Declaration of Conformity
Responsible Party: JK Imaging Ltd.
Address: JK Imaging Ltd., 17239 So. Main Street, Gardena, CA 90248 USA
JK Imaging Europe, 71 Clarendon Road, Watford, WD17 1DS, UK
Company Website: kodakpixpro.com

For Customers in the U.S.A.
Tested to Comply with FCC Standards FOR HOME OR OFFICE USE
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired camera operation.

For Customers in Europe

"CE" mark indicates that this product complies with the European requirements for safety, health, environment and customer protection. "CE" marked cameras are intended for sales in Europe.

This symbol [crossed-out wheel bin WEEE Annex IV] indicates separate collection of electrical waste and electronic equipment in the European countries. Please do not throw the equipment into domestic refuse. Please use the return and collection systems available in your country for proper, safe disposal of this product.

Batteries: Please dispose of used batteries at designated collection centers.
Packaging: Please follow local regulations for the recycling of packaging.
About this Manual
Thank you for purchasing this KODAK PIXPRO Digital Camera. Please read this manual carefully and keep it in a safe place for future reference.

- JK Imaging reserves all rights of this document. No part of this published manual may be reproduced, transmitted, transcribed, stored in a retrieval system or translated into any language or computer language, in any form, by any means, without the prior written permission of JK Imaging.

- All trademarks mentioned in this manual are used for identification purposes only and are properties of their respective owners.

- This manual provides you with instructions on how to use your new KODAK PIXPRO Digital Camera. Every effort has been made to ensure that the contents of this manual are accurate; however JK Imaging reserves the right to make changes without notice.

- Throughout this manual, the following symbols are used to help you locate information quickly and easily.

   - Indicates useful information.

- The following symbols may be used throughout this manual to facilitate your understanding of how to operate the camera:

   - [Item properties]: The optional properties in the camera interface are indicated by the [ ] symbol.
SAFETY NOTES

Safety Notes for this Camera

- Do not drop the camera or allow it to hit solid objects.
- Do not attempt to disassemble or repair the camera.
- Do not use or store the camera in dusty places or on a beach to help prevent dust or sand from entering the camera, causing possible damage.
- Do not use or store the camera in a hot environment or in direct sunlight.
- Do not use or store the camera near powerful magnetic fields, such as a magnet or transformer.
- Avoid touching the lens of the camera.
- Do not expose the camera to direct sunlight for a long period of time.
- To prevent the camera from being damaged by moisture, do not use or store the camera in very humid environments, such as in rain or near bodies of water.
- If water accidentally comes in contact with the camera, turn the camera off immediately, remove the battery and the memory card and dry it completely within 24 hours.
- When you take the camera from a cold environment to a warmer environment, condensation may occur. Please wait for a reasonable period of time before you turn the camera on.
- Before you remove the battery and memory card, the camera should be turned off.
- When you clean the body of the camera, do not use abrasive, alcohol-based or organic cleansers or solvents.
- Use a professional lens cleaning cloth and appropriate cleaner to wipe and clean the lens.
- Download your photos and remove the memory card when you are going to store the camera for long periods of time.
- If this camera is not in use for a long period of time, please keep it in a dry and clean storage location.
- Our company will not pay compensation for any failure of playback including: pictures or videos damaged or unrecoverable by improper operation.
Safety Notes for Batteries

- If battery fluid leaks inside the camera, contact our customer service department immediately. If battery fluid leaks onto your skin, rinse your skin department with clean water and seek immediate medical attention.

- Disposal of used batteries should be carried out in accordance with your local (national or regional) regulations.

- To prevent batteries from being damaged, do not drop them or allow them to hit solid objects or to be scratched by foreign objects.

- Do not let batteries come in contact with metal objects (including coins) to avoid short circuiting, discharging, excessive heat or possible leakage.

- Do not attempt to disassemble batteries.

- Do not expose batteries to water. Always keep the battery contacts dry.

- Do not heat batteries or throw them into a fire to avoid a possible explosion.

- Do not store batteries in a hot environment or in direct sunlight.

- When the camera is stored for a long period of time, remove batteries and keep them in a safe, dry place that is not accessible to infants and children.

- In colder environments, the performance of batteries could be noticeably reduced.

- When you install the batteries, align the battery markings according to the positive and negative markings inside the camera battery compartment. Never force batteries into the battery compartment.
Safety Notes for Memory Cards

- We highly suggest buying only well-known, name brand memory cards to ensure peak performance and reliability.
- Format the memory card using the camera before you use it or insert a new one.
- Do not drop the memory card or allow it to hit solid objects to avoid damaging it.
- Do not attempt to disassemble or repair the memory card.
- Do not expose the memory card to water. Always keep it dry.
- Do not remove the memory card when the camera is turned on. Otherwise, the memory card and photo/video files could be permanently damaged.
- Do not directly edit the data on the memory card. Copy the data to your computer before you edit files.
- When the camera is stored for long periods of time, be sure to download your photos and remove the memory card. Store the memory card in a dry environment.
- Do not modify the name of the files or folders of the memory card using your computer. Modifying the file names may cause the files to not be recognized on the camera or a possible permanent error may occur.
- A photo taken with the camera will be stored in the folder that is automatically generated on the memory card. Do not store photos that are not taken using this camera in these folders as the pictures cannot be recognized during playback.
- When you insert the memory card, make sure the notch of the card matches the markings on the top of the camera card slot.
**Other Safety Notes**

- Do not disconnect the power or turn the camera off during the update process. Doing so may cause incorrect data to be written and the camera may not power on later.
- Do not hang the neck strap of the camera around the neck of a child.
- When using your camera on an airplane, observe the relevant rules specified by the airline and FAA regulations.
- Due to the limitations of manufacturing technology, the LCD may have a few dead or bright pixels. These pixels do no effect the quality or performance of the camera, photos or video.
- Do not expose the camera’s LCD to water. In a humid environment, only wipe it with a soft, dry, cleaning cloth.
- If the LCD is damaged and the liquid crystal comes into contact with your skin, wipe your skin with a dry cloth immediately and rinse it with clean water. If liquid crystal comes into contact with your eyes, wash them with clean water at least for 15 minutes and seek immediate medical attention. If you accidentally swallow liquid crystal, rinse your mouth immediately and seek medical attention.

