installation package (APP name: PIXPRO Remote Update Service) to your smart Mobile phone from the path below and install it by following the instructions on the interface.

  For ANDROID Mobile phone, search and download the APP "PIXPRO Remote Update Service" in Google Play and install it by following the instructions on your smart device's interface.

  ![Google Play](android-icon.png)

  For iOS Mobile phone, search and download the APP "PIXPRO Remote Update Service" in APP Store and install it by following the instructions on your smart device's interface.

  ![App Store](ios-icon.png)

  APP Package name: com.ao.remote_update.apk

- **Please review the following items before your first time connecting:**

  1. Do not use in places with high intensity magnetic fields, electrostatic and electric wave interference (for example near a microwave oven), which may or may not cause failure in receiving proper signals.

  2. Do not use the Wi-Fi connection functions on an airplane.

  3. To maintain your connection, please keep the BLUETOOTH Remote Control near distance without signal shielding interference.

  4. Your smart Mobile phone needs to support BLE.

  5. Your smart Mobile phone operating system version needs to be iOS 9 or higher on Mac or ANDROID 5.0 or higher.

     | Android system: | iOS system: |
     |-----------------|-------------|
     | Hardware requirements: Android Mobile Phone | Hardware requirements: iPhone Mobile Phone |
     | ROM: min. 8GB | ROM: min. 8GB |
     | RAM: min. 1GB | RAM: min. 1GB |
Connecting your Remote Control to Smart Mobile phone with BLUETOOTH

Operation Method:

1. Enable Bluetooth function on your phone.
2. Press and hold remote controller’s [Power] and [REC] keys for more than 5 seconds, wait for the indicator to light up for pairing.
This remote control device can be used to remotely control the camera from a distance. The remote control is optional. If you wish to purchase one, contact your retailer to buy or visit kodakpixpro.com for our online store. The optional wrist strap is provided to wear the remote control if desired.

**Remote Control View**

1. Signal Indicator Lamp
2. BLUETOOTH Signal Test Button
3. Shooting Mode Switch
4. Battery / Memory Card Indicator Light
5. Recording / Shooting Button
6. VR 360° / Front 197° / Dome Mode 235° Mode Switch
7. Shooting Status Indicator Lamp
8. Battery Cover Plate

**Specifications**

- **Model:** RR-WH03
- **Dimension:** 46.9 × 46.1 × 13.7mm
- **Weight:** 28g (including battery)
- **Waterproof:** 5m (16 feet)
- **Shockproof:** 2m (6.5 feet)
- **Dustproof:** IP6X
- **Temperature:** -10° to 40°C
- **Humidity:** 0~90%
- **Battery Type:** Button Cell CR2450

**Installing the Battery:**

Open the battery cover plate with the included accessories tool in a counter clockwise direction. Insert the battery with the anode facing upward. Replace cover CR2450 plate over battery and turn clockwise to lock into place.
Pairing the Camera Via BLUETOOTH Remote Control:

1. Pair the camera to the remote control
   This method is for one remote control to one camera:

   With the camera turned on, press the 📣 button for 2 seconds to enter the pairing mode.

Press and hold the ⬆️ and ⏯️ buttons simultaneously on the remote control until pairing is successful.
While pairing, the remote control should be held close to the camera.

2. Set the desired shooting mode (movie mode 🎥 or snap / shot photo mode 📷) and the display mode (VR 🎮, Round (Dome) 📡, or Front 🎯).

Other parameters are set the same as the current settings of the camera at the same mode.

3. Press the 🎥 button on the remote control to start shooting or recording and press the ⏯️ button again to stop recording.

After successful pairing, if you press the 🎥 button, the remote control and the camera need to be re-paired.
Successful Pairing Between the Camera and the Remote Control:

1. To test if the camera's powered on or whether the remote control is paired successfully, press the 📷 button. The camera will power off by pressing and holding the 📷 button for more than 1.5 seconds.

2. When the 📷 button on the remote control is pressed to start recording or shooting, the camera will work with the current setting of the remote control.

Upon successful pairing, both the remote control and camera will remember the BLUETOOTH information.

When camera is activated prior to remote control after pairing with remote control, press and hold the signal button on the remote control to reconnect. When successfully reconnected, the green LED signal light will flash in green.

If the camera has been powered off for more than 12 hours, it is not possible to power the camera on directly with remote control.

Indicator Lamp Status Description:

1. If pairing is successful, the signal indicator light will turn green.
2. If pairing fails, the signal indicator lamp will turn red.
3. During remotely controlled recording or shooting, the shooting status indicator lamp will turn orange.
4. When the battery level of the camera is less than 25% or the memory card is full, the battery/memory card indicator lamp will turn red.

Precautions:

1. If the Wi-Fi, NFC or HDMI connection or computer connection with the camera are enabled, the remote control function is not available.
2. The remote control operates at band 2.4GHz. Because microwave ovens, radios and amateur radios also use the same cyclic wave, it is possible to experience radio interference.
3. Before using the remote control, please make sure there are no other electronic devices or radio frequencies, etc. around. Please use the camera and remote control in an environment with better permeability and free from obstructions whenever possible.
4. Radio interference and other circumstances may cause a malfunction of the remote control.
User Interface

Micro USB Interface

Charging Your Camera:

Using an External Power Supply
In the case of low battery power or when a long-term power supply is needed, an external power supply (AC adapter, vehicle power supply, portable power supply or other power unit) can be used instead of a battery. The camera settings for functions, photography and other operation can be performed normally. When powered on, use the Micro USB cable to connect the camera to an external power supply. When connected with an external power supply, this icon "佷" will be displayed on the camera's LCD.

When powered off, use the Micro USB cable to connect the camera to the external power supply. Press the button to power on. When connected to an external power supply, "佷" will be displayed on the camera's LCD.

Requirements for the external power supply: output power of 5 V, output current of 1 A.

Insert the battery into the camera before using an external power supply to charge the camera.

Data Transmission
Use the Micro USB cable to connect the camera to a computer and copy files from the camera to the computer. The steps are as follows:

1. Set the USB connection mode to "佷" in the camera menu.

2. Use the Micro USB cable to connect a computer (on) to the camera (on). During the connection, the camera will display "佷" and the computer will automatically detect the camera.

3. Open the camera folder on the computer to copy your files to the computer's hard drive. After the transmission is complete, please unplug the USB cable in a safe manner according to the computer's settings and operation manual.

4. The camera will automatically power off when the Micro USB cable is unplugged.

Your computer operating system version needs to be Mac OS X10.9 and above or Windows 7 and above.
The folder structure of a microSD card on which this camera has performed recording is as follows:

- Folder numbers range from 100 to 999. Four alphabetic characters indicate the camera lens type. Five or eight alphabetic characters indicate the file type. The character shows the camera lens type used in the shot:
  - VR: 360° Spherical / VR Mode : _
  - Dome: 235° Round (Dome) Mode: R
  - Front: 197° 4K Ultra Wide Mode: F

- VR files formatted (Each folder stores a maximum of 9999 still pictures)
  - Still pictures in .jpg format
  - Movie files in .mp4 format

- Loop Recording videos.
  - Movie files in .mp4 format

- The size of a video file may not exceed 4GB. If the size is over 4GB, it will be saved as a separate file.

- To simulate a 360° viewing experience while previewing videos recorded by the ORBIT360 4K/4KVR360, use the PIXPRO 360 VR Suite, available for Mac and PC's.
Micro HDMI Interface:

To connect your camera to a TV, use a Micro HDMI cable (sold separately).

After the connection is successful, the files on the memory card of the camera should be displayed on the television, while or is displayed on the camera's LCD.

Shooting and Playback Functions on the Camera:

1. Press and hold the button to switch between the video playback mode and the shooting modes.
2. Press the (up) or (down) buttons to browse the folders and files in the playback modes.
3. Press the button to start playing videos and photos and press the button again to stop playing while in the recorded folders and files.
4. Set the camera parameters according to requirements in the menu first while in the shooting mode. Then return to the main camera screen, press the button to shoot or start recording and press the button again to stop recording.

In the live view mode, the frame rate depends on the video settings.
Playback Functionality from your TV's and Remote Control:

1. Press the left and right keys to switch between the folders and files on your camera's Micro SD card.
2. Press the button to return to main menu.
3. Press the button to hide or display the TV screen information.
4. For browsing the video folders and files, press the TV remote control central key to start playing, press the left arrow to fast reverse, press the right arrow to fast forward and press the central button again to pause playback.
5. Press the button to delete the current file and select to confirm deletion.
6. Press the button to stop playing.