GETTING READY

Accessories Included

Your camera box should contain the camera model you purchased along with the following accessories. If anything is missing or appears to be damaged, please contact your retailer or our customer service team.

- AA Alkaline Battery × 4
- Micro USB Cable
- Neck Strap
- Lens Cap with Cord
- Quick Start Guide
- Warranty Card
- Service Card
Installing Lens Cap and Neck Strap
Part Names

1. AF Assist Beam/Self-Timer Lamp
2. Flash Lamp
3. Microphone
4. Lens
5. LCD
6. Fast Video Recording Button
7. Indicator Lamp
8. "i" Button
9. Menu Button
10. Display Button
11. Playback Button
12. AF Button/Arrow Button (Up)
13. Flash Button/Arrow Button (Right)
14. Delete Button/Self-Timer Button/Arrow Button (Down)
15. Macro Button/Arrow Button (Left)
16. SET Button
17. Strap Eyelet
18. Micro HDMI Port
19. Micro USB Port

20. Zoom Lever
21. Shutter Button
22. Continuous Shot Button
23. Exposure Compensation Button
24. Power Switch
25. Mode Dial
26. Speaker
27. Tripod Socket
28. Battery Cover Lock
29. Battery Door Cover
Installing Battery and Memory Card

1. Open the battery door cover.

2. Insert the batteries into the battery slot in the correct direction as shown in the following diagram:

Please use brand name batteries (such as Energizer® or Duracell®) for optimal performance. Do not mix new and old batteries or use different brands of batteries. When replacing batteries, please replace all 4 batteries at the same time.

The performance and life expectancy of alkaline batteries will vary depending on the brand.
3. Insert the memory card into the memory card slot as shown in the diagram below:

4. Close the battery door cover.

A standard SD memory card is not included in the camera packaging and needs to be purchased separately. This camera takes a standard (SD/SDHC) memory card. We recommend using a name brand memory card that is Class 4 or higher and has a capacity of 4GB to 32GB. The camera is not compatible with Micro SD, Ultra, Ultra Plus, Extreme, XC, or adapters for any of these other memory cards.

To remove your memory card, open the battery door cover, gently press the memory card to eject it. Remove it carefully.
Turning Camera On and Off

Slide the Power switch to turn the camera on/off.

How to Take Pictures

1. Hold the camera with both hands, being careful to not block the flash and lens with fingers.
2. Point the lens toward the object you want to take a picture of, then frame it with the LCD.
3. Use the Zoom button to select Tele or Wide positions to zoom in or out on your subject.
4. Press the shutter button halfway to focus on the subject. When the focus frame turns green, press the shutter button down completely to take the picture.

When the power is off, press and hold the play button to power on and enter Playback Mode.
Set your Language, Date/Time

Set your Language, Date/Time after the First Power-On

1. When you turn the camera on for the first time, the language selection screen appears.
2. Press the arrow buttons to select your desired language.
3. After you press the SET button to confirm your language selection, the Date/Time settings screen will appear.
4. Press the left/right arrow buttons to select the Date/Time to be adjusted: Time is displayed in YYYY.MM.DD/HH:MM.
5. Press the up/down arrow buttons to adjust the value for the desired Date/Time.
6. Press the SET button to confirm the time settings and the snapshot screen will appear.

Resetting your Language

After you set your desired language for the first time, follow the instructions below to reset your language.
1. Press the button, press the up/down arrow buttons to select . Press the SET button to enter the menu.
2. Press the up/down arrow buttons to select and press the SET button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Language] and press the SET button or right arrow button to enter the menu.
4. Press the arrow buttons to select your desired language and press the SET button to confirm.
5. Press the button and the snapshot screen will appear.
Resetting Date/Time

After you set your Date/Time for the first time, follow the instructions below to reset date and time.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Date & Time] and press the button or right arrow button to enter the menu.
4. Press the left/right arrow buttons to select the Date/Time to be adjusted: Time is displayed in YYYY.MM.DD/HH:MM.
5. Press the up/down arrow buttons to press the value for your selected entry. After you finish your settings, press the button to confirm.
6. Press the button and the following snapshot screen will appear.
Display Setting

Press the DISP button to display the settings: Classic, Full, Off.

Classic: Displays the camera parameters on screen

Off: Does not display any additional icons on screen

Full: Camera parameters with Grid and Histogram

Using the Mode Dial

This camera provides a convenient Mode dial that allows you to manually switch between different modes with ease. The available modes are listed below:

<table>
<thead>
<tr>
<th>Mode Name</th>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto Mode</td>
<td>📸</td>
<td>In this mode, the optimal conditions for taking pictures will be set based on the subject and environment. It is the most commonly used mode for taking pictures.</td>
</tr>
<tr>
<td>Program AE</td>
<td>P</td>
<td>Under different scenes, the user can switch the ISO and EV value according to personal preference, the camera can automatically set the shutter speed and aperture value.</td>
</tr>
<tr>
<td>Shutter Priority</td>
<td>S</td>
<td>Setting allows you to adjust the shutter speed / EV value and ISO value. The camera automatically sets the aperture value based on the shutter speed and ISO value to get the most appropriate exposure value.</td>
</tr>
<tr>
<td>Manual Mode</td>
<td>M</td>
<td>This mode is for manually setting the aperture, shutter speed and ISO value.</td>
</tr>
<tr>
<td>Face Beautifier</td>
<td>🌟</td>
<td>This mode automatically enhances facial features with skin softening touches and eye brightening capabilities.</td>
</tr>
<tr>
<td>Panorama Mode</td>
<td>🌍</td>
<td>In this mode, up to 4 frames can be stitched together to create a single panoramic photo.</td>
</tr>
<tr>
<td>Scene Mode</td>
<td>SCN</td>
<td>Choose from 22 different pre-set scene types and effects for your photos.</td>
</tr>
<tr>
<td>Movie Mode</td>
<td>📽</td>
<td>Record videos.</td>
</tr>
<tr>
<td>Custom Settings</td>
<td>CS</td>
<td>The user can store frequently used shooting modes and parameters. Switching to this mode enables quick adjustment.</td>
</tr>
<tr>
<td>Landscape</td>
<td>🌞</td>
<td>For landscape and outdoor shots. Vivid reproduction of green and blue.</td>
</tr>
</tbody>
</table>
Please refer to the table below if any non-adjustable options in PSM mode: (O: Available  X: Unavailable)