Only HDMI televisions having the Consumer Electronics Control (CEC) function can support this function.
**Wi-Fi Mode**

**Download and Install APP**

- **Smart Devices:**
  Download the APP installation package (APP name: PIXPRO 360 VR Remote Viewer) to your smart device from the path below and install it by following the instructions on the interface.

  For ANDROID devices, search and download the APP "PIXPRO 360 VR Remote Viewer" in Google Play and install it by following the instructions on your smart device's interface.

  For iOS devices, search and download the APP "PIXPRO 360 VR Remote Viewer" in APP Store and install it by following the instructions on your smart device's interface.

- **Personal Computers:**
  Download the "PIXPRO 360 VR Suite" (for Mac or Windows) installation package from the official KODAK PIXPRO website and install it on your computer by following the prompts on the interface.

Please review the following items before your first time connecting:

1. Do not use in places with high intensity magnetic fields, electrostatic and electric wave interference (for example near a microwave oven), which may or may not cause failure in receiving proper signals.
2. Do not use the Wi-Fi or NFC connection or functions on an airplane.
3. To maintain your connection, please keep the ORBIT360 4K/4KVR360 within 32.8 feet (10 meters) without signal shielding interference.
4. The ORBIT360 4K/4KVR360 and the smart device can only be connected one to one.
5. The ORBIT360 4K/4KVR360 and personal computer can only be connected one to one.
6. Your smart device operating system version needs to be iOS 9 or higher on Mac or ANDROID 5.0 or higher. iPad mini1 / iPad 4 / iPad Air 1 / iPhone 5s and earlier models (any system versions) will not support this APP.
7. Your computer operating system version needs to be OS X10.9 on Mac and Windows 7 and above.
Connecting your Camera to Smart Device (or Personal Computer) with Wi-Fi:

Operation Method:

1. Camera:
   Check SSID (Service Set Identifier) (PIXPRO-ORBIT360_XXXX / PIXPRO-4KVR360_KXXXX) and password (initial password: 12345678) indicated on the label in the battery compartment of the camera. Press the button to enable Wi-Fi mode. The camera will enter the pending connection mode interface two seconds later:

   ![Waiting.png](attachment:Waiting.png)

2. Smart Device or Personal Computer:
   When you enable Wi-Fi mode, the camera will automatically search nearby Wi-Fi hotspots. Select the one with the same SSID (PIXPRO-ORBIT360_XXXX / PIXPRO-4KVR360_KXXXX) and input the camera's password. (Default Password: 12345678)

   ![Connecting.png](attachment:Connecting.png)

3. Camera:
   When the Wi-Fi connection is successful, enter the Wi-Fi connection interface.

   ![WiFi Connected.png](attachment:WiFi Connected.png)

4. Smart Device or Personal Computer:
   When connected via Wi-Fi, you can tap the APP icon on the smart device to start it; or double-click the APP icon on the desktop of your computer to start it.

5. Camera:
   When the APP is connected to the camera, the APP connection interface will appear.

   ![APP Connected.png](attachment:APP Connected.png)

   When recording has started via the APP, the recording interface will appear on the camera's LCD.

   ![REC.png](attachment:REC.png)
If the Wi-Fi connection is dropped while recording, the camera will continue to record and will enter the connection free recording mode.

When displays in the interface, press the button and press the (up) or (down) button to select YES. Then press the button to exit the Wi-Fi connection mode.
Connecting Camera to Smart Device with NFC

1. These instructions are to enable NFC connection on your smart device.
2. Use your smart device to lightly touch the NFC mark on the ORBIT360 4K/4KVR360 camera. If the smart device has a prompt tone or vibration that means the connection is successful.

3. The APP will automatically open on your smart device.

⚠️ The NFC feature is only available when your smart device's screen is unlocked.

Special Accessories

There are different accessory options available for the ORBIT360 4K/4KVR360 cameras. Accessory bundle packs will vary by retailer and international regions. To purchase additional optional PIXPRO accessories separately, please contact your local retailer or visit kodakpixpro.com for a complete list of available accessories.