<table>
<thead>
<tr>
<th>Mode</th>
<th>Options</th>
<th>Aperture</th>
<th>Shutter</th>

<td>S</td>
<td></td>
<td>X (Display)</td>
<td>O</td>
<td>O</td>
<td>O</td>
</tr>
<tr>
<td>M</td>
<td></td>
<td>O</td>
<td>O</td>
<td>X (Display)</td>
<td>O</td>
</tr>
</tbody>
</table>

1. Turn the Mode Dial to select the PSM mode you want.
2. Press the button to configure settings.
3. Press the left/right arrow buttons to select setting to adjust.
4. Press the up/down arrow buttons to adjust the parameters.
5. Press the button to confirm the settings and enter the shooting screen.
**Face Beautifier**

In Beautifier Mode, the camera is set to automatically adjust camera exposure for realistic portrayal of skin tones.

1. Turn the Mode dial to select Face Beautifier Mode ( 

2. Press the button and press the up/down arrow buttons to select 

3. Press the left/right arrow buttons to select Face Beautifier and press the button to confirm and return to photo shooting mode.

Beautifier Mode has 3 effects:

- **Effect 1:** Skin Soften
- **Effect 2:** Skin Soften + Eye Brightening
- **Effect 3:** Skin Soften + Eye Brightening + Eye Enlargement
Panorama Mode

With Panorama Mode, you can take a series of pictures which will be automatically stitched into an ultra-wide panoramic picture by the camera. Follow the steps below:

1. Turn the Mode dial to Panorama Mode ( ).
2. Press the arrow buttons to select a desired shooting direction. Should you not select a direction, the default shooting direction is “right”. 2 seconds later, the camera will be ready to take pictures. You can also press the button or press the shutter button halfway down to get ready to take pictures.
3. Compose the first view of the panoramic picture on the LCD and press the Shutter button to capture the image.
4. When you finish shooting the first photo, two target icons will display on the LCD in the left and right sides. Move the camera to the right until the round target icon is directly positioned over the square box. The box will turn green when they overlap and the camera will automatically take the next picture. Repeat the same steps for additional shots. Up to 4 frames can be stitched together.
5. If continuous pictures are less than 4 shots, press the button and the camera will automatically stitch the pictures together. Press the playback button to enter playback mode to see the effect.
6. If you take 4 pictures, the camera will stitch the pictures together automatically. Press the playback button to enter Playback Mode to see the finished effect.

In Panorama Mode, the Flash, Self-Timer, Macro Modes and Exposure Compensation are not available. Focus Adjustment is also not available at this time.

In the process of automatic panoramic shooting "Improper alignment. Please try again", means that during the process of the camera moving, the angle is not on the green line, and shooting and stitching cannot be completed.
In Panorama Mode, up to 4 photos can be captured when the image size is set at 2MP.

During Panorama Mode shooting, press the SET button to interrupt shooting and save the current picture. Press the down button (↓) to cancel shooting and delete previously taken pictures.

**Scene Mode SCN**

You can select your desired scene from the 22 preset modes according to the type of environment you are shooting in. The camera then automatically configures the most appropriate settings for the best possible photos.

Turn the Mode dial to Scene Mode to enter the Scene Mode menu. The LCD display is shown in the screen shot below:

![Auto Scene Menu](image)

Press the arrow buttons to select a scene and press the SET button to confirm.
<table>
<thead>
<tr>

<td>Most suitable for capturing people with focus on their faces.</td>
</tr>
<tr>
<td>Night Portrait</td>
<td>When you take portraits at night, or in low light conditions, automatically adjusts the exposure for people and night scenes.</td>
</tr>
<tr>
<td>Backlit Portrait</td>
<td>When the sun or any other light source is behind you, automatically adjusts the foreground exposure to produce the best pictures possible.</td>
</tr>
<tr>
<td>Night Landscape Mode</td>
<td>For night scenes, automatically increases the ISO value to compensate for low light.</td>
</tr>
<tr>
<td>Macro Mode</td>
<td>The Macro setting is ideal for shooting small objects or close-up photos.</td>
</tr>
<tr>
<td>Auto Mode</td>
<td>The camera automatically adjusts the exposure and focus to ensure the best possible pictures.</td>
</tr>
</tbody>
</table>
**Movie Mode 🎥**

1. Turn the Mode dial to select Movie Mode (🎥).

2. Press down the Shutter Button to start recording.

3. Once you are finished, press the Fast Video Recording Button or the Shutter Button to stop recording and return to the shooting screen.

**Custom Settings (CS)**

The user can store frequently used shooting modes and parameters and switch to this mode for quick adjustment.

Follow the steps below:

1. Select any mode to be stored.
2. Set your desired parameters in the current mode.
3. Press the button, press the up/down arrow buttons to select , and press the button to enter the menu.
4. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
5. Press the up/down arrow buttons select [Custom Settings] and press the button or the right arrow button to enter the menu.
6. Select [Yes] to save or [No] to cancel.

7. Turn the Mode dial to switch to the custom settings (CS).

8. The photo settings you stored the last time are saved.

The factory default settings are Program AE (P) and other parameters.

Custom Settings only keeps the Photo Shooting Mode and parameters you set the last time you used the camera in this mode.

**Landscape 》**

While operating in this mode, the camera will provide vivid reproduction of greens and blues, adjusting your landscape photos for the best possible results.

Follow these steps:
1. Use the power switch to turn the camera on.
2. Switch the Mode dial to Landscape (Landscape).
3. Compose your picture in the LCD and press the shutter button halfway down to focus on the subject.

4. The LCD will show a green focus frame when the subject is in focus.
5. Press the shutter button down all the way to take pictures.
Using the Zoom Function

Your camera is equipped with two types of zoom functions: Optical Zoom and Digital Zoom. Toggle the Zoom lever of the camera to zoom in or out on the subject while taking pictures.

When the Optical Zoom reaches the maximum threshold for Digital Zoom, release and turn the Zoom lever to T to switch between Optical Zoom and Digital Zoom.
Focus Setting

In different photo shooting modes, you can select different focus methods.
1. Press the up arrow button (AF) to display the settings screen.

2. Press the left/right arrow buttons to select the following 3 modes:
   - Single-AF: The focus frame appears on the center of the LCD screen to focus on the subject.
   - Multi-AF: The camera automatically focuses the subject in a wide area to find the focus point.
   - Object Tracking: Smart tracking of the object in motion under the focusing shooting.
3. Press the SET button to confirm the settings and exit the menu.

Once enabled, object tracking will only work when lens is focused on the object.

Macro Mode

The macro setting is ideal for shooting small objects or close-up photos. This mode allows you to focus on subjects very close to the camera.
1. Press the left arrow button (’en’) to enter the macro menu.

2. Press the left/right arrow buttons to select the following 2 modes:
   - Macro Off: Select this option to disable macro.
   - Macro On: Select this to focus on subjects 3 cm from the lens.
3. Press the SET button to confirm the settings and exit the menu.
Self-Timer Setting

Use this function to take pictures at pre-set intervals. The camera shutter speed can be set for 2 seconds, 10 seconds or Smile Detection.

1. Press the down arrow button ( 💡_cycle) to enter the Self-Timer Menu.

2. Press the left/right arrow buttons to select the following 4 modes:
   - Self-Timer Off
     Disables the Self-Timer.
   - Self-Timer 2 sec
     A single picture is shot 2 seconds after the shutter button is pressed.
   - Self-Timer 10 sec
     A single picture is shot 10 seconds after the shutter button is pressed.
   - Self-Timer Smile
     Press the Shutter Button and a picture will be taken immediately after a smile is detected.

3. Press the set button to confirm the settings and exit the menu.

When enabling the Self-Timer setting, pressing the shutter or the or down arrow button can disable the Self-Timer and return to the shooting screen while keeping the Self-Timer setting.

When enabling Smile Detection, pressing the shutter button or set button can disable the Self-Timer without keeping the Self-Timer - Smile setting.
Flash Mode

The flash provides supplemental light for a scene. The flash is usually used when shooting against the light to highlight the object; it is also suitable for metering and shooting in darker scenes to improve the exposure.

1. Pop the flash up manually as shown below:

2. Press the right arrow button (_neurons) to enter the Flash Settings Menu.

3. Press the left/right arrow buttons to select the following 5 modes:

   - Flash Auto
     Camera flash goes off automatically based on existing light conditions.

   - Fill Flash
     The flash will engage with each shot even if there is enough available light to take the photo without flash.

   - Slow Sync
     This allows you to take pictures of people at night that clearly show both your subjects and the night time backdrop. The use of a tripod is recommended when shooting with this setting.

   - Slow Sync + Red-Eye
     Use this mode for slow synchrony shots with red-eye reduction.

   - Red-Eye Reduction
     The camera emits a brief pre-flash before the picture is taken to reduce red-eye effects.

4. Press the SET button to confirm the settings and exit.
White Balance Setting

The white balance setting allows you to adjust the color temperature for different lighting sources to ensure the most accurate color reproduction.

Follow the steps below to set white balance of the camera:

1. Press the SET button to enter White Balance Menu.

2. Press the left/right arrow buttons to select the following 8 modes:
   - AWB
   - Daylight
   - Cloudy
   - Fluorescent
   - Fluorescent CWF
   - Incandescent
   - Manual WB (Fully press the shutter button down to detect the white balance value)
   - Color Temp. (1900K-10000K) Press the direction buttons up/down to "Adjust the K value"; Press the direction button left to exit the K value.

3. Press the SET button to confirm the settings and exit the menu.
Follow the steps below to configure the Continuous Shot settings:

1. Press the button to enter the Continuous Shot menu.

2. Press the left/right arrow buttons to select the following 4 modes:
   - Single
   - Continuous Shot
   - 3 Shots
   - Time-Lapse
     Take pictures based on the preset interval (30sec/1min/5min/10min).

3. Press the button to confirm the settings and exit the menu.

4. Press the shutter button to start shooting.

The flash is disabled in Continuous Shot Mode in order to achieve quick succession of shots.
EV Setting

The EV Function Menu of the camera includes functions, such as EV Adjustment, ISO, Shutter, Aperture, etc. Using the appropriate Function Settings can improve your pictures.

To select the best setting, follow these steps:
1. Press the button to display the Settings screen.
2. Press the left/right arrow buttons to select the Setting options.
3. Press the up/down arrow buttons to adjust the option values.
4. Press the button to complete the setting and enter shooting mode.

Exposure Compensation

Set up Exposure Compensation to adjust the picture brightness. If there is very high contrast between the photographed object and the background, the brightness of the picture can be adjusted as necessary. (This can be adjusted in Mode)

The adjustable range of exposure value is from EV -2.0 to EV +2.0.
ISO
The ISO function allows you to set the sensitivity of the camera's light sensor based on the brightness of the scene. To improve the camera's sensor performance in darker environments, a higher ISO value is required. A lower ISO value is needed when shooting in brighter conditions. Pictures taken at higher ISO settings will generally have more noise than those taken at lower ISO settings. (This can be adjusted in P S M Mode)

Shutter Adjustment
For shutter speed, the camera may automatically set the aperture value corresponding to the manually set shutter speed so as to obtain the most suitable exposure value. The movement of an object may be shown by adjusting the shutter speed. High shutter value can help you capture fast moving objects more clearly, while low shutter value can show the movement of objects better. (This can be adjusted in S M Mode)

The camera's ISO settings include: Auto, 80, 100, 200, 400, 800, 1600 and 3200.
Aperture Adjustment
You can adjust the aperture size and value. Selecting a larger aperture opening will emphasize the point of focus and will show a blurry background and foreground. A small aperture opening will keep both the background and main object in clear focus. (This can be adjusted in M Mode)

Using Quick Recording
In Photo Shooting Mode, press the Recording Short Cut button 🎥 to begin recording video.