⚠️ Before using your camera (especially in water or rigorous activity), please pay close attention to make sure the camera is tightly secured or housed to prevent possible damage or loss of the product.

⚠️ Please ensure that the bonding, adhesive surface is clean and free of debris or unwanted particles before using double-sided adhesive accessories. Dirt, grease or other foreign matter will reduce the effectiveness of the double-sided adhesive. The double-sided adhesive is not easily removed after adhering.

⚠️ Please take care to properly position and orient the accessory before sticking it to the desired surface.

⚠️ After fully assembling and mounting the optional accessories, please make sure any screw or mount is in the proper position and fully secured.
Standard Housing-C: For use with other accessories when waterproofing is not required

**Installation Method:**

1. Hold the bottom of the locking arm and flip up to open it.

2. Open the locking arm of the standard housing and place the camera inside housing as shown in diagram below. Press the top cover of the fixed mount around camera to close it. Press the bottom of the lock as shown in diagram below until locked into place.

3. Install the housing mount on the desired accessory and use the setscrew to tighten.

4. Use the included accessories tool to fully tighten the setscrew. Be careful not to over tighten screw and risk stripping.

In order to prevent deformation or damage of the Standard Housing accessory, please refer to the diagram to the left for your reference and do not overtighten screws.

Use the protection latch only at the time of transportation and storage. Keep the latch in such a way that it does not detach when mounting.
**Flat Adhesive Mount-A**: For sticking onto a skateboard or other flat objects

**Curved Adhesive Mount-A**: For sticking onto a helmet or other curved objects

Installation Method:
There are two types of adhesive mounts: flat and curved. You should select your desired adhesive mount based on the shape of the object you intend to mount your camera to.
Both types can be installed in the same way:
1. Assemble the standard housing (59).
2. Fasten the standard housing and install adhesive mounts according to the diagrams below and use the setscrew to tighten.
3. Stick the double-sided adhesive at the bottom of the adhesive mount to the object of your choice.

The double-sided adhesive is disposable. It should always be replaced with a new one after being peeled off.
Bar Mount-A: For mounting on bicycle handlebars, posts, rods and other tube-like objects

Installation Method:
1. Align the bar clamp to the handlebar or tube shaped post and rotate the screws clockwise to tighten.
2. Assemble and install the standard housing (59).
3. Connect and install the standard housing and bar clamp in accordance with the directions illustrated in the diagram below and use the setscrew to fully tighten.
Suction Cup Mount-A: For attachment to smooth surfaces, such as glass

Installation Method:
1. Assemble and install the standard housing (59).
2. Attach the standard housing to the adapter, pre-tightening the nut and suction mount in accordance with the illustration below and fully tighten the large nut.
3. Carefully clean the suction mount bottom and the smooth mounting surface before attaching the suction cup. Press the handle down to suction to your desired surface.
**Vented Helmet Strap Mount-A: For mounting on objects like bicycle helmets**

**Installation Method:**
1. Align the locator pole on the mount to the locator hole on the camera and align the screw on the mount to the camera's screw socket. Turn the screw clockwise with a coin or similar shaped object to tighten.

2. Lay out the strap before threading both ends into the helmet. Thread both ends of the band into the buckle, then press down on the buckle clamp to fasten.
Head Strap Mount: For wearing on one’s head

Installation Method:
1. Assemble the standard housing (59).
2. Insert the base of the standard housing to the mount before using the set screw to fully tighten.
3. Place the band around your head and adjust to desired fit.
Selfie Stick-B and Remote Control Mount: For taking selfies or 360° shooting and recording

Always use caution when using. Do not use the hand-held selfie stick when on a bicycle, motorized vehicle or in other unsafe scenarios.

Installation Method:
1. Assemble and install the standard housing (or the waterproof housing) (59/68).
2. Attach the standard housing (or the waterproof housing) to the selfie stick-B in accordance with the diagram below, then tighten the thumbscrew.
3. Twist the knob counterclockwise selfie stick sections in accordance with the directions below to extend. Twist clockwise knob to lock in place.
4. To install the remote control and clip mount to the handle, snap and lock the remote control into the clip and attach to the selfie stick pole as shown in diagram below:
5. Attach the included wrist strap to the handle of the selfie stick. Wrap wrist strap around your wrist when in use.
Waterproof Housing-C: For use with the ORBIT360 4K/4KVR360 underwater, in wet conditions or in other occasions where waterproofing is recommended or necessary

Installation Method:

1. Place base of the Waterproof Housing over the 1/4" Screw Socket on the bottom of the camera, align the base screw to the 1/4" Screw Socket on the camera, then tighten screw.