Once you are finished, press the recording short cut button or the shutter button to stop and store the video. The camera will return to the Shooting Mode automatically.
"i" Button Function Menu

Mode: P S M

The image color setting allows you to select different effects.

1. Press the button to select the Image Color Setting Menu.
2. Press the left/right arrow buttons to select the image color setting options.

There are 7 image color options in photo shooting mode:

- Normal
- Vivid
- Sepia
- Black and White
- Vignetting
- Salon
- Dreamy

There are 4 image color options in movie mode:

- Normal
- Vivid
- Sepia
- Black and White
To view captured photos and video clips on the LCD:

1. After pressing the button, the last photo or video clip taken will be displayed on the LCD.
2. Use the left/right navigation buttons to scroll through the photos or video clips stored in the built-in memory or on the camera’s Memory Card.
3. To play a selected video clip, press the button to enter the Movie Playback Mode.

An operation guide appears on the screen when playing back a video. Press the appropriate buttons to enable the corresponding functions.

Thumbnail View

When in Playback Mode, rotate the Zoom lever counter clockwise to the position to display thumbnail images of the photos and videos on the LCD screen.

1. Slide the zoom lever to switch between 3 x 3 and 4 x 4 thumbnails.
2. When a 3 x 3 or 4 x 4 thumbnail is displayed, press the arrow buttons to select the picture or video clip to view.

3. Press the button to select the date for playback.

4. Press the arrow buttons to select a picture or video clip to view and press the button to restore it to the original size.

- The date folder is displayed in date order based on camera's date/time settings.
- If the indicator appears on the LCD, then a movie file is currently being displayed.
- Press the button to restore a preview icon to its original image size.
48

Using Zoom Playback (for still pictures only)

The Zoom lever can also be used during playback. This allows you to magnify photos between 2x to 8x.

1. Press the left/right arrow buttons to select the picture on which to use the zoom feature.
2. Rotate the Zoom lever clockwise to (T) to zoom in.
3. The magnification and range of the picture will be displayed in the bottom right corner of the screen.
4. Press the arrow buttons to navigate and select a portion of the photo to be zoomed in on.
5. Press the SET button to return the image to its original scale.

Movie images cannot be magnified.
This setting allows you to view all the stored pictures as a slideshow.

1. Press the \( \text{\textcircled{1}} \) button to enter playback screen.
2. Press the \( \text{\textcircled{2}} \) button to enter slide option.
3. Press the left/right arrow buttons to select Slideshow playing or [Cancel] to return to the playback screen.
4. Press the \( \text{\textcircled{3}} \) button to confirm the setting.
Deleting Photos and Videos

In Playback Mode, press the down arrow button (⬇️) to select your photos and videos.

To delete photos or videos:
1. Press the 🎥 button to switch to Playback Mode.
2. Press the left/right arrow buttons to select the photos and videos to be deleted.
3. Press the down arrow button (⬇️) and the deletion screen is displayed.
4. Press the up/down arrow buttons to select [Delete One] or [Exit] and press the 📷 button to confirm.

Erased photos/video clips cannot be recovered.

Please refer to page 67 for instructions on deleting more than one image at a time.
Photo Setup Menu

Mode:  
1. In Photo Shooting Mode, press the button to enter the Photo Shooting Menu.
2. Press the up/down arrow buttons to select the Photo Shooting Menu to be set.
3. Press the left/right arrow buttons to select the Photo Shooting Menu to be set and press the button to confirm.

Refer to the following pages for more details about each setting:
• Expo Metering (Exposure Metering) (refer to P51)
• Image Size (refer to P52)
• OIS (Optical Image Stabilization) (refer to P52)
• Continuous AF (refer to P53)
• HDR (High Dynamic Range) (refer to P53)
• Beautifier (refer to P54)
• Select Scene (refer to P54)

Expo Metering (Exposure Metering)
Use this setting to select the "target" size of the camera's field of view to be metered.

There are 3 options:
• AiAE (Artificial Intelligence AE): Automatically selects the central and peripheral metering, to calculate the reasonable value of metering by weighting.
• Spot: For metering targets a small area in the center of the camera's field of view.
• Center: For metering targets a slightly larger area in the center of the camera’s field of view.
**Image Size**

The size setting refers to the image resolution in pixels. A higher image resolution allows you to print that image in larger sizes without degrading the photo image quality.

The bigger the number of recorded pixels is, the better the image quality becomes. As the number of recorded pixels lessen, you will be able to record more images on a memory card.

---

**OIS (Optical Image Stabilization)**

This mode can help reduce photo blur caused by unintentional shaking or low light.

Use this Image Stabilization Mode in darker environments.

Shooting in windy or unstable environments (such as a moving vehicle) may cause blurry images.
**Continuous AF**

Use the Continuous AF setting to be able to continuously focus automatically when taking pictures.

There are 2 options:

- Off
- On

Setting Continuous AF to On will reduce battery life.

---

**HDR (High Dynamic Range)**

With the HDR function, pictures that are overexposed may be corrected to optimize the highlights and lowlights captured to more accurately represent the actual scene.

There are 2 options:

- Off
- On
**Beautifier**
Select the effect for Beauty Mode.

- Effect 1: Skin Soften
- Effect 2: Skin Soften + Eye Brightening
- Effect 3: Skin Soften + Eye Brightening + Eye Enlargement

**Select Scene**
Select the Scene Mode under the SCN mode.
• Options in the Shooting Mode (O: Available  X: Unavailable)

Photo Shooting Setting Menu

Mode:  

1. Press the button in Photo Shooting Mode and press the up/down arrow buttons to select .

2. Press the button to enter the menu.

3. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to pick the item to be selected and press the button or right arrow button to enter the menu.

5. Press the up/down arrow buttons to select an option and press the button to confirm.

Quality

The quality setting can be used to adjust the image compression ratio.

There are three options for picture quality:

- Best (Average File Size: 4.0MB)
- Fine (Average File Size: 2.5MB)
- Normal (Average File Size: 2.0MB)
**AF-Assist Beam**
In a darker environment, the AF assist beam setting can be turned on for better focus.

**Digital Zoom**
This setting is for adjusting digital zoom. If this function is disabled, only optical zoom can be used.

**Date Imprint**
Include a date/time stamp on the photo image.

- Off
- Date
- Date / Time
**Quick Review**
This option allows quick review of photos immediately after they are taken. Each photo is displayed on the LCD screen based on the selected time.

There are 4 options:
- Off
- 1 sec
- 2 sec
- 3 sec

A shorter Quick Review time will improve battery life.

**Custom Settings**
Custom settings stores the current Photo Shooting Mode and its parameters. The stored mode and parameters are directly invoked in the Custom Settings Mode.

There are 2 options:
- No
- Yes
Movie Menu

Mode:  
1. Turn the Mode dial, select the  mode and press the button to enter the Movie menu.

2. Press the up/down arrow buttons to select the Movie menu to be set.
3. Press the left/right arrow buttons to select the Movie menu to be set and press the button to confirm.

Expo Metering (Exposure Metering)

Use this setting to select the "target" size of the camera's field of view to be metered.

There are 3 options:
- AiAE (Artificial Intelligence AE): Automatically selects the central and peripheral metering, to calculate the reasonable value of metering by weighting.
- Spot: For metering targets a small area in the center of the camera's field of view.
- Center: For metering targets a slightly larger area in the center of the camera’s field of view.
**Video Quality**
Set the image resolution used during video recording.

The speed requirements for reading and writing high resolution image pixel images to a SD card are as follows:

<table>
<thead>
<tr>
<th>No.</th>
<th>Image Pixels</th>
<th>Frames</th>
<th>Recommendation</th>
<th>Recording Time (4GB) (Approx.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>1280 x 720 *</td>
<td>30</td>
<td>Class 4</td>
<td>55 Minutes</td>
</tr>
<tr>
<td>2</td>
<td>1280 x 720</td>
<td>15</td>
<td>Class 4</td>
<td>60 Minutes</td>
</tr>
<tr>
<td>3</td>
<td>640 x 480</td>
<td>30</td>
<td>Class 4</td>
<td>70 Minutes</td>
</tr>
<tr>
<td>4</td>
<td>320 x 240</td>
<td>30</td>
<td>Class 4</td>
<td>208 Minutes</td>
</tr>
</tbody>
</table>

* The longest recording time is 29 minutes at one time.

When recording in higher pixel resolutions for extended periods of time, this can cause the camera to generate heat. This is not a camera malfunction.

**OIS (Optical Image Stabilization)**
This mode can help reduce photo blur caused by unintentional shaking or low light.

* Use this Image Stabilization Mode in darker environments.

* Shooting in windy or unstable environments (such as a moving vehicle) may cause blurry images.
Movie Setting Menu

Mode: 

1. Turn the Mode dial and select 
   to enter the video recording screen.

2. Press the button, press the up/down arrow buttons to select 
   and press the button to enter the menu.

3. Press the up/down arrow buttons to select 
   and press the button or right arrow button to enter the menu.

4. Select the items to be set and press the button or the right arrow button to enter the menu.

5. Press the up/down arrow buttons to select an option and press the button to confirm.
**Digital Zoom**
This setting is for adjusting Digital Zoom. If this function is disabled, only Optical Zoom can be used.

![Digital Zoom Setting](image)

**Custom Settings**
Custom settings stores the current Movie Shooting Mode and its parameters. The stored mode and parameters are automatically used in the Custom Settings Mode.

![Custom Settings](image)
Playback Menu

Mode: 

1. Press the button to display the playback screen and press the button to enter the menu.
2. Press the up/down arrow buttons to select the playback desired and press the button to enter.
3. Press the left/right arrow buttons to select an option and press the button to confirm.

Refer to the following pages for more details about each setting:
- HDR (High Dynamic Range) (refer to P63)
- Touch-Up (refer to P64)
- Rotate (refer to P64)
- Resize (refer to P65)
- Color (refer to P65)

HDR (High Dynamic Range)

With the HDR function, pictures that are overexposed may be corrected to optimize the highlights and lowlights captured to more accurately represent the actual scene.

1. In Playback Mode, press the left/right arrow buttons to select the photos to be edited.
2. Press the button, select the settings, and press the button to display the settings screen.
3. Press the left/right arrow buttons to select whether HDR is used.
4. After using the HDR function, the image will be saved as a new file and the original file is still stored in the memory.
**Touch-Up**

1. In Playback Mode, press the left/right arrow button to select the photos to be edited.
2. Press the 
   button, select the 
   settings, and press the 
   button to display the settings screen.
3. Press the left/right arrow buttons to select touch-up or [Cancel] to return to the playback screen.

4. Press the 
   button to confirm the setting.

- : Red-Eye Reduction  
- : Skin Soften  
- : Eye Brightening  
- : Eye Enlargement  
- : Cancel

The Touch-Up referred to is the individual use of three effects. Beauty Mode allows you to select one, two, or all three of the effects combined.

**Rotate**

You can use this setting to change the orientation of the picture.

1. In Playback Mode, press the left/right arrow button to select the photos to be edited.
2. Press the 
   button, select the 
   settings, and press the 
   button to display the settings screen.
3. Press the left/right arrow buttons to select the rotation direction or [Cancel] to return to the playback screen.

4. Press the 
   button to confirm the setting.

- : Turn Right  
- : Turn Left  
- : Cancel

Videos and panoramic pictures cannot be rotated.

The rotated picture file will replace the original photo.
Resize

This setting allows you to resize a picture to a particular resolution and saves it as a new picture.