2. Remove the two protective lens caps from the camera and wrap the Anti-Fog Insert and Anti-Reflective Patch around the circumference of the camera. For more details on the installation and removal of the protective lens covers, please refer to the ORBIT360 4K/4KVR360 User Manual (11).
3. Place the camera into the stationary and mounted half of the Waterproof Housing. Align the red mount marks on the front half enclosure to the mounted, fixed half of the Waterproof Housing and turn the front half of the Waterproof Housing enclosure in the direction of the arrow on the housing. When you hear a "clicking" sound, the front and back covers of the Waterproof Housing have been properly closed and are fully sealed.

4. Use the supplied Hex Wrench tool to loosen the clear plastic mini remote control enclosure on the Waterproof Housing. Open the mini remote control enclosure cover and insert the Mini BLUETOOTH Remote Control inside. Then use the Hex Wrench tool to carefully and fully tighten the screw.

5. To attach the Waterproof Housing Mount with other PIXPRO accessories like the selfie stick, use the included accessories tool to fully and carefully tighten the set screw.
Set the camera to VR mode with the resolution file size of 3840 × 2160/15fps. With the selectable option of underwater. Pair the camera and the Mini BLUETOOTH Remote Control, refer to (35-37) for detailed instructions. When pairing is successful, insert the camera into the Waterproof Housing and secure.

In order to prevent deformaties or permanent damage to the Waterproof Housing accessory, please refer to the diagram (67) for your reference and do not overtighten screws.

Before using your camera in or submerging under water, please make sure you first securely enclose it inside the Waterproof Housing. The Waterproof Housing can be submerged up to 30 meters (98 feet) with a water temperature between 69.8°F ± 5°F (21°C ± 10°C). The Waterproof Housing accessory will maintain its waterproof capabilities for up to 2 hours at a depth of up to 30 meters (98 feet) while fully submerged.

Please install the Anti-Fog film in a dry environment, so as not to affect Anti-Fog film moisture absorption.

Anti-Fog Inserts are intended to help minimize and absorb unwanted moisture from within the waterproof enclosure. Please make sure the Anti-Fog Inserts are completely dry before use by heating in a 176°F (80°C) oven for approximately 5 minutes. Each Anti-Fog Insert can be used between 2 and 3 times.

The Anti-Reflective Patch is intended to reduce unwanted glare and reflections while used under water.

Please don't use the product in the scene of violent shock, such as motorboat. It may lead to waterproof shell damage and cause water leakage.

To open the Waterproof Housing, twist the front half of the Waterproof Housing's enclosure to the left and counter clockwise lock in the direction indicated on the Waterproof Housing diagram below.

Never open the Waterproof Housing when submerged, around water or in wet conditions.

After employing the waterproof box in the water, please use a soft cloth to wipe the residual water droplets dry, and then put it into the holster.
Quick Release Clip: Suitable for attaching to a belt or strap

Installation Method:
1. Align the clip's positioning post and screw mount with the camera's positioning mount receptor and 1/4" screw socket.
2. Use the supplied accessory tool to tighten the screw into the mount and secure your camera to the base of the Quick Release Clip.

There are three available positions to mount your model of KODAK PIXPRO VR Camera to the Quick Release Clip:

① Place the positioning post in the center
② Place the positioning post to the left

③ Place the positioning post to the right

3. Attach the Quick Release Clip with your mounted camera secured to desired belt, harness, strap or other accessory.
Backpack Clip: Suitable for clip on the backpack

Installation Method:

1. Assemble the standard housing (59).

2. Attach the standard housing to the adapter, and pre-tightening the large nut and backpack clip in accordance with the illustration below. Insert the base of the standard housing to the mount before using the large nut to fully tighten.

3. Clip the backpack clip to the backpack and fix the camera's shooting direction.
4. To attach the Backpack Clip with other PIXPRO accessories like the Screw Mount-B, use the included accessories tool to fully tighten the set screw.