1. In Playback Mode, press the left /right arrow button to select the photos to be edited.
2. Press the button, select the settings and press the button to display the settings screen.
3. Press the left/right arrow buttons to select [1024 X 768] or [640 X 480] or select [Cancel] to return to the playback Screen.
4. Press the button to confirm the setting.

Color

This setting allows you to change the picture color effect. The file is saved as a new photo and stored in memory together with the original photo.

1. In Playback Mode, press the left /right arrow buttons to select the photos to be edited.
2. Press the button, select the settings, and press the button to display the settings screen.
3. Press the left/right arrow buttons to select the corresponding menu or [Cancel] to return to the playback screen.
4. Press the button to confirm the setting.

- : Cancel
- : Vivid
- : Sepia
- : Black and White
- : Grainy
- : Vignetting
- : Salon
- : Dreamy
Mode:  
1. Press the button to show the playback screen, press the button, and press the up/down buttons to select .  
2. Press the button to enter the menu.

3. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select the item to be set and press the button or right arrow button to enter the menu.

5. Press the up/down arrow buttons to select an option and press the button to confirm.

Protect
To prevent any pictures or videos from being accidentally erased, use this setting to lock one or all of the files.

To lock or unlock the photo and video files:
1. Press the up/down arrow buttons to select [Protect] and press the button or right arrow button to enter the sub-menu.
2. Press the up/down arrow buttons to select the sub-menu and press the button or right arrow button to show the settings screen.
There are 4 sub-menus available:

• One: Lock the selected photo or video if they are unprotected; unlock the selected photo or video if they are protected.

• Date Folder: Protect all photos in the date folder.

• All: Lock all photos or videos.

• Reset: Cancel all locked photos or videos.

3. Press the up/down arrow buttons to select an option and press the SET button to confirm.

---

Delete

You can delete one or all photo/video files.

To delete photo or video files:

1. Press the up/down arrow buttons to select [Delete] and press the SET button or right arrow button to enter the submenu.

2. Press the up/down arrow buttons to select the submenu and press the SET button or right arrow button to show the settings screen.

There are 3 sub-menus available:

• One: Delete one photo or video.

• Date Folder: Delete all photos in the date folder.

• All: Delete all photos or videos.
3. Press the up/down arrow buttons to select an option and press the set button to confirm.

The "" indicator means a file is protected. File protection must be removed before a file can be deleted.

Deleting files will cause DPOF settings to be reset.

When a single photo in the date folders is protected, the protected photo is to be retained while other photos are to be deleted.

Deleted files will be permanently deleted and will not be able to be recovered or restored.

**DPOF (Digital Print Order Format)**

The DPOF feature allows you to compile and select a group of pictures that you would like to print and will save your selection on the memory card so that you can use the memory card to print without having to individually specify the photos you want to print.

A printer that supports DPOF is needed for photo printing.
**Trim**

The trim setting allows you to crop photos and save them as new pictures.

1. Press the up/down arrow buttons to select [Trim] and press the SET button or right arrow button to enter the menu.
2. Select [Yes] to confirm trim. Select a section of the photo to be trimmed using the Zoom lever and arrow buttons to trim a photo.
3. Press the SET button and the [Save change?] prompt appears. Select [✓] to change and save the picture. Select [✗] to cancel changes and return to the trim prompt screen.

---

The image cannot be clipped/trimmed again once it has been clipped to 640 X 480.
**Setup Menu**

1. Press the button in any mode and press the up/down arrow buttons to select \[\text{Menu}\].
2. Press the button to enter the menu.
3. Press the up/down arrow buttons to select \[\text{Menu}\] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select the item to be set and press the button or right arrow button to enter the menu.
5. Press the up/down arrow buttons to select an option and press the button to confirm.

Refer to the following pages for more details about each setting:
- Sound Settings (refer to P71)
- Power Saver (refer to P71)
- Language (refer to P19)
- World Time (refer to P72)
- Date & Time (refer to P20)
**Sound Settings**

With this setting you may adjust the sound/volume.

1. Select [Sound Settings] in the basic settings menu. Press the SET button or right arrow button to enter the menu.
2. Press the left/right arrow buttons to select desired volume level.
3. Press the SET button to confirm.

**Power Saver**

This setting allows you to save power and get the maximum possible running time for your camera’s batteries. Follow the steps below to turn the LCD and camera off automatically after a consecutive period of inactivity.

1. Select [Power Saver] in the basic settings menu. Press the SET button or right arrow button to enter the menu.
2. Press the up/down arrow buttons to select an option.
3. Press the SET button to confirm.

**Language**

Refer to the “Resetting your language” section on page 19.
**World Time**

This zone setting is a useful function for your overseas trips. This feature enables you to display the local time on the LCD while you are abroad.

1. Select [World Time] in the basic settings menu. The world time screen appears.
2. Press the up/down to select the departure place (نبي) and destination (альн) fields.
3. Press the left/right arrow buttons to select a city located in the same time zone as that of the field. Press the SET button to confirm settings.

**Date & Time**

Refer to the “Resetting Date/Time” section on page 20.

---

**File / Software**

**Format**

Please Note: formatting enables you to delete all files and the contents on the memory card and camera’s built-in memory, including protected photo and movie files.

To use this setting:

1. Press the button, press the up/down arrow buttons to select [ ] and press the SET button to enter the menu.
2. Press the up/down arrow buttons to select [Format] and press the SET button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Yes] or [No] and press the SET button to confirm.

[Image of World Time screen showing cities: Trindade, Martim Vaz, London, Iceland]

[Image of Format screen with options: No, Yes]
5. If you select [Yes] the camera will format its memory.
   If there is no memory card in the camera, the built-in memory will be reformatted; if there is a memory card, only the memory card will be formatted.

Copy to Card
Use this setting to copy the files stored in the built-in memory to a memory card.
1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Copy to Card] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

File Numbering
After you take a picture or video clip, the camera will automatically save it with a sequential number. You can use this setting to reset the file numbering to 1.
1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [File Numbering] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

If there is no card available in the camera, this function will not be displayed.
**Reset**

Use this setting to restore the camera to its original factory default settings.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Reset] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

**Firmware (FW) Version**

Use this setting to view the current camera firmware version.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [FW Version] and press the button or right arrow button to enter the menu.
4. When there is a new firmware version in the memory card, select [Yes] to update.
Connecting to a Computer

You can use a USB cable to connect the camera and copy (transmit) photos to a computer, printer or other device.

Setting the USB Mode

The camera’s USB port can be used to connect to either a computer or a printer. The following steps will allow you to ensure that the camera is correctly configured to connect with a PC.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [USB] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [PC] and press the button to confirm.

Transferring Files to Your Computer

The computer will automatically detect the camera as a removable drive. Double-click the “My Computer” icon on the desktop to locate the removable drive and to copy folders and files in the drive to a directory on your PC as you would copy any typical folder or file.

Follow the steps below to connect the camera to a computer:
1. Make sure both the camera and computer are turned on.
2. Connect one end of the supplied USB cable to the USB port on your camera.
3. Connect the other end of the cable to an available USB port on your computer.

4. After the transmission is complete, disconnect the USB cable according to your computer manufacturer’s instructions specifying how to safely remove USB devices.

---

**Video System**

Use this feature to switch the video system from either NTSC or PAL.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.

2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.

3. Press the up/down arrow buttons to select [TV-System] and press the button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select [NTSC] or [PAL] and press the button to confirm.
This camera supports wireless connection for Eye-Fi cards. Enable the Eye-Fi connection by following the steps below:

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Eye-Fi] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [On] or [Off] and press the button to confirm.

The video output system changes based on the selected language.

Set Eye-Fi SD Card Connection Mode

- **NTSC:** English, Chinese (Traditional), Japanese, French, Korean, Russian, Hungarian, Slovakian
- **PAL:** German, Spanish, Italian, Chinese (Simplified), Portuguese, Swedish, Danish, Finnish, Indonesian, Norwegian, Dutch, Turkish, Polish, Thai, Croatian, Czech, Arabic, Hindi

If the Eye-Fi card is not available in the camera, this feature is not displayed.
Supported HDMI Connections

HDMI (High Definition Multimedia Interface), is a fully digital audio/video transmission interface, through which uncompressed audio and video signals are transmitted.

Direct transmission of digital video signals to your TV reduces conversion loss and improves image quality.

Connecting HDMI-Ready TV

1. Use a High-Definition output terminal cable (not included) to connect your camera to an HDMI compliant TV.
2. The camera will be automatically detected by the TV.
3. After connecting via HDMI, the camera enters playback mode.

- Make sure the camera and the TV are both turned on before connecting.

- Refer to your TV instruction manual for information on what resolution sizes it will support. The resolution and output formats that are not supported will be grayed out on the camera's LCD.
Connecting to a PICTBRIDGE™ Compatible Printer

PICTBRIDGE™ technology allows printing of the photos saved on the memory card by a compatible printer. To find out if a printer is PICTBRIDGE™ compatible, simply look for the PICTBRIDGE™ logo on the packaging or check the owner’s manual for specifications. With the PICTBRIDGE™ function on your camera, you can print the captured photos directly to a PICTBRIDGE™ compatible printer using the supplied USB cable, without the need for a PC.

Setting the USB Mode

The camera’s USB port can be set to connect with either a PC or a printer. The following steps will ensure that the camera is correctly configured to connect with a printer.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press the up/down arrow buttons to select [USB] and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [USB] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Printer] and press the button to confirm.

After the camera is reset, it will switch to PC mode automatically from USB mode.

See “Using the PICTBRIDGE™ Menu” section on page 81.
Connecting to your Printer

1. Make sure both the camera and printer are turned on.
2. Connect one end of the supplied USB cable to the USB port on your camera.
3. Connect the other end of the cable to the USB port on the printer.

If the camera is not connected to a PICTBRIDGE™ compatible printer, the following error message will appear on the LCD.

The error message above will also appear if the USB mode is set incorrectly, in which case you should disconnect the USB cable, check the USB mode settings, ensure that the printer is turned on, and then try connecting the USB cable again.
After setting the USB mode to printer, the PICTBRIDGE™ menu will appear.

Press the up/down arrow buttons to select a menu item and press the button or right arrow button to enter the item.

Refer to the following sections for more detailed information on each setting.

### Print (with Date)

If you have set the date and time on your camera, the date and time will be recorded and saved with each photo you take.

1. In the PICTBRIDGE™ menu, select [Print (with Date)] and the screen as shown below appears.

2. Press the left/right arrow buttons to select a photo to be printed.
3. Press the up/down arrow buttons to select the number of copies for the currently displayed photo.
4. Press the SET button and the following screen will appear.

5. Select [Yes] and press the SET button to confirm; select [Cancel] to cancel printing.

---

**Print (without Date)**

Use this setting to print the photos without dates on them.

1. In the PICTBRIDGE™ menu, select [Print (without Date)] and the screen as shown below appears.

2. Press the left/right arrow buttons to select the photo to be printed.
3. Press the up/down arrow buttons to select the number of copies for the currently displayed photo.
4. Press the SET button and the following screen will appear.
Print Index
You can print all photos in the camera via this function.

1. In the PICTBRIDGE™ menu, select [Print Index] and the screen as shown below appears.

5. Select [Yes] and press the button to confirm; select [Cancel] to cancel printing.

2. Select [Yes] and press the button to confirm; select [Cancel] to cancel printing.
**Print DPOF Images**

To use DPOF printing, you must select your photos for printing using the DPOF settings beforehand. See “DPOF” section on page 68.

1. In the PICTBRIDGE™ menu, select [Print DPOF Images] and the screen as shown below appears.

2. Select [Yes] and press the 

   ![Yes](image)

   button to confirm; select [Cancel] to cancel printing.

**Exit**

Select [Exit] to exit the PICTBRIDGE™ Menu. At this time, the message [Remove USB Cable!] will appear on the screen.

Disconnect the USB cable from the camera and printer.
